WELL DEFINED.

De Quiz-What's your idea of the difference between optimism and pessimism?

De Whiz-O! the optimist says it is spring when it isn't and the pessimist

says it isn't when it is. Time to Ghange Subject. The Courier-Journal tells of embarrassing statement made by a

well-known Louisville woman who is known as "saying things without thinking." Her daughter was entertaining a young man on the front porch and the mother was standing at the fence talking to the neighbors next door. In the yard of the latter was a baby a little over a year old, and it was trying to walk. "You shouldn't let it walk so young," advised the thoughtless matron. "Wait until it's a little older. I let my daughter walk when she was about that age, and it made her bow-legged." The young man began to talk ener getically about the weather.

Had to Hear Evidence.

Some ladies were visiting at Blanche's home one day. During the conversation, while the visitors were there, one of the ladies was describ ing how the blowflies laid eggs and they hatched out as maggots. Four year-old Blanche did not seem to be interested in the conversation nor pay any attention to what they had beer talking about. After the visitors had gone, Blanche said:

"Mamma, I don't believe flies lay

eggs." "Why?" asked the surprised mother "Because I never heard one cackle." explained the doubting Blanche.

Hospitals a Benefit to Property. The National Association for the Study and Prevention of Tuberculosis has recently concluded an investiga tion, which shows that 67.5 per cent of the tuberculosis sanatoria and hos pitals of the United States have beer a benefit to the property and health of the communities in which they are located. In the case of more than 62 per cent, of the sanatoria the presence of the institutions has helped to in crease the assessed value of surround

> ORIGIN Of a Famous Human Food.

The story of the great discoveries or inventions is always of interest. An active brain worker who found

himself hampered by lack of bodily strength and vigor and could not carry out the plans and enterprises he knew how to conduct, was led to study various foods and their effects upon the human system. In other words, before he could carry out his plans he had to find a food that would carry him along and renew his physical and mental strength.

He knew that a food which was a brain and nerve builder (rather than a mere fat maker) was universally needed. He knew that meat with the average man does not accomplish the desired results. He knew that the soft gray substance in brain and nerve centers is made from Albumen and Phosphate of Potash obtained from food. Then he started to solve the problem.

Careful and extensive experiments evolved Grape-Nuts, the now famous food. It contains the brain and nerve building food elements in condition

The result of eating Grape-Nuts daily is easily seen in a marked sturdiness and marked activity of the brain and nervous system, making it a pleasure for one to carry on the daily duties without fatigue or exhaustion. Grape-Nuts food is in no sense, a stimulant but is simply food which renews and replaces the daily waste of brain and nerves.

Its flavour is charming and being fully and thoroughly cooked at the factory it is served instantly with cream.

The signature of the brain worke spoken of, C. W. Post, is to be seen on each genuine package of Grape-Nuts. Look in pkgs. for the famous little book, "The Road to Wellville." "There's a reason."
