HOWELLS
From the Journal.
Mrs. James Hughes, one of the pioneer women of northeastern Colfax county, died at the family home at Schuyler on Saturday last. The deceased was seventy years of age and had been a resident of this county since the spring of 1872. She was a noble woman and the news of her death brings genuine sorrow to the hearts of those who knew her.

Among a bunch of cattle that J. K. Semerard of Maple Creek precinct had on the South Omaha market on Tuesday were twelve high grade hereford steers, two year olds, that had been on a feed of alfalfa and corn for only eighty-six days that showed an average weight of 1,133 pounds. The twelve brought Joe \$779.70 and he is more than ever convinced that it pays to raise and feed good stock.

ST. EDWARD
From the Advance.
Mrs. Chas. Wendell left yesterday for Columbus to visit her parents, Mr. and Mrs. H. Weisenthal.

Mrs. Lee Mullen of Columbus returned home yesterday after a brief visit to her parents, Mr. and Mrs. Wm. Farrow. Mrs. Shell Clark and daughter, Miss Ruth Clark, left Tuesday for Fremont where they will visit Mr. and Mrs. Geo. Freeman.

Mrs. Frank Bruno left Tuesday for Columbus where she will enter St. Mary's hospital to prepare for a surgical operation.
Word comes from Geo. Reeder who was taken to St. Mary's hospital, Columbus, last Thursday, that he is at present much improved in health. His right foot was amputated the fore part of the week and for a few days his condition was considered very critical. His physicians now believe that his chances for recovery are good.

PLATTE CENTER
From the Signal.
Henry Johannes, of Grand Prairie, hauled eleven pigs to this market Monday that weighed 318 pounds each. They were Duroc Jerseys, and but ten months old.

Frank Coupons and Miss Catherine Forman were married Monday morning at St. Joseph's church in Platte Center. Rev. Father Angelus officiating. These young people live in this neighborhood, the bride being a daughter of Mr. and Mrs. John Forman, and the groom a son of Mr. and Mrs. Peter Coupons, of Shell Creek township. They will reside on the groom's farm, 7 miles southwest of town. Will Ripp left last Thursday for his new home at Cedar Rapids, where to-

THE BIG GOVERNMENT DAM COMPLETED.

The Highest Masonry Dam in the World.

On Sunday, January 16th, at 2:00 p. m., the United States Government completed the highest masonry dam ever built anywhere at any time. This dam also has the smallest spread, from base to top, any dam of a considerable height ever built.

The dam is in Rattlesnake and Cedar mountains in the northwestern part of Wyoming, seven miles west of Oody and about sixty miles east of Yellowstone Park. The dam is 70 feet across at the base of the foundation, 108 feet wide at the river level and 170 feet wide at the top. It was started in 1905 and has been five years in building. Almost 200,000 barrels of cement and 90,000 tons of granite were required to complete the masonry work. It is built into the channel of the Shoshone river for the purpose of impounding the waters of that stream to conserve them for irrigating what is known as the lands of the Shoshone Irrigation project, comprising 150,000 acres of land lying along the banks of the Shoshone River and along the Burlington railroad to the east of Oody. When the waters are impounded, they will form a lake of ten square miles with an average depth of 70 feet and a capacity of 148,588,512,000 gallons, or enough water to cover 456,000 acres with water one foot deep—enough water to irrigate more than twice the acreage of the Government Project.

Upon this dam and other engineering works of this project, which include an outlet tunnel through the solid rock, a diversion dam at Corbett and a tunnel therefrom 3½ miles long through the solid rock, the Government is spending about \$7,000,000, or almost one-seventh of the total amount—\$50,000,000—thus far expended on the various Government irrigation projects scattered throughout the country.

During the past year hundreds of settlers have taken up lands under this project and have done exceptionally well, even for a first year.

The lands of the project are reached by the Burlington Route, which is spending millions of dollars in the construction of new lines through this rich and fertile country—known as the Big Horn Basin of Wyoming.

BELLWOOD.
From the Gazette.
Geo. Allen, formerly of Alexis township, passed through Bellwood Tuesday to David City with the dead body of his wife, who died at Belgrade the latter part of last week.

Grandma Lillie is reported very ill at the home of her son Henry at Cohen, Neb. Her daughter, Mrs. W. H. Grant and granddaughters left Thursday morning for her bedside.

After about a week's illness with appendicitis Walter Mark died on Friday morning last at the home of Mr. and Mrs. Thomas Barley west of Bellwood, where he had been working.

Clyde Perine, after about a week's illness with appendicitis, died Thursday morning about 8 o'clock at the home of his father-in-law, James Jerdon, who lives just across the line in Polk county. He was married only a few months ago to Miss Cora Jerdon, therefore leaves a young wife to mourn her loss. Deceased was about 24 years of age.

MONROE.
Gordon and Miss Maudie Hill came up from Columbus Saturday to spend Sunday with their parents.

Vestal Moore bought the livery business Tuesday of Frank Dickinson. Mr. Moore began his duties Wednesday morning.

Monday of this week revival meetings were begun at the Methodist church, and will probably continue for several weeks. Rev. Rose, the pastor, has charge of the meetings.

A number of friends gathered at the home of John Kelly Monday evening and helped him celebrate his seventy-eighth birthday. An oyster supper was enjoyed by all late in the evening.

S. Borden of Columbus who has been selling a stock of clothing in the Munter building, moved his stock of clothing back to Columbus Tuesday. He has only been here for the past month.

That the independent elevator is a good thing for a town has been amply demonstrated here this winter, as more grain has been marketed in Monroe this winter than in a number of years. And then the fact of having an independent elevator is also a big advertisement for the town, as farmers know that they will get all their products are worth.

Emigrant Potatoes.
Irish potatoes, like Irishmen, do better abroad than they do at home, and just as the average Irishman when he gets to the colonies becomes a governor general, like Lord MacDonnell or Sir Gavan Duffy, so the average Irish seed potato planted in England knocks spots out of the average Scotch or English seed—Irish Homestead.

Ready, as a Rule.
"Woman," observed the epigrammatic boarder, "is a puzzle without an answer."
"Hub" snorted old Grumpley. "I never saw a woman without one yet."

MEAT MARKET

We invite all who desire choice steak, and the very best cuts of all other meats to call at our market on Eleventh street. We also handle poultry and fish and oysters in season.

S. E. MARTY & CO.
Telephone No. 1. - Columbus, Neb.

The Noise Habit.
A personal experience first showed the writer the possibility of a state of affairs where the habit of noise could become as fixed as the habit of a drug. Waking one night in the quiet of a country house far from other habitations, I suddenly heard the starting of the hot air engine which pumped the water—chug, chug, chug, chug. I lay listening to its monotonous vibrations and wondering at the unusual hour for pumping until I fell asleep. The next night the sound was repeated. On mentioning the matter to my host he confessed that he could not sleep in the quiet of the country; that the sudden change from the roar of a great city to the silence of the woods was so great as to cause him real suffering. As his only way to rest he would leave the house in the middle of the night, start up the pump and, lying down in a nearby hammock, find sleep brought him by the lullaby of the hot air engine. That man recognized that he had the noise habit and finally conquered it.—Hollis Godfrey in Atlantic.

Oddy Named.
A Mr. Hudson, who had made a large fortune as a dentist, had built a very expensive country house near Dublin, but of such an extraordinary construction as to bid defiance to the criticism of the architect.

One day after dinner at Curran's this singular mansion became a subject of merriment for his guests. The question for their satirical inquiry was, "What was its order of architecture?" One said it certainly was Grecian, another contended it was Saxon and a third that it was oriental, when their host thus interposed:

"Excuse me, gentlemen, you are all wrong. It is Tuscan. From the irregularities of the mansion and from its proprietor being a dentist the Irish call it Snaggletooth Hall."—London Answers.

Something Left.
Brown (at the club)—Yes, by Jove, there's very little you can teach me. I've been everywhere, done everything, seen everything. The Scotch member—Young man, did you ever have D. T.'s? Brown—D. T.'s? Great Scott, no! The Scotch member—Then you've seen nowt.—Sketch.

Reckless Driving.
"What is the matter with your wife? I see she's got her hand in a sling."
"Reckless driving."
"Horse?"
"No; nail."

Where Her Thoughts Were.
Daughter—To tell the truth, pa, I didn't think much of the close of the sermon. Father—Thought more of the clothes of the congregation, eh?

WANTED
The right party can secure an excellent position, salary or commission for Columbus and vicinity. State age, former occupation and give references. Address LOCK BOX 428, Lincoln, Neb.

MICROBES IN THE SCALP.

The Latest Explanation is that Microbes Cause Baldness.

Professor Unna of Hamburg, Germany, and Dr. Sabourand, of Paris, France, share the honor of having discovered the hair microbe.

Baldness is not caused through a few weeks' work of these hair microbes, but is the result of conditions brought about by their presence. Baldness may not occur until years after the microbes began work, but it is certain to come sooner or later.

The microbes cut off the blood supply. They feed on the fatty matter about the roots of the hair, through which the blood is absorbed. Finally the fatty matter is consumed, the food supply of the hair is gone and it starves and finally dies.

Resorcin is one of the most effective germ destroyers ever discovered. Beta Naphthol is a most powerful, yet absolutely safe germicide and antiseptic, which prevents development of germ matter, and creates a clean, healthy condition.

Micropine, although not a coloring matter or dye, is an ingredient well established for its power to restore natural color to human hair when loss of color has been caused by a disease.

Borax, because of its well-defined softening and cleansing properties, is most useful in the treatment of scalp and hair diseases. Glycerine acts as a stimulant to the hair bulbs, and has a soothing, healing and nourishing influence. Alcohol is indispensable in medicine because of its antiseptic, stimulating and preservative qualities.

We want every one who has scalp or hair trouble to try Rexall "93" Hair Tonic, which contains all these ingredients. If it does not give you complete satisfaction in every particular, we will return every penny you paid us for it, for the mere asking and without question or formality.

Of course you understand that when we say that Rexall "93" Hair Tonic will grow hair we do not refer to cases where the roots are entirely dead, the pores of the scalp closed, and the head has the appearance of a billiard ball. In cases like this there is no hope. In all other cases of baldness Rexall "93" Hair Tonic will grow hair, or cost the user nothing. Two sizes, 50 cents and \$1.00. Remember you can obtain Rexall Remedies in Columbus only at our store.—Pollock & Co., the druggists on the corner.

A Fish That Gives Pain.
The well known brown pigment called sepia is obtained from a ten armed octopus found principally in the Mediterranean and more especially at the head of the Adriatic sea, where it is caught by the natives for food.

The sepia is contained in a bag and is really the black fluid of which we have all read as being discharged by the creature to cover its escape. Some naturalists say that the fluid is brownish, which becomes more credible when we know that this is the source of sepia. The pigment is really a powder which dissolves in water. Its strength may be estimated by the fact that it will color 1,000 times its own bulk.

When the octopus has been killed the sack or bag is removed and dried to prevent putrefaction. The sepia is treated with ammonia or caustic soda, washed and dried. It is one of the most durable of pigments, except when fully exposed to the fierce rays of the sun, and an even surface can be obtained with it more easily than with most pigments. Sepia has been obtained from a fossil cuttlefish thousands of years old and found to be quite good for paint.

Getting Away From Land.
The question has been asked, Is it possible to sail 1,000 miles from land? This can be done at several points. By leaving San Francisco and sailing northward into the north Pacific a spot is reached where there is no land, not even an islet, for 1,000 miles in any direction. So, too, sailing from the southern point of Kamchatka southeastward ships reach a point equally distant from land of any kind, the nearest to the north being the Aleutian islands and to the south the outlying members of the Sandwich group. In the southern Indian ocean it is possible to sail 1,000 miles out from the southern points of Australia and New Zealand and still be as far from any other land, and the same may be done in a westerly direction from Cape Horn. Indeed, from this point a much longer distance might be reached, for the southern Pacific between the Horn and New Zealand covers a space of 80 degrees of longitude and 40 of latitude of absolutely unbroken sea, making its central point over 1,200 miles from anywhere.

The Change From Black to Red.
"See that little woman who just went out?" remarked a Fourth avenue milliner to a customer. "Noticed that red hat, did you? Well, as a milliner and a person whose business it is to study the different characteristics of women I have watched her for two years. It has been a kind of study of the 'evolutions of a widow.'"

"Two years ago she came to me, recently bereaved, and had me make her a hat of deepest black. She was broken hearted and declared she would never again take an interest in the pretty things that women like to wear. A year ago she came again.

"Don't you think I might have the least bit of white in my new hat?" she asked.

"Yes," I said; "I think you might," and the hat was made. Three months later she came for another hat, and she stood for a little touch of lavender. Next she had a big white plume, and last week I made her that red hat. It just shows what time will do in lifting up a heart bowed down."—Louisville Times.

The Releaser.
If he hadn't been a dreadful bore and the hour wasn't so late it is quite possible the lovely girl would have refrained from the exercise of a strategic scheme, says the Cleveland Plain Dealer.

"Hark!" she whispered as he paused in the midst of a long winded description of his camping outfit.

"What is it?" he whispered in return.

She smiled reassuringly.

"It's only papa. He must be offing the releaser."

"And what is the releaser?"

"It's one of papa's ingenious schemes. Every night, at exactly 11 o'clock, he pulls up a brass chain that releases our brindle bull pup from his annex adjoining the kitchen; that's all."

And she laughed merrily. The caller glanced at the clock on the mantel. It indicated 10:57.

"I find I must go," he said in a slightly hurried manner. "And good night."

Trapping Baboons.
Hagenbeck in his book says that baboons are caught in traps made much like the huts of savages. Food is put into the traps, and once the baboons go inside a trapdoor closes behind them. Outside baboons make a great to do and urge the prisoners to escape. When the trappers come the captured baboons are terror stricken and try to force their heads through the walls of the huts. One baboon was caught three times in the same trap, and several when turned loose got back into the same trap a second time. When the baboons are carried away all their comrades therabout climb into trees and scream out to the prisoners, who answer in sad, mournful voices. On one occasion some big Arabian baboons were trapped, when 2,000 or 3,000 baboons hurled themselves upon the trappers, who had hard work to save themselves with firearms and clubs. As the trappers were forced back the victorious baboons tore up the trap and turned loose the captured baboons.

His Own Sphere.
"You a doctor? Why, nobody in his senses would employ you!"

"Perhaps not, but I'm going to be a doctor to lunatics!"

High birth is a poor dish on the table.—Irish Proverb.

Remember on every occasion which leads thee to vexation to apply this principle—that this is not a misfortune, but that to bear it nobly is good fortune.—Marcus Aurelius.

Real Good Steak.
"We can't eat this steak; it's not good!" complained a young man who was spending his honeymoon in a Scottish village.

"Ye're surely jokin', sir," said the landlord of the inn. "It maun indeed be guid. It's a bit o' the minister's auld coo!"

Higher.
"But our ideals?"

"What of them?"

"Are they higher than they were a generation ago?"

"Sure. Everything is higher now."—Louisville Courier-Journal.

His Blunder.
"How did you enjoy the musicale?"

"Oh, I applauded at the wrong time as usual; thought the orchestra tuning up was a classical number."—Kansas City Journal.

Easily Timed.
Read—Have you ever timed your automobile? Greene—Oh, yes! It stood perfectly still for forty-eight minutes on the road today.
