In Which Readers Generally Are
More or Less Concerned.

Washington.
The Clayton resolution, calling on the attorney general for information as to proposed criminal prosecution of officers of the American Tobacco Company, was adopted by the house.

In view of the rumored threatened revolutionary disturbances in Nicaragua, the gunboat Marietta has been ordered from Guantanamo, Cuba, to Bluefields, Nicaragua. The warships will undertake a tour of observation to protect American interests if necessary.

President Taft promised Representative Hardwick, of Georgia, chairman of the special house committee investigating the sugar trust, that all information regarding the trust now in the possession of the executive department would be put at the disposal of the committee. Senator Hardwick said the investigation would begin in earnest next week.

President Taft will stick to Beverly as a hot weather playground unless congress selects a site and appropriates the money for an official summer white house elsewhere. In a letter to Governor Eberhart, of Minnesota, declining with thanks the offer of a site for a presidential summer home at Wayzata, on Lake Minnetonka, the president explained that congress alone had the authority to designate an official summer white house.

Senator Cummins of Iowa, one of the organizers of the national republican progressive league, receptive candidate for the presidential nomination and supposed enemy of the administration of President Taft, announced that he would favor President Taft delegates to the republican national convention and that he could not see his way clear to support Senator La Follette for the presidency.

General.
Senator Cummins has announced that he will support Taft for renomination.

President Taft rebuked an army colonel for his admitted prejudice against the Jewish race.

Senator Smoot accused the house of trying to saddle printing bills on the senate committee.

The senate committee having the reciprocity bill declared in favor of the Root amendment.

A resolution was offered in the senate to permit the opening of the Lorimer election investigation.

Attorney General Wickersham said criminal prosecution of trust magnates will be undertaken.

A Washington state congressman said millions were going to waste in tobacco taxes.

China will utilize a cruiser to back up demands for indemnity from the Mexican government.

An engineer was killed and twenty people injured in a collision on the Santa Fe in New Mexico.

Chairman Gary of the steel corporation pictured his company to the house committee as a model.

A storm drove George H. Hutton, a clerk, to commit suicide in Addison, Minn., a suburb of Cincinnati.

Fifteen persons were more or less seriously injured when the Lebanon accommodation train on the Tennessee Central railroad crashed into a switch engine on the outskirts of Nashville.

The senate committee on foreign relations decided to report favorably the treaty between Honduras and this country providing for a loan of \$10,000,000, from banking interests of the United States to meet the Honduran debt.

Mrs. Carrie Nation, the temperance crusader, died at Leavenworth, Kas., sanitarium.

A count of insurgent senatorial noses shows few for La Follette for president.

Theodore Roosevelt reiterated his determination not to again be a candidate for president.

The American chamber of commerce in Paris, which transmitted the resolutions adopted by the New York chamber of commerce and the Paris chamber of commerce favoring unrestricted arbitration between the United States and France to the 45 chambers of commerce in this country, has already received six enthusiastic replies.

Several hundred well armed Yaqui Indians have mobilized in the Yagui river delta country and are demanding the restoration of their lands, according to the statement of passengers on the train which arrived lately from Mexico.

Sixty-three persons were killed as the result of an earthquake in Mexico City.

The bill for county option in Wisconsin was indefinitely postponed by the assembly. This action practically disposes of this question at this legislature as the senate voted against the measure some weeks ago.

Sir Henry Seymour King, who, in the last general election was returned to the conservative seat in commons for the central district of Hull, was unseated. The judges found Sir Henry guilty of lavishly treating his constituents.

As evidence of President Taft's belief that peace has practically been established in Mexico by a government capable of coping with the situation, the withdrawal by degrees of the army forces from the border has begun.

President Taft gave a conditional promise to visit Lincoln in the fall.

STONE IN BLADDER REMOVED IN REMARKABLE WAY

A year and a half ago I was taken with a severe attack of kidney trouble that caused me to such an extent that morphine had to be given me. Was attended by a doctor who pronounced it as stone in the bladder and prescribed Lithia Water. I took Lithia Water and tablets for some time and received no relief from them. I stopped taking medicines for some time and having some Dr. Kilmer's Swamp-Root in the house, I decided to try it and felt much relieved; while taking the second bottle commenced to pass gravel in urine until I had passed in all at least a half a dozen or more and have not suffered the slightest pain and in all have taken one bottle and a half and feel very grateful to Dr. Kilmer's Swamp-Root. Yours very truly,
H. W. SPINKS,
Camp Hill, Ala.

Personally appeared before me this 16th of August, 1909, H. W. Spinks, who subscribed the above statement and made oath that same is true in substance and in fact.

A. B. LEE,
Notary Public.

How What Swamp-Root Will Do For You
Send to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. It will convince anyone. You will also receive a booklet of valuable information, telling all about the kidneys and bladder. When writing, be sure and mention this paper. For sale at all drug stores. Price fifty cents and one dollar.

His Disqualification.
When we saw her she stopped panting by the road to rest. It was the shell road in Bay St. Louis, and she was black. Beside her was a heavy market basket filled to overflowing. We smiled at her with sympathetic friendliness and she responded with full and free confidence.

"Tassam, I is some tired. An' I me. All painful wid' miseries. Yassam. I coulda done sen' some one else to mahket for me. Mah grandson be coulda done gone. But I don't trust him. He spends mah money too briefly."—Housekeeper.

Important to Mothers.
Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fitch* in Use For Over 30 Years.

Children Cry for Fletcher's Castoria.

All There is to It.
"What constitutes a first-class society drama?"
"Three acts, six gowns, and nine epigrams."

Garfield Tea overcomes constipation, sick-headache and bilious attacks.

It's difficult for people to generate advice that is foolproof.

Lewis' Sine Binder straighten & cigar is made to satisfy the smoker.

Many a man has discovered that popularity is not worth the price.

WOMEN MAY AVOID OPERATIONS

By taking Lydia E. Pinkham's Vegetable Compound

The following letter from Mrs. Orville Rock will prove how wise it is for women to submit to the dangers of a surgical operation when it may be avoided by taking Lydia E. Pinkham's Vegetable Compound. She was four weeks in the hospital and came home suffering worse than before.

Here is her own statement.

Paw Paw, Mich.—"Two years ago I suffered very severely with a displacement of the uterus. I could not be on my feet for a long time. My physician treated me for seven months without much relief and at last sent me to Ann Arbor for an operation. I was there four weeks and came home suffering worse than before. My mother advised me to try Lydia E. Pinkham's Vegetable Compound, and I did. Today I am well and strong and do all my own housework. I owe my health to Lydia E. Pinkham's Vegetable Compound and advise my friends who are afflicted with my female complaint to try it."—Mrs. ORVILLE ROCK, R. R. No. 5, Paw Paw, Michigan.

If you are ill do not drag along until an operation is necessary, but at once take Lydia E. Pinkham's Vegetable Compound.

For thirty years it has been the standard remedy for women's ills, and has positively restored the health of thousands of women. Why don't you try it?

Why Rent a Farm

and be compelled to pay to your landlord most of your hard-earned money. Own your own farm. Secure a Free Homestead in Manitoba, Saskatchewan or Alberta. Land in one of these districts and make a profit of \$10.00 or \$12.00 an acre. Land purchased 3 years ago at \$10.00 an acre is now worth \$20.00 an acre. The crops grown on these lands warrant the advance. You can

by cattle raising, dairying, mixed farming and grain growing in the provinces of Manitoba, Saskatchewan and Alberta.

Free homesteads, pre-emption areas, as well as land held by railway and land companies, will provide homes for millions.

Adaptable soil, beautiful climate, excellent schools and churches, good railways, and the "Last Best West," now opening the country and other advantages, write for the literature, Ottawa, Canada, or to the Canadian Government Agent.

NEBRASKA AS IT SHOULD BE KNOWN

[This paper was read before the Nebraska Press association at its meeting in Omaha, June 5-6-7, by Will M. Maupin, of Lincoln, Neb.]

We of Nebraska should know, and knowing tell the world, what Nebraska is and is to be; what Nebraska offers to the homeseeker, the investor and the health seeker; what hidden potentialities for human happiness lie dormant in her fertile soil, and what she is annually contributing to the sum total of the world's created wealth.

In the beginning of this necessarily brief paper I want to say, and say emphatically, that the last session of the Nebraska legislature, which performed many good deeds, neglected the ripest opportunity ever offered a legislature to confer a lasting benefit upon the state. I refer to its failure and neglect to make the initial appropriation for a Bureau of Publicity and Immigration. There was no reasonable ground for opposition to the measure; no reasonable objection in economy. In fact there was no opposition to the bill. But, unfortunately, it did not offer opportunities for log-rolling and trading. It had behind it the solid backing of every enterprising organization in the state, of every wide-awake man who is anxious to see Nebraska take her rightful place among the states of the republic. But because legislation today has become largely a matter of "you tickle me and I'll tickle you," so largely a matter of trade and barter, this splendid measure calculated to give us a start in the great work of making the truth about Nebraska known to the world, was allowed to die in inaction, of malnutrition, of sheer neglect. And in doing so the legislature worked a grave injury to the commonwealth.

States, like corporations and partnerships and firms must advertise in these strenuous days or fall to the rear. Constant, persistent, insistent, intelligent advertising is the keynote of success in any business, and there is no greater or more important business than the building of a state.

But there is a condition precedent to intelligent advertising. The constructor of the advertising must know what he is advertising. No man engaged in advertisement building can hope ever to know too much about the business or the goods he is exploiting. It is all well enough for the newspaper men of Nebraska to claim that they are constantly advertising Nebraska, but the plain, unvarnished truth is that they are not doing it as it should be done, and for the very simple reason that they do not know all they should know about Nebraska. I have lived in this state for a quarter of a century—longer by several years than the average Nebraska editor. I have tried for years I know Nebraska pretty thoroughly. Something like six years ago I began studying Nebraska from a different angle. Formerly I had studied it from a car window or in political conventions or by converse with friends in my office. Now, after studying Nebraska for six years as any merchant studies his stock—any successful merchant, I mean—I have just begun to realize that what I knew of Nebraska up until six years ago was as nothing, and that if I kept on acquiring knowledge for the next six or eight years as I have during the past six or eight, at the end of that time my knowledge of this great state may qualify me to emerge from the kindergarten class and enter the first primary. The longest span of human life in this age would not suffice to enable one to graduate from the great school wherein knowledge of Nebraska is imparted.

Merely as a basis upon which to work intelligently while you study, I purpose giving you some concrete facts about our beloved state. I will not waste your time in detailing bald statistics. The average human mind can not think in millions. Statistical tables appeal only to statisticians. Columns of figures frighten and repel the average man. Because of this I undertook, while serving as chief of the statistical bureau of the state, to present the statistics about Nebraska in a more attractive form than the usual table of figures. I hope I may be pardoned if I lay claim to having achieved some measure of success in advertising Nebraska abroad. I am of the opinion that the crop statistics of Nebraska, and all other statistics, received a wider range of publicity under the plan I adopted than they had achieved before. One bulletin of comparative statistics reached a circulation of 70,000 with requests for upwards of 250,000 more. And such great journals as Collier's, Leslie's Weekly, Munsey's Magazine and the Cosmopolitan, to say nothing of the great daily newspapers, gave free to Nebraska a measure of publicity that could not have been purchased with money.

Now, here are some facts about Nebraska, tersely told, that will serve as the basis of many a good advertisement of Nebraska:

Nebraska was admitted to the union in March, 1867, and is therefore forty-four years old—six years less than half a century. All this progress, all this wonderful development, has been wrought in less than fifty years. Civilization's history records nothing like it.

Seventy-seven thousand square miles of territory, 415 miles east and west and 205 miles north and south. Forty-nine million acres, eighteen million acres cultivated. Upon these eighteen million cultivated acres Nebraska in 1910 raised upwards of \$400,000,000 worth of grains and grasses. Of the thirty million uncultivated acres more than one-half are just as good for corn, wheat, oats, rye, barley, alfalfa, potatoes, broom corn, etc., as the eighteen million cultivated acres, and one-half of the remaining acreage will in time, under intelligent cultivation and proper knowledge of the conditions to be met, be added to the wealth producing area. It took Nebraskans more than a quarter of a century to learn

that they could not adapt Nebraska soil to the Nebraska man. Then came the most wonderful discovery of the least-known state—at home or abroad—of any state in the Union. Since that discovery every year has seen hundreds of thousands of acres of soil, heretofore considered worthless, brought into cultivation and yielding returns that are so astonishing that it is hard to make people believe the truth. There is room in Nebraska for a half million more tillers of the soil who will till intelligently. Landseer, when asked what he mixed his paints with, replied, "With brains!" And there is no better fertilizer than brains.

Nebraska is the fourth largest corn producing state, and the youngest of the three raising more wheat to the acre than any other state.

Nebraska is the fourth largest producer of oats, and the youngest of the four, only one state excelling her in production per acre.

Nebraska is the third largest producer of sugar beets.

Nebraska manufactures more butter per capita than any other state, and her dairy industry is in its infancy.

Nor is Nebraska alone an agricultural and live stock state. Twenty-five years ago we shipped in practically every manufactured article we consumed. Last year our total manufactured products were approximately worth \$250,000,000, or almost one-half as much as our total agricultural products and live stock. Starting as it may sound, there is no state making such rapid strides in manufacturing lines as Nebraska.

There is a reason. A dollar invested in Nebraska manufacturing establishments brings a greater return than a dollar invested in any other state.

But, as I said early in this paper, the human mind can not think in terms of millions. If I say that in 1910 Nebraska produced 36,000,000 pounds of butter we merely smile and say, "that's some butter." But you'll probably sit up and take notice when I tell you that if all that butter were packed in pound cartons, and the cartons stacked up end on end, it would make a column of butter two and one-half inches square and 285 miles high; or if loaded into standard freight cars it would make a train over thirty miles long!

In 1910 Nebraska hens produced 102,000,000 dozen eggs—one billion, two hundred million eggs. Placed end to end they would reach one and a half times around the world, and they were worth more money than all the gold and silver dug out of any one state in this Union during the same year. Imagine, if you can, all those eggs rolled into one big egg, and then imagine a hen big enough to be the author thereof. With one scratch of her foot she could excavate enough dirt to make a basement for a City National Bank building, and throw the dirt across the Missouri river.

Ever hear of "King Cotton?" Texas is the greatest cotton producing state, yet her 1910 crop of cotton was not worth as much as Nebraska's corn and wheat crop by \$30,000,000. The total tobacco production of the Nation last year wasn't worth as much as last year's crop of Nebraska corn, and it wasn't our best crop year, either. Pennsylvania is the greatest coal producing state, but her coal output last year was not worth as much at the mine mouth as the grain, hay and live stock of Nebraska on the farmsteads. All the gold dug from Uncle Sam's soil in 1910 would not pay for Nebraska corn and wheat in 1910. And mind you, this with less than one-half her fertile soil under cultivation, and that less than half yet intensely farmed so as to produce the maximum results.

Let us load upon freight cars all the grain, grasses, live stock, butter, eggs, poultry, potatoes and sugar beets produced in Nebraska in 1910. Would they make a train long enough to reach from Omaha to Sidney? Yes, and then some. From Omaha to Salt Lake? Yes, and a bit further. From Omaha to San Francisco? Yes, and a little further. Well, how long? In order to get a main line track long enough to hold that train it would be necessary to bridge the Atlantic ocean, the English channel and the Baltic sea. With the caboose of that train in St. Petersburg, the conductor who carried orders to the engineer in the cab would have to walk and walk and walk until he reached an engine that projected out into the Pacific ocean fourteen hundred miles west of San Francisco, for that train would be ten thousand and four miles long.

In 1910 Nebraska, with a population of less than a million and a half of people, produced more from her soil than Japan, with forty million people, produced and purchased from other nations. The per capita of agricultural wealth production of Nebraska in 1910 was greater than that of any other state. Her two main cereals, corn and wheat, were worth more than the nation's output of copper; her four main cereals, corn, wheat, oats and rye, were worth more than the nation's output of iron ore; her butter, eggs and poultry were worth practically as much as the nation's output of crude petroleum; her hay output was worth more than Alaska's output of precious metals, and her baby crop worth more than the baby crop of all the other states combined.

You think you know Nebraska? I doubt if there is an editor here who is familiar with the history, the productivity and the resources of his own country. Nebraska a desert? What other state has as many miles of rivers within her borders? Nebraska has over 800 miles of Platte river wholly within her confines. And with the Blue, the Nemahas, the Loups, Pine, Stinking Water, Republican, Salt, and creeks too numerous to mention, she possesses an undeveloped water power that would rival Niagara. She ought to be manufacturing from Nebraska grown raw material every finished product that humanity eats and wears, and pretty near everything that humanity uses, using Nebraska

power and paying wages to Nebraska workers.

I claim that Nebraska, with more to advertise than any other state, is the least-known state—at home or abroad—of any state in the Union. Kansas spends \$30,000 a year in publicity and immigration work; Missouri spends \$40,000 a year; Colorado spends \$15,000 a year; Washington and Oregon spend \$25,000 a year each; California spends a quarter of a million—Nebraska doesn't spend a dollar. Any wonder thousands pass us by to invest in the higher priced and less productive lands of the northwest? Any wonder that Canada is getting some of Nebraska's best? Any wonder that the Nebraskan in New York who undertakes to tell some of the real facts about Nebraska is laughed at and set down as a chronic prevaricator?

Time that we made Nebraska known to all the world! High time that we acquaint the world with the marvelous improvement that has been wrought within her borders in less than a generation! High time that we let the world know that right here in the heart of the "Great American Desert" we have built in less than a generation a state that stands at the front in education, that stands at the front in wealth production per capita, that stands at the front in development of manufacturing, that leads all other states in civic reforms and accomplishes them without revolution and wholly by thoughtful study and intelligent progress.

But before we can adequately tell the world we must first know Nebraska. So this is the message I bring you, fellow Nebraskans: Let us study Nebraska, study her history, her resources and her possibilities, to the end that we may be fitted to advertise our beloved state to all the world for what she is—the most productive, progressive and pushing; the most enterprising, energetic and enthusiastic; the most intelligent, industrious and inspiring—in short, the greatest area of productivity peopled by the most progressive people in all the world.

This toast I give to you:
"Nebraska, the producer of the best of all things; of the things the possessor of least; a state without a 'bread line' or a child sent breakfastless to school; with a future unlimited and a past to be proud of; a state of homes and schools and churches—her greater development our duty, her bounty our sufficient reward."

O, the glories of Nebraska! With her fields of waving grain; With their promises of plenty; wealth the summer sun and rain; Rippling wheat fast turning yellow for the harvest soon to raise; Rustling cornfields and breezes making sweetest melody; Billowed fields of scented clover curing Sunny slopes, and shaded valleys with the clear streams rippling through—Over all is peace and comfort, not a trace of sorrow's pain.

And to live in Old Nebraska is the greatest joy of all.

O, the glories of Nebraska! Far abroad her stories are spread; From the measure of her harvests are the distant lands made glad; Here within her wide domains, wrought from stretch of desert lands, Is the greatest work of progress ever wrought by human hands.

Here, within a generation, we have built, strong and great, On a deep and sure foundation, a progressive, happy state. And at even, resting, listening to the children's laughing call— Say, just living in Nebraska is the greatest joy of all.

O, the glories of Nebraska! Like an Eden Garden spread; Filled with nature's fruits and flowers, and a blue sky overhead; Like the "Land of Milk and Honey" that the Jewish spies Said that "Land of old Jordan" to delight their wondering eyes; Like old Canaan seen by Moses as he viewed the promised land; With that country's richest treasures laid before him—and some more.

O, the glories of Nebraska! Sing her praises loud and free! Wondrous past that's but the promise of the greatness yet to be; Pouring forth her wealth of products as from Plenty's golden horn; Filling all the world's store-houses with her crops of wheat and corn. Spread between the mighty river and the mountains of the west, Fairest land in all creation, by the God of boundless life; And from rose of dawn to dawn till the long, gray shadows fall Just to live in Old Nebraska is the greatest joy of all.

Honorary Degrees Conferred.
St. Paul, Minn.—The honorary degree of doctor of laws was conferred by McAllister college on George L. Robinson, now of McCormick Theological seminary, Chicago, formerly instructor in Beirut, Persia, and a Palestine explorer, and on Rev. Albert B. Marshall, D. D. president of the Presbyterian Theological seminary in Omaha.

Unitarians Condemn Lorimer.
Boston, Mass.—National politics, as voiced in the action of the United States senate on the Lorimer resolution, figured in the principal meeting on Monday of the anniversary week observance here by the Unitarians and affiliated societies. A resolution opposing the re-election of United States Senator Duncan U. Fletcher of Florida as vice president of the American Unitarian association because of his vote on the Lorimer case received the indorsement of members of the ministerial union.

Population of England.
London.—Provisional figures returned by the census officers give the population of England and Wales this year as 36,075,269, compared with 32,527,843 in 1901. While most of the cities and counties show an increase there are many cases, particularly in Wales, where there has been actual decrease. Greater London's population has increased to 7,252,282 from 6,581,402 in 1901. The county of London including the city of London and the boroughs immediately about it, shows a decrease.

Rate Advances Scored.
Washington.—Proposed advances in the freight rates on grain and grain products from North Dakota and South Dakota producing points to such primary grain centers as Minneapolis, Duluth, Milwaukee and Chicago are held by the Interstate Commerce commission, in a decision, to be unreasonable. The commission held, however, that the former established rates from points of origin to these destinations should be restored, except in instances of bona fide error in tariffs.

EXCUSE FOR HIS BLUNDERING

Ideal Waiter, True to the End, Had
Been Working Under Pretty
Heavy Handicap.

He was an immaculate servant. To watch him serve a salad was to watch an artist at work. To hear his subdued accents was a lesson in the art of voice-production. He never slipped, he never smiled, and his mutton-chop whiskers marked him as one of the old and faithful stock. But one evening, to the surprise of his master, he showed unaccountable signs of nervousness. When the chicken came on he confused it with the pheasant. He served everything in the wrong order, made blunder after blunder, and put a final touch to his shame by upsetting the salt over the only superstitious member of the party. Then, at last, when the ladies had retired to the drawing room, he touched his master on the shoulder. "I beg your pardon, sir," he said in a respectful undertone, "but could you manage to spare me now? My house is on fire."

Publicity Law Badly Needed.

Connecticut, District of Columbia, Kansas, Maine, Maryland, Michigan, Mississippi, New Jersey, New York, Rhode Island and Vermont, have laws which provide specifically for the reporting of tuberculosis and which make provision for the proper registration of living cases of this disease. In fourteen other states, laws or regulations of the state boards of health require that tuberculosis be reported simply as one of a list of infectious diseases. The following 28 states and territories have no provision whatever for the reporting or registration of tuberculosis cases:—Arizona, Alaska, Arkansas, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Kentucky, Louisiana, Missouri, Montana, Nevada, New Hampshire, New Mexico, North Carolina, Ohio, Oklahoma, Philippine Islands, Porto Rico, South Carolina, South Dakota, Texas, Virginia, West Virginia and Wyoming.

Kissing Breach of Peace.
The better half of a respected citizen of New Jersey recently had the temerity to hale her lord and master before the court on a charge of having kissed her against her will. For this heinous offense this shameless Jersey benedict was bonded over in \$100 bail to keep the peace, and, moreover, was warned by the judge never again to kiss his wife without first obtaining her consent in due form. If he is any kind of a man, probably he will never want to kiss her again.—Washington Herald.

An Unlabeled Hero.
Here is a niche in the Hall of Fame for Seth A. Eaton, a rural mail carrier from the Middleboro postoffice, who, surrounded by woodland fire, his horse lying on the ground stifled with smoke, his own hair singed, his hat burned and one side of his face and hands blistered, was still mindful of duty and saved the mail he was carrying by burying it in the sand, before he fought through the line of fire to safety. Not all the heroes tread the battlefields.—Fall River Herald.

Hadn't the Material.
"I really never saw such an impudent man as that Mr. De Borrows," said Miss Wratby. "He actually had the audacity to ask me the other night how I managed to get that lovely tinge of auburn in my hair!"

"Really? Well, why didn't you box his ears?" asked Miss Slimm.

"Why, I only had my Easter hat box handy, and that wasn't big enough," said Miss Wratby.—Harper's Weekly.

How can a man expect his wife to be interested in business when half the time he doesn't know the color of her last new dress?

Charity is too often charily dispensed.
COMES A TIME
When Coffee Shows What It Has Been Doing.

"Of late years coffee has disagreed with me," writes a matron from Rome, N. Y.

"Its lightest punishment being to make me 'log' and dizzy, and it seemed to thicken up my blood."

"The heaviest was when it upset my stomach completely, destroying my appetite and making me nervous and irritable, and sent me to my bed. After one of these attacks, in which I nearly lost my life, I concluded to quit the coffee and try Postum."

"It went right to the spot! I found it not only a most palatable and refreshing beverage, but a food as well. All my ailments, the 'loginess' and dizziness, the unsatisfactory condition of my blood, my nervousness and irritability disappeared in short order and my sorely afflicted stomach began quickly to recover. I began to regain and have steadily continued until now. Have a good appetite and am rejoicing in sound health which I owe to the use of Postum." Name given by Postum Co., Battle Creek, Mich.

Read the little book "The Road to Wellville," in pkgs. "There's a reason." Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

THEIR BUSINESS.

Smith (at matrimonial agent's, looking for a wife). In this picture she appears as a woman with a high temper. "Fraid we couldn't get along together."

Agent.—That's all right, sir. With every wife we furnish complete directions for getting along with her.

DOCTOR PRESCRIBES CUTICURA REMEDIES

"I wish to let you know of a couple of recent cures which I have made by the use of the Cuticura Remedies. Last August, Mr. — of this city came to my office, troubled with a severe skin eruption. It was dermatitis in its worst form. It started with a slight eruption and would affect most parts of his body, thighs, elbows, chest, back and abdomen—and would terminate in little pustules. The itching and burning was dreadful and he would almost tear his skin apart, trying to get relief. I recommended all the various treatments I could think of and he spent about fifteen dollars on prescriptions, but nothing seemed to help him."

"In the meantime my wife, who was continually suffering with a slight skin trouble and who had been trying different prescriptions and methods with my assistance, told me she was going to get some of the Cuticura Remedies and give them a fair trial. But as I did not know much about Cuticura at that time I was doubtful whether it would help her. Her skin would thicken, break and bleed, especially on the fingers, wrists and arms. I could do nothing to relieve her permanently. When she first applied the warm baths of Cuticura Soap and applications of Cuticura Ointment she saw a decided improvement and in a few days she was completely cured."

"I lost no time in recommending the Cuticura Remedies to Mr. —, and this was two months ago. I told him to wash with warm baths of the Cuticura Soap and to apply the Cuticura Ointment generously. Believe me, from the very first day's use of the Cuticura Remedies he was greatly relieved and today he is completely cured through their use. I have great faith in the Cuticura Remedies and shall always have a good word for them now that I am convinced of their wonderful merits." (Signed) R. L. Whitehead, M. D., 169 Dartmouth St., Boston, Mass., July 22, 1910.

That Midget Be Inducement.
It was during the hot spell and on the hottest night of the week that a South side teacher took a number of her little charges for a car ride. In the Public Square they piled out and were marched to the telescope set up by a man who vends peeps at the heavenly bodies at so much per peep. The children were told that they might look at the moon, a little lecture accompanying the lesson that the moon was a cold body.

"Teacher," spoke up one little South sider, "when you look through the glass does your face get cold?"—Cleveland Leader.

His Instinct.
"I see the family dog slinking out of the room. What's the matter with him?"

"Prescience. Presently there will be a tremendous family row on."

"But how did the dog know that?"

"Well, so to speak, his nose is something of a storm center."

First and Second Choice.
Uncle-Johnny, wouldn't you like to be an angel?"

Johnny.—Not as long as there's a show for me to become a baseball pitcher or a circus clown.

JAMES BRAID SAYS:
No Athlete can do himself justice if his feet hurt. Many thousands are using daily, abroad and in this country, Allen's Foot-Ease, the antiseptic powder that rubs into the shoes. All the prominent Golfers and Tennis Players at Augusta, Pinehurst and Palm Beach got much satisfaction from its use this Spring. It gives a restfulness and a springy feeling that makes you forget you have feet. Allen's Foot-Ease is the greatest comfort discovery of the age and so easy to use. It prevents soreness, blisters or pulling and gives rest from tired, tender or swollen feet. Seventeen years before the public, over 30,000 testimonials. Don't go on your vacation without a package of Allen's Foot-Ease. Sold everywhere, 25c. Don't accept any substitute. Sample sent FREE. Address: Allen S. Olmsted, Le Roy, N. Y.

PATENTS. Fortunes are made in patents. I'm one myself from time to time. They are genuine, true, and full of human interest.
