

**ORNAMENTS STATION GROUNDS.**

Officers of several of the big railroad systems are considering plans to induce agents and others concerned to make stronger efforts to beautify station grounds and buildings. During the past year or two particular attention has been given to making the stations more attractive. The Burlington has accomplished a great deal in this direction. Last year it issued orders to all employees that the grounds and buildings adjacent to the company's right-of-way must present a neat and attractive appearance. The company's gardener gave his especial attention to beautifying the suburban stations for forty miles out of Chicago. Before last summer closed, switch shanties, tool houses, yard offices and round houses had been prettily covered with running vines and the grounds about each building converted into fine lawns over which shrubbery had been planted. During the coming spring and summer this work will be greatly extended, and in time the Burlington expects to have the most ornamental station grounds in the west.
