ALUMNI ADDRESS.

Rev. R. L. Marsh, ’84, speaks on “The Ground of Fellowship.” Alumni Banquet, Phi Beta Kappa initiation—day by day.

The annual alumni address was in attendance and that university who had achieved success in their calling may be secured to speak to their fellow graduates. The address for this year was given in University Soldiers’ Memorial Hall last night. There was no as large an audience present as might have been desired, but those who did attend were given a rare treat. The exercises opened with two organ selections by Director Kimball. This is the first time the alumni have had the opportunity of hearing their organ in its new quarters.

The speaker of the evening, Reverend E. Marsh of Burlington, Iowa, and a graduate in the class of ’84, was then introduced by Frank H. Woods, present President of the Alumni Association.

Mr. Marsh took for his subject “The Grounds of Fellowship.” He compared the experiences of the country boy who travels for the first time to the suburbs and the human race as it has come to the realization of its place in the universe. In other words, how human society has for the first time come to feel in the scientific sense at home.

The world has three great teachers: science, religion, and practical experience. Practical experience has been the only means of making the same truths that religion and science have been teaching. Science has enlarged our world picture. It has in the last analysis emphasized the importance of the individual. Science has taught the utility of all things. Religion taught us the same truths long before they were deified and shaped by the mind of the Church.

Religion is now at least beginning to discern between essentials and non-essentials. It is coming to a realization that its own effects have been magnified the importance of the individual. Science has taught the utility of all things. Religion taught us the same truths long before they were deified and shaped by the mind of the Church.

Religion is now at least beginning to discern between essentials and non-essentials. It is coming to a realization that its own effects have been magnified the importance of the individual.
