STERLING H. McCAW - Managing Editor
Asst. Manager
GEORGE P. SHIDLER - Athletic Editor

REPORTERS:
R. C. Pollard, Clifton Carter,
Norris Hoge, R. T. Hill,
J. R. Farney, Cliff Crooks,
John A. Wilson, Linn M. Huntington

The subscription price of the Daily Nebraskan is \$2 for the college year with a regular delivery before chapel each day. Notices, communications, and other matter intended for publication, must be handed in at the Nebraskan office before 7 p. m., or mailed to the editor before 3 p. m., of the day previous to that day on which they are expected to appear.

Subscriptions may be left at the Nebraskan office, at the Co-Op., or with Business Manager. Subscribers will confer a favor by reporting promptly at this office any failure to receive the paper.

All changes in advertising matter must be in the office by 3 p. m. on the day previous to that on which they are to appear.

Address all communications to the Daily Nebraskan, 134 N. 11th St., Lincoln, Nebraska.

Telephone 479.

Entered at the post office at Lincoln, Neb., as second class mail matter.

Through the carelessness of the compositor who made up the forms of the Daily yesterday, some matter of a political nature found its way into the columns of the paper. The error was not discovered in time to remedy it before the paper was distributed.

This is a matter greatly to be regretted by the management of the paper, but under the circumstances it could hardly have been avoided. The matter for the paper was left in the hands of the compositor who contrary to specific directions, used some plate matter of a political nature which had been used in the Nebraska Post. The explanation in another place by the Nebraska Post Company is sufficient to clear the paper of any intentional misuse of its columns.

A COMMUNICATION.

To the Editor of the Daily Nebraskan:

In the case of all institutions it very often happens that experience subsequent to their organization suggests improvements, without in the least reflecting upon the wisdom of the organizers. Your correspondent now wishes to point out a defect in an institution within the University and, after briefly mentioning the effects, make a proposition for the amelioration of the existing state of affairs.

It is impossible for anyone, unless his head is clogged up by a cold that approaches the very limit in severity to enter the Mechanic Arts hall without becoming violently aware of the existence of a Domestic Science department. Since modesty is a trait always admired in the small boy it appears that it would be equally commendable when applied to the Domestic Science laboratories. Of course, it is just as impossible for the inexperienced chef to retain the effects of boiling cabbage or onions within the walls of the kitchen, as it is for the freshman engineer to follow the chalk-line with his saw.

However these odiferous effects rise as invisibly as hydrogen, greatly to the inconvenience of the industrious engineers whose workrooms are upstairs. In accordance with their origin these "effects" inspire the laborer either with a melancholy premonition of the terrible problems of life, or the happy anticipation of Thanksgiving at home; both of which

results are detrimental to efficiency.

Now it appears to be feasible to take advantage of the ambitious property of kitchen odors and place the kitchen immediately under the roof, following the example of most up-to-date hotels. This could meet with no objections so long as telegraphic communication with Mars remains a thing merely to be read about.

Furthermore, anyone who is familiar with Mechanic Arts hall knows that there is about five times as much space available on the fourth floor as Domestic Science laboratories now occupy in the basement the only reason for the retention in the basement being apparently that our chivalrous spirit does not permit us to require the ladies to mount three flights of stairs. This emergency, however, can be readily and effectually met by installing an elevator in the air shaft to the right of the hall at the basement entrance. The design of such an elevator is a matter of a few passes on the ubiquitous sliderule and a few hours' "pushing the pencil" in the drafting room. The elevator can then be built in the shops and all the necessary motive power can be obtained from the test engines whose useful energy is at present being wasted through brakes.

In conclusion there remains only that the proper authorities give the word and the hoped for results will be realized.

Consulting Engineer.

AN EXPLANATION.

Through the carelessness of an employee who has since been discharged, some political plate matter was used in yesterday's issue of the Daily. This man who made up the forms for the Daily had been given definite instructions not to use any matter of this kind but did in direct opposition to these instructions. We feel that this explanation is due, as the editor of the paper was in no way responsible for the appearance of this matter.

THE NEBRASKA POST CO.

COLLEGE NOTES.

The Engineering Society of Leland Stanford is formulating plans whereby it may be enabled to keep a record of all the work which its graduates are doing in the different fields of engineering effort.

The University of Michigan has property valued at two million dollars.

Students of Yale are called upon for \$8 for subscriptions for the athletic activities of that institution.

Columbia has a total enrollment of 1,193 students.

The University of California has determined to send their football coach, Frank Simpson, to eastern colleges for the remainder of the season to study later methods in use there.

Yale is complaining of a decided lack of debating spirit.

The alumni commissioned officers of the University of California intend to give a military ball some time in the future.

The young ladies of the University of California are now in the midst of the basketball season. They are having their courts repaired and built around with bleachers and fences, for match games.

The University of Minnesota is at

present organizing an orchestra.

The Glee club of Minnesota has finally been organized for this season's work.

Cornell is in the midst of an interesting tennis tournament.

The Juniors of Leland Stanford have been planning for a considerable length of time to have an outdoor entertainment called the "Plug Ugly," were the class that will be dedicated.

Cornell is having additions and improvements made on its boat house.

The class football teams of eastern colleges have intercollegiate games.

A Turkey supper at St. Paul's church Thursday evening, 35 cents. Served from 5-30 on. Students specially invited.

Friends are often sent to the wrong address because students have removed, without reporting the change at the Registrar's office.
