AN ARTISTIC POSTER FREE.

Send us your name on a postal card and we will mail to you free a few brilliantly colored Washburn poster (size 12x18 inches). This poster is the creation of the Viking's Head Studio, and has been pronounced exceedingly bright and clever. It represents a pastoral scene, a rabbit enamored of the music of a mandolin. Write today, this offer may not appear again.

For Students: those exquisite panels and ovals at Bass' Photographic Studio, 1026 O Street.

The senior girl's caps have arrived. Senior girls should see the committee regarding them before Thursday.

Have you seen Fleming's line of University pins and novelties. He has a very complete line. 1211 O street.

For heating use our Lexington Lump at \$5.00 a ton. Its a winner. Try a ton. Union Fuel Co., 1014 O St.

Minnesota's basket ball men are getting into training for the season. Several games will be scheduled with other colleges.

Messrs Crane and Senger are back from the western part of the state where they have been spending a few days on their claims.

The department of botany has just received a fine copy of Humboldt's "Essais sur la Geographie des Plantes" It is rare and valuable work.

A new regulation of Dean Reese in regard to tardiness has made the members of the law class more prompt in attendance.

The Yale News recently published a complete record of the standing of each football player for that institution and also for Princeton.

We have the very latest style in shoes for University girls. The box stitch, the rope stitch and terraced welt. Call and see them. Webster & Rogers 1043 O st.

Cora Smith, '95 was a caller at the department of botany on Monday. She spent the summer in the east and reports having a good visit with Miss Edna Hyatt, former botanical artist in the University. Miss Hyatt is in New York, engaged in making drawings for several scientific works which are soon to appear.

Professor D. A. Saunders, '93, of Brookings, South Dakota, has just published a paper on the algae collected in Alaska by the "Harriman Expedition" in 1899. The paper is illustrated with many excellent plates. It is one of the most notable contributions to the knowledge of the seaweeds of the Pacific ocean which has appeared in many years.

DAILY NEBRASKAN STOCK READY.

Subscribers to the stock in the Hesperian Publishing Co., may get the same at the office at 134 North Eleventh street.

COLLEGE NOTES.

Iowa will have a new medical building which, it is estimated, will cost at least \$300,000. It will be one of the most valuable additions to that university.

The Michigan Daily News in a recent issue devoted an entire extra page to the college songs and yells.

Minnesota has a Women's league which has recently closed its lists for membership. The club is for the purpose of promulgating friendship and personal contact among the young lady students and the wives of faculty members.

The Sophomores of Cornell have won in the annual rush of that class with the Freshman. This decided the lower class championship.

Leland Stanford University is making plans for the formation of an athletic association.

Several of the eastern college papers have been recently publishing excellent plates of their respective football teams.

THE PANSY FAMILY.

There is a funny old story about the pansy which many children know, but many, again do not. The pansy has five petals and five sepals. In all pansies two of the petals are of plain color and three are gay with stripes and spots of bright color. The two plain petals have but one sepal between them, while the two smallest, or the gay, petals, have a sepal each, and the one large petal has two sepals.

As the story goes, the pansy represents a family—a mother, two daughters and two step-daughters. The mother is very cross and cruel to her stepdaughters, obliges them both to sit on one chair and wear homely dresses, while her daughters have a chair and very gay dresses indeed. But why doesn't the father object to such treatment of his daughters? The question is, can you find the father? He is at home. Oh, yes. But you will have to tear the house down, taking out the wife and children, to find him. He is a little bit of a man, with a white wrapper on and a night cap. But, poor man, he is sick, and, if you look closely, you will find that he sits with his hands on his knees, and a look of despair on his face and his feet in a tub of hot water.

A WORD TO THE THIN.

A great deal has been written by physicians for the benefit of fat persons who desire to reduce their weight, but the discontented at the other end of the scale, who long for more covering on their bones, are very generally left to discover for themselves, if they can, a means to gain their end.

Thinness, like obesity, may be due to some constitutional defect in nutrition, often running in the family, or it may be a symptom of chronic disease. A gradual loss of flesh, occurring without any apparent cause, in one who has been in previous good condition, is a suspicious sign, and should lead one to seek a careful medical examination, so that the cause, whatever it may be, may be discovered and corrected while there is time.

Other persons have always been thin, while seeming in other respects to be in fair health. To such a few simple directions may be of service.

Thin persons are very apt to be nervously strung, fretting over trifles and borrowing trouble on every possible occasion. They sleep poorly, dream much, and are always in a state of unrest in the waking hours. They are not uncommonly rather large eaters, but their food is for the most part meat, and is bolted with very little mastication.

It will be of little use to modify the diet in such cases unless the nervousness is treated at the same time. The person must avoid all things which stimulate the nervous system, exciting novels and theatrical pieces, the use of tobacco, coffee, tea, and so forth. The diet should consist largely of articles of a fattening nature, such as starchy vegetables, sweets, butter and fat meats. Meals should be small but frequent. A certain amount of nourishment taken in six portions will make more flesh than the same amount divided into three meals.

Chocolate may be substituted for the morning tea or coffee. Water should be drunk in large quantities, other than meal-times, but fluid should be taken sparingly with the meals. Codliver oil, if it does not nauseate, should be taken regularly. If it cannot be tolerated, cream may be substituted.

The night hours of sleep should be long, and a nap may be taken with advantage in the middle of the day.

POWER LOOM.

It is reported that an English syndicate has purchased from the inventor a new method of manufacturing Oriental carpets. The apparatus is called the Hellenachen power loom, and the claim is made that it has a capacity of thirty-five square yards per day, while by hand it takes half a day to make a square yard. It is stated that the material is equal to the finest Oriental productions. A peculiarity of its construction is that a shuttle is dispensed with, thus permitting the utilization of low-grade material hitherto considered useless. Another novel feature connected with it is the process of coloring yarns, which, in view of its simple character, it is thought may be adopted in other branches of textile manufacture.

MOTOR TRACTION ENGINE.

An oil engine, which has recently attracted considerable attention abroad, and which was invented in Germany, is said to be the counterpart of an engine brought out in this country some time since by Richard Dudgeon, with the exception that Dudgeon used steam as a motive power, while the new engine uses oil vapor. It consists of a friction roller, working on the inside of a larger wheel. Its tractive power is reported as being very great.
