SHERMAN GRAVEL

Concerning which so much has been said, is a disintegrated mica granite. It has been chemically prepared by the great fires of nature in prehistoric days, so as to gradually weld together with all the flexibility of asphalt and the durability of granite. This gravel is quarried at Sherman, Wyo., on the Union Pacific, and used on that road for ballast. Travellers over the Union Pacific therefore escape the dust and dirt which makes a trip over the lines of its less fortunate rivals so annoying. NO DUST. NO DIRT. NO JARRING. SMOOTH AND EASY RIDING. For full information call on or address E. B. SLOSSON, Agent.

A GLAD THANKSGIVING,

WE trust that all the people will, on Thursday next, find time for a day of rest and Thanksgiving for the good things of life. Our great Thanksgiving Sale was prompted by desire to give substantial expression to our appreciation to our host of patrons and to give each and all an opportunity to lay in a winter's supply of Shoes and Clothing at genuine money saving prices.
