

# The Daily Nebraskan.

VOL. 2. NO. 3.

LINCOLN, NEBRASKA, FRIDAY, SEPTEMBER 19, 1902.

PRICE THREE CENTS.

## THEY'RE HARD AT WORK

### Foot Ball Men Go Through Heavier Training—Some Team Practice Preparatory to First Game.

Activities on the gridiron are increasing in an encouraging manner, and the prospects for a winning team become better every day. About twenty-five old and new men appeared for practice last evening, and after a little preliminary exercise in bucking against the dummy and falling on the ball, the men were lined up in two squads for practice work. Westover and Drain did the coaching and the men were drilled in bucking the line and kicking the ball. A picked team then lined up for signal practice and general team work. Hubbard appeared at center, Benedict played quarter, Mickle full, and Eager and Bell played the halves. Benedict's kicking is an encouraging feature of the practice, and his playing will be a valuable addition to the team. Bell and Eager are experienced halves and will no doubt be called upon to play the part in tomorrow's games. Mickle and Hubbard both show up well and are both men of reputation in football. Moloney, Cotton, Hewitt, Myer, Kaner and others worked out in the line.

The football season will begin in earnest tomorrow when a picked team will contest for honors with the Lincoln high school, and also with an Alumni team. The grounds have been placed in an excellent condition and are better than ever before. A high wire fence will keep the crowd from interfering with the game and the grand stand is ready to accommodate the crowd.

Captain Westover has given an evidence of his ingenuity in the construction of serviceable goals that are a great improvement to the field. Come out tomorrow and encourage the men in the forming of a team that will even be an improvement upon the victorious squad of '01.

### Foot Ball Season Tickets.

The athletic board is offering season tickets good for the seven games on the home ground for \$2.50.

The total amount of the combined admission prices for these games is \$4.25, so that the saving by buying a season ticket is well worth the outlay of \$2.50 at the start. These tickets may be had from J. I. Wyer, chairman of the football committee, at the library and will be offered at above price until September 27th, when they will be withdrawn.

Fred Kelly, '02, is assistant principal of the schools at Syracuse.

Ernest A. Bessey, '96, at last accounts had reached Bokhara, in Turkestan, in his expedition for the United States Department of Agriculture.

## THE ANNUAL UNIVERSITY OPENING ADDRESS

WILL BE DELIVERED BY

### Chancellor E. Benjamin Andrews

AT MEMORIAL HALL.

TOMORROW MORNING. - - - 10 O'CLOCK.

### Dr. White Returns.

Dr. White of the chemistry department, is back at the university after a fourteen months' stay abroad. He returned to America in August and spent the remainder of the summer visiting friends in the east. The summer of 1901 was spent mainly in travel, the places visited being chiefly university towns in Holland, Belgium, France and Germany. Dr. White studied especially the equipment and arrangement of laboratories at these institutions. In the course of the summer he took a three weeks' tramp in Switzerland and afterward attended a six weeks' summer school in the Ostwald laboratory at Leipzig. He then went to Zurich and entered the Federal Polytechnical Institute, where he attended lectures under Professors Lorentz, Treadwell, Bamberger, Constam and Werner. In conjunction with Professor Constam he carried on investigations upon the physical chemical properties of bases of the pyridine group.

During the second semester Dr. White had charge of a class in physical chemistry. The spring vacation of 1902 was spent among the museums and other attractions of Italy, including those of Naples and Milan.

A shipment of glassware has just been received by the chemistry department and was placed in the store room in the main hall yesterday afternoon. It came direct from Berlin and is a very valuable lot of goods, worth in value something over \$4,100. The glass came packed in seventeen boxes and all in very good shape. A force of men was at work the greater part of the afternoon and getting it in out of the weather.

Mr. Jay Barret of the Nebraska Historical Society, received eight thousand pounds of material from Brownville, Neb., yesterday, as a result of his recent trips to that place. The material consisted largely of old books and rare pamphlets relating to early Nebraska history and was presented to the society by ex-Governor Robt W. Furnas.

Marton Hiltner, '98, is spending a week's vacation at his home in this city. He has been employed as chemist for a large mining company at Deadwood, S. D. He will return to the same position after his few days' sojourn here.

### New Professor in Medicine.

The new department of medicine has been extremely fortunate in obtaining the services of Dr. Ralph Lillie as instructor in physiology. Dr. Lillie is another one of the eastern men who are finding their way into western institutions of learning. He was granted the degree of B. A. at the University of Toronto, and a short time later he obtained the doctors degree in science at the University of Chicago.

Since completing his student work leading to degrees Dr. Lillie has been engaged as instructor at the Marine Biological Laboratory at Woods Holl, Mass., at the University of Michigan and at Harvard Medical School.

### Conservatory Notes.

Registration still continues at the school of music. Two hundred students are enrolled, and almost all of them new students.

Only two rooms are left in the home department, where Miss Carrie Barbour continues as preceptress. Miss Barbour has just returned from a trip to Wyoming.

Mr. Pftizner of Berlin, is director of the pianoforte department in place of Mr. Eames who is spending the year in Europe.

Miss Arnold, a new addition to the faculty, is also an instructor in the piano department. She is a pupil of Leschtizky of Vienna.

Mr. Randolph, who resigned last spring, is teaching in New York City.

The campus in general has been one of the most beautiful spots about the city during the summer. The decorative beds of plants were the most marked improvement and did much to increase the general appearance of the campus.

A new walk has been laid in front of the chemistry building.

Until a new commandant arrives at the university Major Burke M. Hall of the cadet battalion will be acting commanding officer. He will be in charge of the organization of the battalion and will attend to business connected with the department.

Miss Daisy Bonnell, who has been one of the fellows in Botany for the past two years, has resigned in order to accept a good position in the Omaha high school.

## STUDENTS ARE SLOW

### Registration of Last Year's Third Day Ahead—Suggested Cause of Light Matriculation—Future Lawyers.

The same continuous line of students passed before the desks of the registering clerks all day yesterday. The work is being minimized and abridged as carefully as possible and is therefore dispatched with little confusion. The organization of the new office force and the new way of registering is due in most part to the untiring efforts of Mr. Shedd, the registrar.

The comparative results of this and last year's registration on the third day is as follows:

	1901	1902
Matriculations	304	285
3rd day's matriculations	102	93
Registrations	673	597
3rd day's registrations	331	309

It will be observed that the numbers of the two years in comparison show a slight advantage with last year. The students are either slow about registering or will not come up to the mark in point of attendance with last year. It is reported that the largest percentage of new students is from the city schools. It seems that since the advertisement of the increased entrance requirements there is more hesitation about entering the university from those districts where there are not fully accredited high schools. Previous to registration week the indications pointed to the largest attendance in the history of the university, but results during the last three days are beginning to cast a different light on the real state of affairs.

The law school registration must also be account for as it is for the first time opened to registration with the regular academic students. Fifty-six registration cards have been issued by Dean Reese up to the present time. As the lawyers have not registered so early heretofore some slight delay may easily be accounted for in that department.

### Course in Forestry.

In answer to a number of inquiries, it may be stated authoritatively that ordinary graduates of the general scientific and the biological groups can complete the course in forestry after two additional years of study. By judicious selection of subjects for election the students in the general scientific group can secure the forestry degree one year after obtaining his degree of Bachelor of Science. It is the intention of the faculty to allow a few necessary substitutions of studies for the benefit of graduates who wish to enter the work in forestry. The demand for trained men is so great that it is desirable to meet it as early as possible.

Miss Kate Heacock of Falls City is a new Phi Phi pledge.
