LINCOLN, NEBRASKA, WEDNESDAY, OCTOBER 22, 1902.

PRICE THREE CENTS.

TO PLAY MISSOURI NEXT

Nebraska Players Will Go South on Friday—A Rate to St. Joseph Has Been Made.

The next game of the season will be played Saturday with the Missouri Tigers at St. Joseph. The team will probably leave Friday over the Missouri Pacific. As yet no definite arrangements have been made with the railroads in regard to an excursion. The Missouri Pacific is contemplating making a rate, and so far it stands at \$2.95 for the round trip, providing a party of 200 can be obtained. In case a lower rate is secured there will probably be a large number of rooters and supporters of the team ready to accompany them.

The Cornhuskers have little to fear from the Tigers in next Saturday's game. Judging from the score rolled up against them by the Redskins last Saturday they don't know any more about football than they did last year. The Haskell Indians can play football, as everybody realizes that saw the game last Thanksgiving day, but it seems only reasonable that Missouri should be able to make some kind of a showing against them. It took the Indians just fifty minutes of easy playing to defeat them 40 to 0, and with the memory of their recent victory fresh in mind, the Cornhuskers should be able to do as well or better. The Missourians lack in team work and although much was expected of them in the way of punting, they have failed to show any ability in that line. They fumble often and are slow in passing the ball. Kirk, who plays full back is the best kicker on the team. During the Indian game he received injuries that compelled him to retire. Maupin and Ardinger did the work after that, but failed to make a success of it.

During the game eighteen Tigers were tried out. Repeated changes were made, not because the men were unable to play their part. Birney, quarter back, is reported to be a good player. Livingston and Taylor, also play well, but are unable to establish a reputation for the whole team.

Saturday's line-up was as follows:
Left end—P. Smith.
Left tackle—Jesse.
Left guard—Hoff, Landon.
Center—Childers.
Right guard—Hayes.
Right tackle—Ellis (capt.), Berk.
Right end—Perry, L. W. Smith.
Quarter back—Birney, Taylor.
Left half—Hoogan, Livingston, Birney, Wolff.
Right half—Ardinger.
Full back—Hoogan, Kirk, Maupin.

Class football teams practice every day at chapel time.

Manager Engel is making preparations for rates to Missouri. A large number have expressed their desire to go, and a low rate is expected.

Short Football Practice.

The teams met for regular practice on the field last night. All of the men appeared and are apparently little the worse for Saturday's encounter. Shedd wears a bandage around his head, but was in the game. Both the teams were photographed by Hamilton and Cornell. After a little preliminary signal practice the varsity lined up against the scrubs team and pushed them at will across the field. The game between the academy team and the Sophomores was postponed.

The team will play the following games before the end of the season.

October 25, University of Missouri—at St. Joseph.

November 1, Haskell Indians—at Omaha.

November 8, University of Kansas—at Lincoln.

November 15, Knox College—at Lincoln.

November 27, Northwestern University—at Lincoln.

Dr. Stein to Students.

Rev. Stein addressed the students at convocation yesterday on "Mysteries." The gist of his remarks were as follows:

We are living in a world of mystery. The little we know, the much we do not know. The element of mystery inheres in all things about us. We could find clearness in physical things, if we could anywhere, but the physical world abounds in mysteries, when we come to study it.

We all believe in the existence of matter and the atomic theory, in gravitation, and the existence of ether, by the undulations of which light is transmitted, but we believe in them because it is the only rational thing to do and not because we comprehend them. The production of dissimilar chemical compounds, from similar constituents, the irregularity of the expansion of water, contrary to universal law, animal existence and the transmission of thought by voice and expression, all offer problems, unsolved and to us unsolvable.

We must accept these things as they are and he who says he will not accept what he can not see, is either a fool or is not sincere, for he does it every day.

There have been mysteries, however, which have been solved, but, as he who can know the mystery of flowers must love them, so he who solves nature's mysteries must have a sympathy with her. Nature will only disclose to a sympathetic ear.

The same perseverance and will power that is necessary in accomplishing all great things must be exercised in the search for truth. In order to understand things we must seek the truth for truth's sake. If we do this we will find mysteries revealing themselves to us as we go through life.

The Lincoln academy football team elected a captain yesterday. Mr. Stein was chosen by a unanimous vote.

The chemistry department will send six students to Ames, Neb., to make a test of sugar beets for the Standard Cattle company.

WORK AT SETTLEMENT

Clubs and Classes Well Organized

—Students Interested in the Work—Future Prospects.

College Settlement work is now fairly well started. Clubs and classes are scheduled for every evening in the week. During the past week a class in arithmetic has been started by Miss Glover. Mr. Harry Posten conducts a class in grammar. A class in history has also been started, with six students at the first meeting. Each class meets for an hour one evening each week. Last evening Miss Lally organized a girls' class in vocal music. Beginning next Monday she will have a class of boys in vocal music, followed by a class of girls each Monday evening.

The sewing school for girls met for the first time last Saturday afternoon. The teachers at the first meeting were Mrs. A. L. Candy, supt.; Miss Lanphear, sec., and Mrs. A. M. Wilson, Mrs. Frankish, Mrs. Prevey and Mrs. Harris, teachers.

The Jane Adams club for older girls meets on Wednesday evening in charge of Mrs. Prevey. The club for little girls meets on Monday evenings in charge of Miss Burlingim.

The Antelope Valley Boy's club shows the most vigorous growth of any feature of the settlement work. At the last meeting, Friday evening, thirteen new members were initiated, making a total membership of forty-seven. The club at the last meeting organized two football teams, one for large boys and one for the small ones, and it is hoped that some one from the university may be secured to coach the teams.

The tendency toward disorder and boisterous play which was evidenced at the beginning is gradually disappearing. The boys' clubs are in charge of Mr. Harry Posten and Russell Moore.

It is expected that a class in drawing will be started this week by Miss Gorder, and a class in clay modeling by Miss Clara Walsh. The class in manual training which it was hoped could be started this fall is still delayed for lack of funds with which to finish the basement. It is hoped that after the lecture given by Miss Stone at the auditorium Oct. 24th, that this work can be immediately pushed forward.

All the work of conducting the clubs and classes has been done gratuitously and the managers feel very much encouraged by the assistance being rendered. A meeting of all the workers and of those interested in the work is called for Saturday afternoon at 4:30 at the settlement house. Mr. Prevey will speak at that time of the aims of settlement work. The aim will be to co-ordinate the different features of the work.

The class in household economics have drawn plans for the construction of cellars.

Church and Club House.

Rev. Benj. J. Fitz, of St. Luke's Episcopal church, acting in the interests of the laity of this diocese, is negotiating for the purchase of the lots immediately east of the church, 1217 T street. As soon as he is able to secure the lots, arrangements will be made for the erection of a new church upon them, and upon the foundations of the present edifice the projected club-house will be built. The building will cost in the neighborhood of \$20,000, as it is the purpose of those supporting the movement to conduct the work on a fitting scale, when once they have undertaken it. The necessary funds will be supplied by wealthy church members of the east, with the co-operation of the laity of Nebraska. It is also hoped that an endowment of some sort will be provided to aid in its support.

Of course it is expected that some difficulty may be experienced in securing the funds, as they will consist entirely of voluntary contributions, but so strong is the backing of the movement that there is no possible doubt as to its success. A splendid lot of furniture, sufficient to furnish the house throughout, has already been provided.

Similar church club-houses have been in operation at the universities of Michigan and West Virginia for some time past and in both cases have proven entirely successful. As at these two places, the house here will have a library, reading-room and such other conveniences as will make it attractive as headquarters for student members of the church. A course of lectures will be instituted and after things have been set in running order efforts will be made toward affiliation with the university.

The Junior academic and Junior law game, which was scheduled for Saturday, was called off because the teams were not yet in condition to enter a game.

The Dramatic club met last week and elected their officers. All the old officers except the vice president, were re-elected. This office is now held by Mr. Filley.

There promises to be quite a time at the Oliver Thursday night. The manager of "All for the Sake of Eliza" has invited the entire football team to this show, and this will be a cause for a glorious time.

About 500 copies of the annual report recently published by the historical society have been wrapped and addressed and are ready to be sent out. Mr. Sheldon is working upon the remaining 500 and these will be mailed in a few days.

A new journal devoted to the subject of forestry has been added to the periodicals in the botanical department. It bears the name "Arboriculture," and contains much valuable and interesting matter. It is published in Chicago.
