VOL. 2. NO. 43.

LINCOLN, NEBRASKA, FRIDAY, NOVEMBER 14, 1902.

PRICE THREE CENTS.

READY FOR KNOXITES

The Team Goes Through Satisfactory Practice—Those Who Will Play—Knox to Bring Rooters.

Three touchdowns and a safety was the final result of last night's practice. The scrubs played hard, fast football, but were unable to successfully cope with the superior strength and skill of their opponents.

The scrubs were given the ball on the varsity's 25-yard line, and by a series of swift plays were able to advance it twenty yards, but lost on downs. For two downs the varsity was unable to advance more than half a yard, but on the third, regaining the ball of a block kicked, Bender made good the five yards, and after that the advance was steady. A fake play near the goal failed to win them anything, but the ball was soon pushed over.

After the second touchdown Briggs and Simodymis went in as halves, Drain played quarter, Wilson a tackle and Johnson the left end.

Johnson had been winning much praise by his success in breaking up left end plays for the scrubs and was rewarded by being tried on the varsity. Eager at left half gained ground for the scrubs in his usual style. Pritchard and Myers played the other half to good advantage. Morris played quarter and Englehart full. Newton has returned to school and took his usual place in the line. On their own 5-yard line the scrubs were pushed over with the ball in their possession, scoring two more points for the varsity.

Thorpe, who received a severe injury in the neck Tuesday night, will be unable to play tomorrow. Johnson will be sub end.

Tobin has developed a carbunkle on his arm and is unable to get out. Eager will be sub halfback.

The ground was in poor condition last night, but a dry sunny day is all that is needed to remedy matters. The Knox men are much heavier than the Cornhuskers, a serious consideration if the field is soft.

The men are working out well, and everything points to a good game tomorrow. The visiting team will arrive some time tonight, and will probably be accompanied by a large band of rooters.

Girls' Basket Ball.

The second team turned the tables on the varsity Wednesday by defeating them by the score of 19 to 13. One substitute was playing with the first team while the second team borrowed Miss Scott from the varsity to play guard. Miss Jansa was back in her old position, and playing in her old time form, rolled up 10 points for her team. Miss Ames of the Freshman team and Miss Ballard of the Senior team took part for the first time in the line-up, and each signalled her de-

but by successful goal making. Much interest is taken in these Wednesday games and a good crowd was on hand to watch the practice.

Dellian Program.

The Dellian society presents the following program, to be rendered Friday evening, November 14, at 8:15 in the old chapel, to which all are most cordially invited:

Piano solo—Selected, Miss Florence Hurst.

Story—"A Day of Reckoning," Miss Clara Glover.

Recitation—"Syracuse," Mr. Frank Beers.

Memory contest conducted by Miss Claire Edholm.

Vocal solo—"Answer," Robyn; Miss Mary Donavan.

MEDICS HEAR DR. ORR

The "Quiz" Followed by a Talk on "Cultured Physicians"—Informal Feed and Toasts Afterward.

The Medical society met last night in M. 301 and listened to a talk by Dr. Orr on "Cultured Physicians." The quiz class met at 7:30 and was interrogated for thirty minutes by L. B. Sturdevant. Music was then furnished by a quartet consisting of Bruce, Bruce, Lindeman and Vasey. At 8 o'clock President Long introduced Dr. Orr.

discuss only the intellectual culture.

He dwelt on the importance of systematizing the immense amount of detail that must be learned in the practice of medicine.

Three faculties should be developed, he said, quick, clear observation; prompt and accurate inference; and ability to record observations and inferences. Natural ability is the greatest blessing to a physician, but if a man has not this he must resort to intense application, which is bound to bring success. The speaker quoted the motto of the late Cushman K. Davis, which is to the effect that all men who have achieved success have worked more than was required of them. As an example of tireless energy he cited Dr. William Pepper of Philadelphia, who has done so much for the University of Pennsylvania. He concluded by repeating a former thought, that success with patients depends not only on ability, but on the sympathetic nature of the physician.

The society then adjourned to one of the laboratories in Nebraska hall, where Dr. Ward dedicated a microtome from Holland, one of the finest of its kind. After the ceremony those present retired to the zoological laboratory and enjoyed a feed given by the medical faculty in the university and Dr. Clapp. A short time was taken up by witty toasts by different ones.

Palladian Program.

The following program will be given at a meeting of the Palladian society on the evening of November 14.

Instrumental solo—

Recitation—Miss Meier.

Story—Miss Warren.

Music—Selected.

Japanese Society—Y. Yamashita.

Reading—Miss Nelson.

Music.

All are invited to attend.

Engineers Discuss Problems.

The engineering society held its regular meeting Wednesday evening and carried out a very interesting program. Papers were read and short talks were made on subjects that are of immediate interest to engineers, and to students of the engineering course.

Mr. Swaboda gave a talk on "Education of the Electrical Engineer," in which he discussed the principles and methods of Steinmetz.

L. J. Popisil spoke of "What Engineering Societies Ought to be to Engineering Students."

An interesting discussion was conducted by Mr. Thomas on "The cut across Salt Lake now being built by the Central Pacific."

Mr. Miller, a former student of the university, was present and spoke to the society on the "Colorado Fuel & Iron Company." This company, said Mr. Miller, has kept out of the great trust and is trying to furnish the entire west with iron and fuel.

Kingsbury, who played tackle on the varsity last year, has been coaching the Lincoln Medics. He recently registered for work in the college and is now playing fullback on the team.

FOOTBALL RALLY THIS MORNING

THE KNOX GAME TOMORROW

NEBRASKA FIELD - - 2:30 P. M.

An Interesting Debate.

An excellent debate, according to the critics, Prof. Fogg and Prof. Ross, it was that took place in English 13 yesterday afternoon on "Resolved, That the federal control of trusts is better than any other plan." The debate was characterized by such off-hand rebuttal as made Nebraska invincible in the inter-state contests last year. In the affirmative W. F. Meier and G. D. Johnson, law 1902, argued, and for the negative, Neil M. Cronin and J. N. Norton.

Dr. Orr discussed medicine as an art and a science, the artistic side of which lies in the physician's relations to his patients. He emphasized the fact that the physician must enter into personal relations with his patient in order to get the confidence which is necessary to the welfare of the latter.

The patient demands full sympathy and the failure to get sympathy is what makes so many men fall into the hands of quacks. To secure this sympathy takes intellectual, moral and social culture. Dr. Orr stated that because of the shortness of time he would
