LINCOLN, NEBRASKA, TUESDAY, DECEMBER 16, 1902.

PRICE THREE CENTS.

BENDER TO BE CAPTAIN

Athletic Board Opens Ballots for Football Captain—Asks the Seniors Not Wear "Ns."

At the regular December meeting of the Athletic board held last night the votes for football captain were counted and the election of John R. Bender confirmed.

It was unanimously voted to request the Senior class not to wear the letter "N" on their class hats.

The report of Manager Engel, containing a statement of receipts and expenditures for the past season was accepted. The manager was authorized to make an offer to Illinois for a Thanksgiving game. The present indications are that Illinois will play here on that date. It was also agreed to submit a proposition to Colorado for an October date in Lincoln. The board decided to have the annual Missouri game in this city.

The matter of voting "N's" to the tennis players who have won, first places in inter-collegiate tournaments was presented by Manager Peters of the Tennis association, and the board voted to grant the privilege of wearing the above letter to Messrs. Farnsworth Wright and Fallor.

Manager Hall of the baseball team was authorized to arrange a schedule for a northeastern trip.

The manager and members of the team who are entitled to them will be given football watch charms.

The board decided to take out \$2,000 insurance on the grandstand, an increase of \$1,000 over what is now carried.

A committee consisting of Professor Lees, Dr. Clapp, and Mr. Ringer, was appointed to revise the constitution and have a supply of the same printed.

The building and grounds committee was authorized to construct a property house under the grandstand, the cost of which is not to exceed \$25.

The election of manager and assistant manager was deferred until the next meeting.

Governor Inspects Cadets.

Governor Savage inspected the battalion in the Armory last night. The inspection was mere informal, as the cadet equipments were not examined. After inspection the governor made a brief address, expressing pleasure in reviewing the battalion and complimented the cadets on their work. He said that he was proud of them, and impressed the fact upon the men that they would never have cause to regret having taken drill at the university.

The commandant and Captain Farnsworth filled the battalion in the manual of arms the remaining fifteen minutes.

Phi Delta Theta gave an informal "spread" at their house Friday night.

Settlement Play Report.

The College Settlement is rejoicing over the financial success of the "David Garrick" play. Although the proceeds were not as great as was hoped for, the amount that the College Settlement has realized is a neat sum, and will do much toward finishing the home of the organization on 20th and N streets. The total receipts for the play were \$352. After all bills have been met, which include expenses for the opera house, costumes, advertising, posters, and other items, the College Settlement will realize about \$100. The tour that the dramatic company is making among the towns of the state is not under the auspices of the College Settlement. It is not expected that anything will be made out of the trip. If the proceeds pay expenses the company will feel well pleased.

DRAMATIC CLUB.

The "David Garrick" Comedy Co., which showed at Ashland last Saturday night, were not well pleased with the small crowd, but were satisfied that they just made expenses. After the play Mr. Booth, Mr. Moorehouse and Mr. Clark were entertained by Mr. George Shedd, who came up from Lincoln to see the play. The company is billed for York Friday, and for Fairbury Saturday. They are also planning to go to Hastings Thursday.

Caldwell's Addr.

Professor Caldwell's paper before the recent meeting of the state superintendents on the advisability of matriculating into the university any pupil merely on presentation of four years' credit from any accredited school without any specification of subjects, has aroused so much general interest in the state, that he has been asked to represent it before the meeting of the state teachers' association in January.

Winter Farm Course.

The winter course in agriculture will begin January 5, 1903. A large number of subjects are offered for instruction, consisting of soils, field crops, and farm management, butter and cheese making, breeds and breeding of live stock, orcharding and gardening, diseases of live stock, English and shop work.

The course of instruction aims to give the student such information and training as will increase his earning capacity as a farmer and to interest him in agriculture so greatly that he will have a strong desire to make farming his life work.

There is to be a special dairy course from January 5, 1903, to March 17, 1903, in order to supply the many demands of students and dairymen. The course is a practical but thorough study of all subjects relating to the dairy industry, including butter and cheese making, the care, management and judging of dairy stock, the testing of milk and cream, and subjects relating to city milk supply. Practical science is applied in all the operations.

No examinations for entrance are

"Bill" Grant, '98, is now employed with the B. & M. in this city. He is living at the Kappa Sigma home.

BASKET BALL OUTLOOK

Only One Old Man Back on Team—Chapel to Be Used for Practice—Trip Being Arranged.

If Nebraska does not have a good basket ball team this year it will not be owing to lack of material to pick from. Thirty-six men were out for practice Saturday afternoon and four lively games were played. Several of the men who have been showing up best were tried on the first team and everybody played hard ball. Hereafter the men will practice goals during convocation and at odd times. New baskets will be purchased and placed in the new chapel so two games can be played at once. The man can also drop into the new chapel and practice goals when the gym is occupied by classes. Another ball will be purchased soon, which will greatly facilitate matters. With Dr. Clapp to coach the team a good team will certainly be developed from such a large class.

The basket ball class now meets in the Armory at 3 o'clock on Saturday. About twenty-five men are trying for the team and good work is being done. Only one member of last year's team is in school this year, and the team will practically be made up of new material. Hewitt is captain, and Hiltner, manager. The schedule of games for the season is not yet completed, but Manager Hiltner is arranging for several trips, and a good schedule will undoubtedly be submitted.

The first basket ball team will play the Y. M. C. A. team Thursday night, while the second squad team will play the Lincoln high school.

Stock Judging Parliament.

The live stock judging parliament will meet at the university farm from January 23 to January 31, 1903. It is held in order to meet the demands of farmers who wish information concerning the values of different classes of market stock. A contest in judging will take place the last day and all persons who have taken the course, or who are registered in the regular course of the school of agriculture, will be allowed to compete. A number of prizes have been offered by prominent stockmen of the state to those who shall make the best records. A lecture on some subject of practical importance to stockmen will be delivered in Memorial hall each evening of the week. A registration fee of \$1 will be required of all who enter the course.

Governor Cummins of Iowa has accepted the invitation to deliver the mid-year commencement address.

The only woman's college in western Asia and southeastern Europe is the American college for women in Constantinople, founded in 1871.

From Porto Rico.

Mrs. Luckey recently received the following letter from Miss Nina Prey, formerly of the university, who is now engaged in teaching school at Ponce, Porto Rico. Miss Prey enclosed a letter, which she had received from a former pupil, thirteen years of age. It indicates that remarkable progress that the Porto Ricans are making in acquiring English. Miss Prey says:

"Sister and I are very nicely settled, keeping house in Ponce, the largest city in the island. We enjoy the society of seventeen other American teachers, about ten missionaries, and many other Americans engaged in various pursuits.

The city proper is two miles from the beach and the favorite amusement is to attend the band concerts held there. The electric car runs right past our door and is usually crowded on concert night. We enjoy attending the woman's club once a week. There is a very good theatre and dancing hall, a public library and a beautiful plaza, where the entire population promenades on Sunday evening, while the band plays. The military officers here are very kind and loan the government ambulances for picnic parties. Boating on the bay is also a very pleasant diversion. This city has three fine hospitals, best in the island. One can buy almost anything here in the line of luxury or necessity, but prices are high on almost everything. The houses have city water and electric light and there is an ice factory always running. Here ice is one cent per pound, but where we were last year it was five cents.

My work is even more pleasant than it was last year, as I now teach all day in the same building. The hours are 8-11 a. m. and 1-4 p. m. Three days a week the children are dismissed at 3 o'clock, so I can teach the teachers for an hour. Expenses are higher in the large cities, but we each have an advance of \$9 per month over what we received last year. Sister is in a kindergarten, and teaches from 8 to 11."

U. of N. Calendar.

Don't fail to secure one of the 1903 U. of N. calendars. On sale at the Y. M. C. A. and Y. W. M. C. rooms, and the book store.

The front page, illustrated by Professor Barbour, is worth the price of the calendar. Former students will be particularly pleased with this. Be sure that you make your former student friend happy by mailing him one.

Chemical Society.

You are cordially invited to be present at the thirteenth regular meeting of the Nebraska section, to be held in room 4 of the chemical laboratory of the University of Nebraska, Friday, December 19, 1902, at 8 p. m.

The following papers will be presented:

Cyanogenesis in Plants Cultivated in Nebraska—S. Avery.

Chemicals Employed as Food Preservatives—J. M. Nelson.

R. S. HILTNER, Secretary.
