

The Daily Nebraskan.

VOL. 2. NO. 98.

LINCOLN, NEBRASKA, FRIDAY, JANUARY 23, 1903.

PRICE THREE CENTS.

THE JUNIOR PROMENADE

To Be Held at the Lincoln—Elaborate Preparations Being Made—Big Attendance Promised.

Just two weeks from tonight the greatest and most elaborate scheduled event on the University social calendar during the year, will take place at the Lincoln hotel, in the way of the Junior Prom. Everything is practically in readiness for the affair, and it promises, by all odds, to be the most superior prom in the history of the institution. Neither pains nor money have been spared to make the occasion this year one of pride, both to the class, and to the University at large, and the University social world is eagerly looking forward to the night of February 6.

When seen by a reporter for The Nebraskan yesterday afternoon, Chairman Davis, of the committee, had this to say regarding the prospects of the prom. "We have done everything possible to make the dance a complete success. The music will be furnished by Eddie Walt and his orchestra of nearly a dozen pieces. We have arranged for elaborate decorations, and spared no expense in other lines, such as printing, refreshments, and the like. We want to be able to say that we gave the best prom ever given, and I think we shall."

From present indications there will be a representative crowd at the prom. It always has a greater attendance than any other affair of the sort during the year, and bears, of course, greater prestige. It is the one event during the year that people plan ahead of time to attend, and to stay away is a sign that something is radically wrong.

Edgar F. Davis is chairman of the committee, and Norris A. Huse is master of ceremonies, assisted by a representative and active committee of nearly twenty other Juniors, who are all enthusiastic over the outlook for their class function. Tickets will be on sale at the executive office.

Palladians vs. Dellans

The Palladian and Dellan basket ball teams will contest for honors tonight in the Armory. This is the first of a series of annual inter-society games, which determine the inter-society championship. Considerable interest has been aroused as to the outcome. The Dellans have held the championship honors for four years and it is the purpose of the Palladian team to wrest it from them this time or know the reason why. The game will be a hotly contested one and interesting from start to finish. Both societies will support their teams in a body. No admission will be charged.

The next registration day at the School of Music will be February 2, which is the beginning of the third term.

Uni. vs. Y. M. C. A.

The basket ball team will meet their old-time opponents, the Lincoln Y. M. C. A., tomorrow night in the city gymnasium. These contests are always interesting and hard-fought as considerable rivalry exists between the University and the Y. M. C. A. The Varsity will be handicapped on account of the lack of practice this week and the small size of the field. Nevertheless the team is not discouraged by their defeat of a week ago and are going in to win. They have already defeated the Christians by a score of 25 to 18, but the Y. M. C. A. line-up will be different this time and perhaps considerably stronger in that Hagensick, a former University man, will play forward, and Guthing, a man of long experience, will fill one of the positions at guard. It will be the same team which gave Haskell a close rub Monday night. Last year we won from this team by the small margin of 2 points.

Nebraska will appear for the first time this season in uniform. The suits will be composed of black Jerseys with a white "N," black trousers, scarlet and cream stockings and white tennis shoes. Twenty five cents admis-

sion will be charged and a crowd of one hundred and fifty can be accommodated. Students are urged to turn out and support the team.

The line-up follows:

Nebraska.	Y. M. C. A.
Elliott forward.	(c) Hammel
Ferguson	Hagensick
Hewitt (c) center.	Fields
Hoar guard.	Guthing
Hiltner-Benedict	Granger

Dr. Paine to Speak

Dr. B. L. Paine will address the regular Sunday afternoon meeting of the Y. M. C. A. in the Association parlors next Sunday at 3 p. m. His subject will be announced later. These meetings are interesting and profitable and all who can should avail themselves of an opportunity to attend. The Y. M. C. A. is one of the best functions of University social life and deserves the hearty support of students. The membership is at present 285, this being fifty more than it was at this time last year. All are cordially invited to come out to these 3 o'clock meetings and are welcome at the parlors at any time.

The enrollment in the School of Agriculture is larger this winter than it has ever been before. It shows the increase in the interest taken in scientific instruction.

REPORT OF THE REGENTS

General Survey of Progress Made
—Enrollment of Students
—Technical Course in Forestry.

The Board of Regents has issued the sixteenth biennial report to the governor and laid it before the legislature. This report includes a general survey of the progress of the University, the estimates made by the Regents of its needs in the coming biennium and reports of various officers, together with the financial statement of the secretary, Mr. J. Stuart Dales.

Prof. L. A. Sherman, Dean of the Graduate School, in his report, states that at present the number of students enrolled in the Graduate School is eighty-nine, while two others have been admitted provisionally. Of students entering this school year, twenty-five have been admitted to the Graduate course, without reference to a de-

gree, twenty-three have been accepted as candidates for the degree of Master of Arts, and eight have been approved in candidacy for the degree of Doctor of Philosophy. The tendency for students of the class last graduated of Bachelors of Arts or Science, to remain for further study is not as strong as formerly because secondary teachers are not in such great demand.

Prof. Ellery W. Davis, Dean of the College of Literature, Science and the Arts, in his report, shows the decided increase in the number of students enrolled in that college, during the present academic year.

In the Industrial College, no considerable change has been made in its curriculum, other than the establishment of a new group of studies in forestry. What is called the "technical group of forestry," is another group recently organized to afford the young men practical work in forestry.

Other regents from the different colleges and departments connected with the University are all given in full, while that of the registrar and the summary of the students in attendance during the year 1901-92 completes the pamphlet.

The Junior-Senior basket ball game, which was to have been played in the Armory last night was postponed on account of inability to use the gymnasium.

Mickey to Students

Mr. Dinsmore, president of the Nebraska Agricultural Society, ex-Governor Furnas, and Governor Mickey addressed the students and agriculturists yesterday morning at convocation. Mr. Dinsmore said that a person should be so educated that his education will not only be of use to him, but also to others. The world today demands a thorough scholar. The University of Nebraska turns out such men and women, and it is this fact that has marked the progress of the institution.

The speaker advised the student to use well every opportunity put before him, and he would always find everyone ready to co-operate with him.

Ex-Governor Furnas gave a very interesting talk on the early history of the University and its rapid progress since its founding. Mr. Furnas told of his untiring efforts in establishing the institution. He was governor of the state when the University was founded, and appointed its first regents.

Governor Mickey made a short talk on "Giving." It is not what we get, but what we give that makes or un-makes our lives, said the governor. It is wrong to rob ourselves of the better things in this life for more material advancement. Mr. Mickey made his remarks concrete by stories and anecdotes.

Dairymen's Association

At the afternoon session of the Dairymen's Association, a program of special interest to those interested in dairy matters was presented. Several changes were made in the original program owing to the absence of speakers. A good-sized crowd was present, being constantly increased as the meeting progressed.

The opening paper by J. N. Ashburn of Gibbon on "My experience in the arrangement and operation of skimming and cream receiving stations." It contained a carefully prepared review of his own experience in the line discussed. He spoke of his success in the dairy business and the rapid increase in the products turned out by the station he represented.

Dr. S. Stewart of Kansas City, next addressed the meeting on the subject of "Tuberculosis." He discussed in a clear and concise manner the alarming prevalence of tuberculosis among cattle, the symptoms and insidious growth of the disease, and the methods of segregating and taking care of infected animals.

J. H. C. Bremer of York, concluded the meeting with a brief and pointed discussion of "The Importance of the Alfalfa Plant in our Cattle Industry," stating among other things that alfalfa is the king of foods for cattle.

Union Program

Instrumental Solo, Miss Poston.
Pantomime, "Triumph of the Just," four acts.
Instrumental solo, Miss Essex.
Shadow Picture, "Courtier."
Instrumental solo, Miss Beetem.
Tableau, "New England Kitchen."
