

### University Bulletin

THE UNIVERSITY CLUB will give its next dance Friday evening, February 13th, at Fraternity hall.

SENIORS. Class election, Tuesday, February 10th, at 1 p. m., in old chapel. Ralph W. Buck, President.

BEGINNING FRENCH will be given at 10:30 daily, but there will be no beginning Spanish class. The Registrar.

Y. M. C. A. On next Sunday afternoon at 3 o'clock Dr. Swearingen, pastor of First Presbyterian church, will speak to men in the Y. M. C. A. rooms.

Y. W. C. A. The regular Sunday afternoon meeting of the Y. W. C. A. will be held in Union hall at 4 o'clock. All women are most cordially invited to be present.

CHORUS CLASS will meet hereafter at four to five o'clock Tuesdays and Thursdays, instead of five to six. Members please take notice of the changed hour. The Registrar.

GRADUATE CLUB MEETING. The Graduate club will meet at the College Settlement House, 205 South 20th (corner 20th and N) on Saturday evening, February 7th. Those expecting to be present are requested to so notify the hostess, Mrs. Prevey.

### BEST OF PROSPECTS

#### Preliminary Debates Encourage Large Hopes for Finals.

The preliminary debates were held Friday and Saturday nights, and seventeen out of the twenty-eight contestants were given places on the squad from which the members of the three teams will be chosen. The following men were selected: E. R. Buckner, W. B. Catlin, N. M. Cronin, J. C. Doubt, F. M. Hunter, R. C. James, G. A. Lee, B. G. Lewis, S. M. Lightner, W. F. Meier, J. C. McReynolds, J. N. Norton, J. M. Paul, G. M. Peters, R. C. Roper, Ira Ryner and J. F. Tobin.

More interest has been aroused in debates this year than ever before, and as a result the attendance at the preliminaries was good, considering the number of other attractions. The contestants acquitted themselves in a very creditable manner and the general average was above that of former years. Many favorable comments were made after the contests. The work in analysis was very good and the men demonstrated that they had devoted much time and study to the preparation of their arguments.

Professor Taylor, who was one of the judges, said: "The men seemed to realize that they were there to debate and not to deliver orations. The arguments showed the results of conscientious preparation, and it was really a treat, from a scientific standpoint, to hear the debates. The work as a whole was on a higher plane than ever before."

Professor Caldwell, who also acted as one of the judges, said: "It seems to me that the general average was higher than in former years. The preparation was more thorough, and the debaters made less attempt at oratory."

The judges were Professors Sherman, Ross, Taylor, Caldwell and Cook. President Cronin of the Debating Association presided Friday night and Mr. Chas. Bracelen, of last year's Kansas team, Saturday night.

The judges' decision gave very general satisfaction and the "left off's" are going in for more training in preparation for next year's contests. Several registered yesterday in the English courses 12a and 14.

Another debate or two will probably be held this week for some members of the squad, and it will be several days before the membership of the three regular teams, which are to meet Colorado, Kansas and Missouri, will be announced.

The squad is made up largely of new men, as only three of last year's teams are back. This means that Nebraska will have to depend, for the most part, upon new material in the coming interstate contests.

Students, do you want to earn some money? If so, address F. H. Loper, Lincoln, Neb.

### AN ATHLETIC WEEK.

(Concluded from 2nd page.)

thirteen. A peculiar thing about this game was that the second team did not throw a single foul. Wesleyan threw seven fouls and six goals and their opponents threw nineteen goals. For the second team Myers put up a good game at forward, throwing seven goals. Newton, the other forward, threw four goals and Beers, left guard, held Sampson, the Wesleyan first team forward, down to one goal and threw five himself. Noyes threw one goal and Gilbert one. Dr. Condra, Andreson and Bell officiated.

The Kansas team had not yet arrived and Dr. Clapp entertained the audience with some fine performing on the horizontal bars and Indian club exercises. Dr. Hill, Miss Barr, John Bender and others were called out for speeches and responded in a well received manner. This sort of entertainment was kept up until the Jayhawkers arrived, at 10:30.

#### NEBRASKA VS KANSAS.

The game was called at 10:45 and witnessed by a crowd of nearly two hundred. Kansas put up a desperate fight, but to no avail. Every Cornhusker was in the game from start to finish, and put up one of the best games of the season. Their team work was good. Captain Hewitt played a star game, making twelve points. Ferguson was in his best form, making seven points, while Elliot put up his usual steady game and made four. The guarding of Benedict and Hiltner was remarkable in that neither permitted their forward to throw a single goal. Kansas only threw four goals. Allen at center made three of them and D. Alford at guard the other. Wherry threw ten out of seventeen fouls, and Nebraska threw only seven out of fifteen. The first half ended 16 to 10 in Nebraska's favor. In the second half Kansas made 7 points and Nebraska 7. The Kansas men threw their goals from the greatest distance.

#### The Game in Detail.

Captain Hewitt batted the ball from center on the first play and after a few passes Elliot began the scoring with a pretty goal from field. Kansas was fouled twice in succession and Hewitt missed both fouls. Nebraska was soon fouled and Wherry threw the foul and Kansas had begun to score. After a few moments of play Hewitt threw two goals in succession and the score stood 6 to 1. Kansas braced and neither side was able to score for a few minutes. Finally Ferguson found the basket and the Cornhuskers led out again. In the meantime Nebraska had been fouled four times and Wherry had added two more points for Kansas and Elliot had failed to throw a foul for Nebraska. Right here Kansas made their first goal and D. Alford, right guard, did the work with a brilliant throw from half the length of the field.

Hewitt soon added five points by a goal and three fouls. Ferguson failed to throw a foul and Allen, center, made the second goal for Kansas from the side line at the center of the field. Nebraska was fouled five times and Wherry added three points for Kansas. Elliot found the basket for two more points and the half ended 16 to 10 in Nebraska's favor. Benedict and Wherry had each thrown a goal which did not count.

In the second half Kansas went in to win and Nebraska was just as determined to hold her down. The playing was faster and fiercer on both sides and every man played his part.

Neither side scored for a few minutes. Wherry threw one out of three fouls and soon added another. Allen piled up the Jayhawkers' score with two brilliant goals and the score was a tie, 16 to 16. Ferguson batted the ball into the basket, but it did not count and soon came to the rescue with a goal which did count. He did not stop here, but threw three out of four fouls and the score stood 21 to 17 in Nebraska's favor. Wherry threw a foul for Kansas, Hewitt batted the ball into the basket, time was called and the score stood 23 to 18 in favor of the Cornhuskers.

Dr. Condra, Andreson and L. C. Dick officiated. The line-up:

Nebraska.	Kansas.
Elliot..... Forward	Wherry
Ferguson..... Forward	.....
.....	Alford, J. (Capt.)
Hewitt (Capt.) Center	Allen
Benedict..... Guard	Hicks
Hiltner..... Guard	Alford, D.

### ENGINEERING NOTES.

Professor Stout is down with the grip and was unable to meet his classes yesterday.

C. E. Bidell, '00, electrical engineer for the Nebraska City Lighting Company, paid the engineering department a short visit during examination week.

F. L. Hunt, '02, has been given full charge of the induction motor tests of the General Electric Company, Schenectady, N. Y. He has charge of a gang of about seventeen technical men.

Dr. E. L. Corthell, recently consulting engineer for the ministry of public works, Argentine Republic, who will deliver an illustrated lecture March 5th on "Argentine," recently lectured before the Boston Society of Civil Engineers. He also addressed the students of the Thayer School of Civil Engineering.

Chancellor Andrews on engineering profession: "If there is a profession which more safely than any other can be recommended as peculiarly enticing in itself, vastly and directly useful to mankind and not as yet overcrowded, it is engineering in its various phases and branches—civil, chemical, mechanical, electrical, mining, sanitary, hydraulic. Engineer's work, the subjection of man's material environment to man's service, is only well begun. It must and will go on, and it will go far very soon. Probably no man living has more than the faintest foregleam of the development which even the next fifty years have in store for this feature of our civilization. The force working here will have to be vastly enlarged. Only, be it observed, numbers are here as elsewhere of much less consequence than quality. If thorough preparation for one's profession is always important, as is certainly true, it is especially vital to success in engineering, where so much depends on exact knowledge—where mathematics and acquaintance with physical laws figure so conspicuously. Besides being in a high degree both useful and intellectual, engineering is a form of activity in which, if you are thoroughly qualified for it and unremittingly industrious, excellent remuneration may be expected, and that without resort to doubtful devices." (Cosmopolitan for February, 1898.)
