A Special Number of The Nebraskan, devoted chiefly to Y. M. C. A. Plans, Prospects and Accomplishments

A GREAT SUCCESS.

Fete Day Brings Large Crowd.
All Have a Good Time.

The first high school fete day was ushered in with a blaze of colors and streamers. At an early hour the first of the visiting delegations began to arrive, and by 10 o'clock the campus was thronged with gay and happy groups. Under the direction of University guides the different bodies of students inspected the grounds, buildings, and laboratories, thus being enabled to form some ideas of the scope and character of the work with which higher education is identified. The museum and Historical society were the chief centers of interest, both places being continually thronged with curious spectators. The laboratories were also a center of attraction, while smaller groups wandered at random through the various departments that were opened to their inspection.

The exercises of welcome in Memorial hall were preceded by enthusiastic demonstrations on the part of the high school delegations, who, in emulation of the University slogan, vied with each other in giving their yells. In the absence of Chancellor Andrews, Dean Davis delivered the address of welcome. In behalf of the University he welcomed the high schools and expressed his appreciation of their presence. In addition he said that not only the University, but the state itself wishes its sons and daughters to receive the advantages of higher education, such as the University affords. Students are wanted to come and work, and in accordance with President Roosevelt's advice, they should work while they play and play while they work. Here each student should develop a spirit of thought and research for themselves, and not take things for granted merely upon someone else's say-so. The ideal student never acts without thinking, and the men who are the greatest in public life are those who plan before acting.

State Superintendent Fowler, speaking first in response, thanked the University authorities and officers for the fine opportunity given to the high schools to inspect the buildings, grounds, and laboratories. In his opinion every child in Nebraska by constitutional provision should have access to a high school course. He considered it not only a privilege, but a duty that the young students should visit and inspect the University. The University is a wonderful incentive to the high school students, the cadet battalion inspiring them to military bearing, and the football and other athletic teams to greater endeavors in athletic enterprises.

Principal H. K. Wolfe, of the Lincoln high school, expressed his appreciation of the University to further the interests of higher education. The University does not need buildings so much as she does an increase of prestige in the minds of the high schools of the state. Such efforts as the present occasion will bear more fruit than buildings and endowments. He invited the visiting students to visit and inspect the Lincoln high school before leaving the city.

Principal W. L. Stephens, of Beatrice, spoke in appreciation of the

meeting and of the speech of welcome. He recalled a number of amusing incidents which happened when he was a student of the University. In conclusion, he stated as his belief that no one can realize what the University is without coming into contact with the men who constitute the faculty. Attempts to elicit speeches from among the visiting superintendents were mostly ineffectual. Professor Caldwell responded to an invitation to speak, stating that he had nothing to

say, but wished to add to the words of welcome, and hoped that the visitors would find all and more than they expected to find in and about the University of Nebraska.

Dr. Davis announced the afternoon program and Professor Kimball concluded the meeting with an organ solo.

At noon the visiting delegations grouped themselves among the pleasant surroundings of the campus and enjoyed a basket lunch.

SCHOOLS.	Pole Vault	1/2 Mile Run	100 Yard Dash	Shot Put	120 Yard Hurdle	440 Yard Run	High Jump	One Mile Run	Hammer Throw	220 Yard Hurdle	Broad Jump	220 Yard Dash	Relay Race	Totals
Beatrice	1	3	1	1	1	1	1	1	1	1	1	1	1	3-31
Crete	3	3	1	1	1	1	1	1	1	1	1	1	1	1-11
Fairbury	5	5	5	3	3	3	3	3	3	3	3	3	3	3-32
Hastings														3
Hebron														5-5
Seward														0
York	5	5	1	1	1	1	1	1	1	1	1	1	1	5-29

The Nebraska inter-scholastic meet was held on Nebraska Field yesterday afternoon. Beatrice, Crete, Fairbury, Hastings, Hebron, Seward, and York participated in the meet. The events were (1) 100-yard dash (preliminary), (2) pole-vault, (3) one-half mile run, (4) 100-yard dash (finals), (5) twelve-pound shot-put, (6) 120-yard hurdle, (7) 440-yard run, (8) running high jump, (9) 220-yard dash, (10) one-mile run, (11) twelve-pound hammer-throw, (12) 220-yard hurdle, (13) running broad jump, and (14) relay race.

B. McCullough, of Fairbury, scored the highest of any individual man, winning three firsts and one second. The first event was the 100-yard dash preliminaries, and in the two heats Wildman, McCullough, Dunlap, and Wilkins qualified. In the finals, McCullough won first place and Wildman second, with a time of 10 3-5.

In the pole-vault, Mead of York and Graham of Beatrice tied for a long time, Mead finally winning first place. Castle of York won the half-mile, with Knoll of Crete second, and Lee of Beatrice third. Time, 2:22. McCullough won first place in the shot-put, with a distance of 39 feet and 8 inches.

The other events followed in succession, no records being broken. Knode of Hebron proved himself an expert at the high jump, and retired at 5 feet and 6 inches, with a past record of one

inch better. The University record is 5 feet 10 inches, made by Gaines. Hauser of Beatrice won both hurdles easily. The crowd was a large and enthusiastic one, and great interest was taken in the events. Band concert and dress parade on the field followed. The following is a summary of the events won, and the scores made by each school represented. The winning of a first place counted as 5, a second place 3, and a third 1:

From 7 to 8 in the evening the machine and wood-work shops, forges, foundry, and electrical engineering department were all running. The boys went through their regular work, which seemed to be exceedingly interesting to the on-lookers. In the engineering room various electrical displays were in evidence, such as the 40,000 volts current passing over the word "Benjie A." spelled out in glass beads. An arc light was on exhibition and the principles explained by students. Perhaps the most interesting feature was the Marconi wireless telegraphy, by which messages were sent from one part of the room and taken up by the receiver in another. Another feature was a Tesla three-phase experiment. The electro-plating table was perhaps patronized the most, and everybody who had a penny had it plated as a souvenir.

The artistic work displayed at the Elite Studio is evidence of the advancement in photography. We have a number of new effects that are most pleasing and invite those who appreciate art in particular to visit our studio. Special prices to students.—Townsend's Elite Studio.

Don Cameron's for a square meal.

ONCE MORE A DEFEAT.

Notre Dame Overwhelms the Cornhuskers 13 to 2.

Nebraska met her old rival, Notre Dame, yesterday and went down before her by a score of 2 to 13. While it was hardly hoped that the game would be ours, better news was expected of it than that which came over the wires last night. According to the report, the Cornhuskers did not play up to the standard that they had all but established. Notre Dame has always been strong, especially in baseball, and she seems to have lost none of her skill on the diamond. The trouble, so far as the dispatches state, did not lie in errors or poor playing on the part of the individual members of the team, but in the fact that Nebraska found herself far outclassed by an older institution, with more firmly established athletics.

So far as we can make out from last night's telegram, errors were about equally divided between the two teams, Nebraska making 4 and Notre Dame 5. It seems, however, that the Cornhusker battery was not on a par with that of the opposing team, Nebraska fanning only 3, while Notre Dame fanned 8 men.

Score by innings:
1 2 3 4 5 6 7 8 9
Notre Dame 5 5 0 2 1 0 0 0 *—13
Nebraska 0 0 0 0 0 0 0 0 2—2
Batteries: Notre Dame—Higgins and Doar; Nebraska—Beltzer and Bender, Gore and Wilson.

The regular meeting of the Medical society was held Thursday evening in Mechanic Arts building. Mr. Harger presided in the absence of President Rowe. The following program was rendered:

"School Life and Insanity"..... Miss Fairchild
"A Letter from the Philippines".....
"Journal of the Medical Association"..... Mr. Harger
After the reading of the papers, a short business meeting was held, and the claim of the Sombrero allowed.

The Betas defeated the Sigma Chi's last evening, with a score of 8 to 4. Batteries—Gould and Burg, Moodra and Culbertson. Only five innings were played. The Phi Gam's defeated the Delta Taus in the morning. Score, 10 to 2.

It is time for the summer crashes and flannels to be made up. We have a splendid line of such suitings. The Toggery, 1141 O.
