### Communication.

The announcement in yesterday's Nebraskan regarding the proposed meeting of the Debating league, gave an erroneous impression of the forensic movement on foot. The so-called "Amalgamated League of Debating Societies," which name is entirely unauthoritative, is intended to be merely an organization binding together the several independent debating societies in the university. The purpose of this organization is not, as was stated, "to conduct debates with some of the smaller colleges of Nebraska," but simply to arrange inter-social contests within the university. It is believed that such an organization would be the means of creating rivalry between the individual societies, and not only an increased interest in debating, but also much instruction and practice would result from inter-society debates.

For this organization to be a success it needs the support of every student interested in debating work. A meeting will be held in Union Hall Saturday evening for the purpose of organizing. All old members of the various societies should make it a point to attend, and all new students, who are interested in forensic work, will be extended the "lad hand."
