## WIN BITTER FIGHT

### Cornhuskers Down Hawkeyes in Hard-Fought Contest.

#### Iowa Scores on Fluke, But Nebraska Makes Three Touchdowns.

In a game made extremely spectacular by long runs by Benedict, Bender and Johnson, but long-drawn out and slow by Iowa's poor physical condition, the Cornhuskers defeated the Hawkeyes Saturday afternoon by a score of 17-6, an exact duplicate of the Nebraska-Iowa score one year ago. This year as last, the first half ended 6-0 for Iowa, and Nebraska carried Iowa off her feet in the second. The game, tho' called at 3, was not ended till it was almost too dark to play. Iowa's men were in poor condition and the fierce attack and swift play of Nebraska forced them to constantly call for time. Iowa's score, the first made, was the result of a thirty-five yard run by Stoltenberg for a touchdown, after the ball had been fumbled. Nebraska's scores were made by straight football tactics, two by covering the last ten yards by powerful line bucks, and one by a pretty fifteen yard run by Johnson, who got free through Iowa's left tackle. Of these three touchdowns Bennie converted two into goals. Just at the close of the game Stoltenberg, for Iowa, again got away and brought the crowd to its feet by sprinting down the field over Nebraska's goal. The referee, however, had called the ball down and the score did not count. The most spectacular feature was Bender's long quarterback runs. When line buck failed Bender usually emerged, on the third down, with the ball under his arm and tore off from fifteen to thirty yards before being tackled. The excellent tackling of Iowa alone was responsible for his not getting across their goal time and again. Not less remarkable were the runs of Bennie's around Iowa's right and Johnson then around Iowa's left tackle.

Bennie and Bill were accountable for many of the yards to Nebraska's credit and their defensive work was of the usual standard. No gains were made around either. Eager's work in interference was excellent, not a play started that he wasn't in and the runs toward the right were successful, largely because he had made the way clear. Iowa's punting was the best any of our opponents have done so far, but Benedict was in his usual good form and an exchange of punts usually netted Nebraska from five to fifteen yards.

For Iowa Stoltenberg, at right end, was the star. He was responsible for Iowa's score, and his work in running down punts was fine.

#### THE GAME IN DETAIL.

Iowa won the toss and chose the south goal. Cotton kicked off at 3:14, a slight wind from the north favoring Nebraska. The ball was returned ten yards. A vain attempt to gain through our line, and a fumble compelled Iowa to kick. It was Nebraska's ball on Iowa's fifty yard line. First down was made through right tackle, and the ball was fumbled after a ten yard gain by Johnson. Iowa fell on the ball. Iowa immediately proceeded to fumble again, but regained the ball, and punted to Bender, who was downed for no gain. Bennie made a good gain round right end, but line plunges failed, and we punted. Iowa tried fake punt, with loss, and Nebraska got the ball at the center. Iowa held and recovered the pig skin, but was forced to punt. Bender made five then fifteen yards, and again Nebraska fumbled and Stoltenberg, for Iowa, ran thirty-five yards for their only score. Goal was kicked, making the score 6-0 against Nebraska. This ended the scoring for the first half. Twice we were within

## MAGOON GIVES A TALK GERE COMMEMORATION

### Noted Nebraskan Makes Interesting Address at Chapel.

Hon. Charles E. Magoon, of Washington, D. C., gave a most interesting talk in chapel yesterday morning on the various phases of the Panama canal. Mr. Magoon is general counsel for the canal commission, and his talk was listened to with much attention. He described in brief the system of operations which will be conducted on the canal, the obstacles that must be overcome to complete it, and the history of the canal itself in French as well as American hands. The advantages of the completed canal were brought out clearly.

As to the probable time that the construction of the canal would necessitate, Mr. Magoon said in substance:

"It is, of course, impossible to say exactly, and equally impossible to make an estimate until it is determined as to the level to which the canal will be dug. If the level adopted by the French engineers is accepted by the United States commission, it is reasonable to expect that the work will be completed in about ten years, which is one-half of the time allowed by the French engineers.

"This gratifying view is justified by the fact that the American engineers are confident of their ability to utilize steam shovels, hydraulic pressure and modern means and appliances, which the French engineers thought could not be used to advantage because of the mountainous character of the country.

"American engineers on the ground told me that their estimate was less than ten years, one making it six years, one seven and another eight; each of these gentlemen, however, called attention to the fact that it was impossible to make proper allowances for accidents, resulting from tropical storms, bursting of torrential streams, land slides and so forth.

"If the canal is dug at sea level, it is, of course, impossible to predict when it will be completed, further than to assert with confidence that it will be accomplished during the present generation.

Mr. Magoon corrected the impression that the climate and health conditions of Panama are unendurable, and stated that with proper sanitary methods, the American laborers on the canal need not suffer. He supplemented his remarks by a description of what the government is doing to insure proper sanitation.

The Saturday sales at the Two Fifty Hat store are eye openers for students. It is always New, snappy goods on sale, and always at nearly half price. Something is on every Saturday.

Pyrography Material—Hand Mirrors, Collar and Cuff Boxes, Photograph Boxes, Pipe Racks, Wall Pockets, Match Safes, Burned Leather Novelties at the Lincoln Book Store.

Bust's of Roosevelt and Parker will be given to the members of the republican and democratic clubs. Maxwell's, 13th and N.

### Impressive Services are Held in Honor of Chas. H. Gere.

Sunday afternoon beginning at 4 p. m. memorial services in honor of the late Charles H. Gere, ex-regent of the university, were held in Memorial Hall.

The services were opened by an organ solo by Mrs. Raymond, followed by a vocal solo by Mr. George Johnston, Chancellor Andrew read a number of selections.

Professor Barber praised the kindness, generosity and modesty of the ex-regent, in a short talk. Regent Charles S. Allen discussed him as a friend to the university. As a patron of letters, and more particularly as one of the foremost in the establishing of the Lincoln city library. Mr. Gere was discussed by Mr. S. L. Geisthardt. Dr. Bessey and Dr. Sherman, of the university, spoke of him as a patron of science and regent of the university. The meeting closed with a hymn by the audience.

## FORESTRY CLUB.

### Students in Forestry Department Organize.

The students of the department of forestry organized a forestry club last Saturday evening.

The following members were elected officers: President, R. J. Pool, vice president, B. R. H. d'Allernad, treasurer, C. G. Bates, secretary, B. R. Jones.

Following the election of officers, committees were appointed and a short discussion was held as to the nature of the work. The men intend to present something at each meeting which pertains to their work in forestry and discuss it. Its work will be along the lines of other special societies.

The next meeting will be held on the evening of Nov. 19th at 8 o'clock in room 102 Nebraska hall.

## LARGE INCREASE.

### First Day's Registration at State Farm a Surprise.

Registration at the state farm opened yesterday, and before evening 150 farmers had enrolled. For the first day's registration, this figure is by far the largest in the history of the agricultural college, and exceeds the total registration of preceding years. The first day's registration last year amounted to only 84, making this year's number almost double. Last year's figure, in addition, was an increase of over 75 per cent over that of the previous year.

## WILL FORM BRANCH

### University Y. M. C. A. to Install Society at State Farm.

#### The Ceremonies Will be Held Next Saturday.

Next Saturday evening the university Y. M. C. A. will install a branch of the society at the state farm. The event will be made the occasion for a big "stag reception" to which all men, whether members of the association or not, are invited. The exercises will be held in Machinery hall, where the headquarters of the association will be located.

The great increase in registration at the state farm has made timely the installation of the Y. M. C. A. there, and a large membership is anticipated. The distance between the farm and the university has made it impossible for the association to work to best advantage among the farmers, and a branch association has been decided on as the best way out of the difficulty.

The exercises Saturday evening will be supplemented with light refreshments and music. A short program will also be given consisting of slight of hand tricks and probably a short talk by Roy Clark. It is especially desired that all new men attend.

## ACADEMY BEATS ASHLAND.

### Preps. at Last Make Good Work Count.

The academy football team defeated the eleven of Ashland on the latter's grounds last Saturday. The academy men were outweighed fifteen pounds to the man, but by fast plays and good team work they succeeded in making the score 21 to 0 in their favor.

Ashland kicked off to the academy at 3 o'clock. The "preps" carried the ball rapidly down the field and Myers was sent over for the first touchdown after seven minutes of play. Orcutt failed to kick goal. The most sensational play of the game was made when the academy full back received the ball in the next kickoff and with excellent interference ran the full length of the field for the second touchdown. Orcutt kicked goal, making the score 11 to 0. Dunn, the academy left half was sent over for a third touchdown, but a hard tackle caused him to fumble and an Ashland man fell on the ball, just as time for the first half was called.

Ashland received the ball on the kick off of the second half and started across the field, but the academy line put up a stonewall and received the ball on downs after it had been carried fifteen yards. The ball was carried down the field by steady gains by Dunn and Myers and Myers was sent over for a fourth touchdown. Orcutt failed to kick goal. The fourth and last touchdown was made by Myers who secured the ball on a fumble and made a fifteen yard run for the goal. Goal was missed. Score, Academy 21; Ashland, 0. Myers was the star ground gainer. Dunn was always good for a gain. Miller played an excellent game at guard and succeeded in stopping Ashland's powerful fullback several times. The academy's team work was good and every man on the team played a good game.

The Junior class will hold a meeting Thursday in the chemistry lecture room in the basement of Chemistry hall. The matter of class caps will be brought up and discussed. The Junior caps informal committee will also report. All members are especially urged to be present as other matters of importance besides the above will be presented.
