Vol. IV, No. 98

UNIVERSITY OF NEBRASKA, LINCOLN, THURSDAY, MARCH 9, 1905.

Price 5 Cents

GOSS WILL SPEAK

On "The Engineer and His Work"
Monday Evening, March 13.

Is a Prominent Professor From Purdue University.

On Monday night, March 13, Professor W. F. M. Goss, of Purdue University will address the students of Nebraska University in Memorial hall on "The Engineer and His Work." The address is given under the auspices of the Engineering Society, but the nature of his lecture will not be strictly technical, and will be broad enough to interest all students in the University. Professor Goss is Dean of the Schools of Engineering of Purdue University, and those who know of him and his work say that it will be a great treat to have him here. The Engineering students have gone to considerable expense to bring him here and it is hoped the students will turn out a large enough crowd to make them feel that their labors were not in vain.

At a meeting of the Engineering Society last night Professor Richards gave a talk on Professor Goss and his work and the substance of his remarks follow.

Professor Goss is not a college graduate, in the strict sense, although he has several honorary degrees, but comes from the practical side of an engineering education. He was a student at the Boston Institute of Technology, which was the first school in the country to introduce the present system of manual training in connection with the engineering studies, which system was introduced into this country from Russia.

After studying at Boston two years he went to Purdue and there introduced the system into the course of that school. The scheme of shop work which he there instituted is the almost universal scheme used by all the Engineering schools of today and he is the author of a book on "Bench Work" which is the text used here in the wood working shops. He is largely responsible for most of the latest improvements in the laboratories at Purdue, and the experimental apparatus which he designed for practical locomotive testing at Purdue has proved itself entirely satisfactory and has won for its author international fame. The laboratory mentioned is by far the best in the country and serves the purpose better than even the locomotives in actual operation, which are always subject to conditions which make it more difficult. This feature alone has been of inestimable value to Purdue for its advertising qualities alone. Prof. Goss is considered an eminent authority on this branch of engineering, not alone in America, but also in Great Britain, and an enormous amount of research is carried on by him at this laboratory and many of the great questions heretofore unsolvable have been conquered here.

Professor Goss is a member of all the leading engineering societies and the author of many technical papers

"MISS CIVILIZATION" AND "MR. BOB"

Presented by the University Dramatic Club.

Benefit of Uni. Y. W. C. A.

Memorial Hall, March 11, 8 p. m.

Tickets 25 Cents.

Tickets 25 Cents.

and books, and is highly regarded by both practicing engineers and the faculties of the leading technical schools. He was one of the consulting engineers for the locomotive testing plant at the St. Louis fair.

BENEFIT PERFORMANCE.

Dramatic Club to Aid Y. M. C. A. Saturday Night.

The two plays which will be given by the Dramatic Club Saturday evening will more than rival any previous productions of that organization. Both plays have received an unusual amount of practice, "Mr. Bob" having been given last spring. The very best talent in the University has been secured for the casts and the plays will undoubtedly prove creditable to the Dramatic Club. The proceeds of the play will go to the Y. W. C. A. to aid that organization in securing their pledge to the temple fund. The price of admission for the two plays is 25c. The casts are as follows:

"MISS CIVILIZATION."
Hatch Chas. McLaughlin
Gand Stand Harry Maurice Benedict
Reddy Leon Pepperburg
Lucas, Chief of Police H. G. Wellensick
Alice Gardner Ruth Wilson
"MR. BOB."
Phil Chas. Sawyer
Mr. Brown Harry Keyser
Jenkins Charley Weeks
Miss Luke Margaret Sterling
Marion Grace Roper
Catherine Annie Neilson
Patty Nellie Smoyer

Prof. Dann on "Culture."

Prof. Dann spoke yesterday at convocation. The subject of his address was "Culture." There are two main characteristics of a cultured man, said Prof. Dann. The first is "inquisitiveness," not the frivolous and reproachful inquisitiveness, which is always the sign of unculture, but a disinterested eagerness to know. It must be the passion for pure knowledge free from any selfish motives to be a factor in culture. The second characteristic of culture is a life for the esthetic, an enjoyment of art, novelty and nature. This fine sensibility is entirely absent in many men who care only for practical things of life. College men are not excluded from this class. The proportion of men registering for culture studies in the universities is falling off every year and practical courses are being substituted. College men are specializing too much in their work, they should have a taste for all human knowledge. A cultured man must have sympathy for every side of life.

Present Status.

House Roll 169, the bill to empower the Regents of the University to condemn the land for an extension to the University campus, which passed the house some time ago, is now on the general file in the senate. It will from there come up for consideration in the regular order in which it now stands on the file.

House Roll No. 350, a bill for an act

to authorize the Board of Regents to purchase the south half of block numbered twenty-five in the city of Lincoln together with all improvements therein to be used for and in connection with the University and to provide for an appropriation of twenty-five thousand dollars therefor is now in the hands of the committee of Finance, Ways and Means in the house.

House Roll 250, the salaries bill which passed the house some time ago and which provides for an appropriation of three hundred and fifty thousand for University salaries was signed by Speaker Rouse of the House of Representatives yesterday afternoon and sent over to the senate.

"Bothsides."

The February issue of "Both Sides," the new inter-collegiate debating journal, has appeared. It announces that E. R. Buckner, who was put on the editorial staff of the paper a few weeks ago, was lately given the office of secretary of the staff. The latest issue of the paper contains an article on "Debating at an English University," by an ex-debater from Oxford. "The Triangular Scheme of Cornell, Columbus and Pennsylvania," "Review of the Chicago-Minnesota Debate on Railroad Combination," "Review of the Brown-Dartmouth Debate on Reciprocity with Canada," and complete briefs and bibliographies of the above debates. The magazine is very valuable as well as interesting. The subscription club, which is being formed in the University, has not the required number of names. The list will be closed in a few days. All students who desire to subscribe at club rates should notify the head of the Rhetoric Department at once.

A game of basketball has been arranged between the members of the Faculty and the Commercial Club of Lincoln. These two organizations will have a team out practicing as soon as the weather permits.

The object of this game will be to raise money for the benefit of College Settlement. The men should be commended on their charity turn of mind. This will make the second benefit held for College Settlement this school year.

The men appointed by the Faculty to have charge of this game are: E. H. Willisford, John Fossler and F. W. Seacrest. These men have not selected a date yet for this event but they think that the game will be played before the varsity baseball season commences.

There are quite a number of men in the faculty and the Commercial Club who know the game and are able to deliver the goods in good shape.

The meeting of the college settlement committee announced on the bulletin board for yesterday afternoon was an error. A meeting of the committee will be held next week instead.

Manifolding and typewriting. See Ed. Affolter, check room, basement Uni hall. University rates.

Fresh home-made candies at Maxwell's, 1426 O St. and 13th and N Sts.

TO PLAY INDIANS

Girls Basketball Team Will Line Up Against Haskell Indians.

The Game is Expected to Be An Exciting One.

On tomorrow evening the girls' basketball team lines up against the team from Haskell Indian School, Lawrence Kansas. The second team will line up against the Peru Normal girls on the same evening. Thus two games of fast and exciting basketball will be the program for Friday evening's entertainment at the Armory.

The varsity girls have been practicing hard this week and many practice games have been played with the second team. The second team gives the first plenty of work to score over them as this team is made up of a fast aggregation of players. The coaches have spent a good deal of time on the team work and have developed two teams that play almost faultless team work.

Miss Mills, one of the old varsity players, but who now has charge of athletic work at the High School, has been helping Mrs. Clapp and Miss Pound with the team.

The officials of the games tomorrow night have been chosen. Mr. Fallis, Haskell's coach, will accompany NEB-THREE

the team and act as official referee in both games. Mr. R. D. Anderson, an old University man, will umpire the games.

The lineup of the teams can be given with the exception of the Peru Normal.

The following is the lineup:
Nebraska. Haskell.

FORWARDS.

Minnie Jansa (Capt.) Irene Sorter
Marguerite Pillsbury Grace Wauken
CENTER.

Ina Giddings Nellie Roberts
Pearl Archibald

GUARDS.

Inez Everett Ida Prophet
Alice Towne Cordelia Gains

SECOND GAME.

NEBRASKA.

Forwards—

Nettle Woodworth.
Nellie Stevenson.

Center—

Thyza Stevens.
Adele Koch.

Guards—

Miss Kimmel.
Anna Zwanechek.

Appoints Committee.

The following committee has been appointed to have charge of the Junior reception for the Seniors:

Chas. H. Purcell, chairman.
Fred F. Fairview, master of ceremonies.
Lillian M. Bennett.
Clyde C. Wilson.
Pearl M. Archibald.

MATCH RACE.

Tonight the champion Lincoln man skater will meet Omaha's representative, Mr. Higby, at the Auditorium roller rink. A large crowd is expected and a fine program has been arranged.
