TWO MORE GAMES

Varsity Basketball Five to Have Two More Contests.

Fraternity Baseball Schedule to Be Completed Tomorrow.

In spite of the fact that the William Jewell game was advertised to be the last basketball game of the season, two post-season games with the Omaha Y. M. C. A. have been scheduled, the first to be played in Omaha Monday, March 27th, and the other here on Friday, March 31st. The result of these two contests will decide the state basketball championship. Twice before this season we have met the Omaha team, defeating them on their floor in Omaha, and suffering defeat at their hands on our own floor a short time afterwards. These additional games mean some more hard training for the basketball men. The Omaha team has always been the hardest kind of a proposition and that their team this year is fully up to the usual standard the outcome of our last game with them proves. It is probable that an informal dance will be arranged after the game in the Armory, although nothing definite in this direction has yet been done. The varsity five picked up active training again Saturday afternoon.

The Inter-Fraternity baseball schedule is progressing fine and all that is lacking is the ratification of the fraternities. This will be considered at a meeting on Wednesday evening.

Claude Robertson, manager of the schedule, has seen every fraternity concerning representation and finds that ten will have a team in the field. If these ten were to play games with each other forty-three games would constitute the series, but this cannot be accomplished for lack of time. In order to cut the number of games down and get within the limits of the time Robertson has divided the "frats" into two divisions, North and South. There are five in each division. By doing this the number of games was cut down from forty-three to twenty-three.

By this manner intense enthusiasm will be manifested by the time of the championship game between the winners of the North and South side divisions. It is the intention of the management to start the games as soon as possible.

Prof. Swezey at Chapel.

Prof. Swezey, gave the third of his series of illustrated lectures at Convocation yesterday. Prof. Swezey's lectures upon phases of astronomy, while not lacking scientific qualities are very popular and yesterday's address proved to be not less interesting than the previous ones. The subject of his lecture was "Astronomical Observations." He began with a few introductory remarks concerning observations of the middle ages, showing views of the crude instruments used in the sixteenth century. [He then explained the requisites for an ideal observatory, one of these, contrary to popular opinion, being that it should be a low building

of one or two stories to prevent as far as possible, tremors.] Slides were shown of the most noted observations and telescopes in the world. Washburn Observatory at the University of Wisconsin and Lick Observatory on the summit of Mount Hamilton, California, the latter with its immense and complicated 26-inch telescope, were first pictured on the screens.

Yerk Observatory, possessing the largest telescope in the world, an immense 40-inch instrument, was next shown. A view of the great Naval Observatory at Washington, a government institution, followed. The famous Greenwich, England, Observatory, was very interesting as it marked the zero longitude of the world. Prof. Swezey concluded with views of the Harvard Observatory, which is considered the greatest in the country, judged not from the size of its telescopes, but for its excellent work for the science of Astronomy.

Track Mass Meeting.

Today at Chapel time there will be a mass meeting of all the candidates for the track team. At this time all the men expecting to try for a place on the track team are urged to meet. The object of this meeting is to get the men together and learn the events each intend entering so more systematic work may be carried on. Some of the men have been able to practice before this time while others have not been able to do any training whatever in their events.

Dr. Clapp will speak to the men and give them some general directions about the rules to be followed while in training. He will also set time for the men in each event to practice. So if you are interested in track work and want to get into the spirit of the work attend the meeting.

Inter-Society Party.

Friday evening the annual inter-literary society party will be held in Art Hall where the members of the Union, Palladian and Delian Societies will join forces in wholesome frolic. This party, as it has proved in previous years, promises to be the function of the literary societies' social calendar. A joint committee has been appointed from the three clubs who are arranging for a program and other amusements. Quite extensive decorations will be made and "Tommy" will serve punch throughout the evening. A large delegation from each society is expected to attend.

Manifolding and typewriting. See Ed. Affolter, check room, basement Union hall. University rates.

Get a pennant at the Co-op.

Oyster stew 25 cents at Cameron's new Restaurant, 119 South 12th.

Have you seen Sanderson's new store? It's a beauty.

Westinghouse Lecture.

Mr. Chas. E. Downton, Foreman of Apprentices of the Westinghouse Company of Pittsburg, Pa., will speak this evening at eight o'clock in the Chapel on the apprenticeship work with his company. The lecture will be illustrated by moving pictures showing the interior of the shops and the men at work. These pictures were a most attractive feature of the Westinghouse Company's exhibit at St. Louis. The department of apprentices of the large manufacturing companies is of the greatest importance to technical graduates. It will also be most entertaining, as well as instructive to the public generally. Those who saw these pictures at St. Louis last summer speak highly of them and do not regret the time lost from the "Pike" while they visited the Westinghouse theater.

Y. W. C. A. Notes.

Miss Hansen, Secretary of the City Y. W. C. A., addressed the Sunday meeting. She spoke on the subject, "Christ, Our Guide." In her talk Miss Hansen answered the theme question, "Who, But Christ, Can We Make Our Leader?" If we follow Confucius it will land us in dead China. If we make Buddha our leader, we will have nothing but the spiritual darkness of India. Christ has shown us our sins. By His word, His Providences, and His Holy Spirit we are led. The Y. M. C. A. quartette sang.

Miss Gold Corwin, State Secretary of the Y. W. C. A., will visit the University and City Associations for ten days, March 21-31. All University girls should meet Miss Corwin.

The leaders for the noon meetings this week are:

Monday—Miss Abbot.
Tuesday—Miss Agee.
Wednesday—Miss Long.
Thursday—Miss Annie Moore.
Friday—Miss Ruth Wilson.

Phi Beta Kappa.

The Nebraska Phi Beta Kappa elections for this year will be announced at Convocation some time in the near future. The entire Convocation period will probably be given over to the announcement. Dr. H. B. Ward, president of the local chapter, will give a talk on the history and traditions of the Society and on the benefits to be derived from membership in the organization. Dr. F. E. Clements, Secretary of the local chapter, will, before announcing the elections, give a short description of the manner in which the reports of the professors of the various departments of the University are received and of the work of the committee in making the elections.

HAVE GREAT TRIP

The Geology Boys Have a Good Outing.

Study the Rocks and Moll Along the Platte River.

Sixteen students of the classes in Agricultural and Field Geology, accompanied by Dr. Condra of the Geology Department, enjoyed a very pleasant outing last week at Meadow, Neb., just north of Louisville on the Platte valley. Three days, Thursday, Friday and Saturday, were spent in studying the structure of the country, tracing the lime stone clay and other beds which outcrop in the slope, and studying the clay pits, lime stone quarries, stone crushers, etc., etc. The country along the Platte is one of the best places in the state for the geologist to work.

A little time was taken each day for recreation by the members of the party and basketball and other sports were engaged in to add to the pleasure of the occasion.

About two hours of each evening was spent around the camp fire listening to speeches and stories made by those present. In this line of sport Mr. Ed. Manning, Mr. Gilmote MacDonald and Mr. J. E. Edgerton proved to be the star performers. Messrs. Manning and MacDonald scored several touchdowns on story telling while Edgerton crossed the tape several yards to the good on his wit which prevailed on all occasions.

The boys report a very pleasant and enjoyable experience and the only regret expressed is that the time devoted to the occasion could not be lengthened.

E. E. Blackman, State Archeologist, began experimenting with floor preparations about two years ago. He has succeeded so well that about four months ago he put out a preparation which has all the properties of a "dust killer" without the objectionable oily feature. Mr. Blackman discussed the merits of his product before the Lincoln City Schools last Saturday evening and expects to treat the floors of all the city schools in the near future.

E. F. Myers, '04, writes from Harvard regarding the mid-year examinations recently held there as follows:

"In the optional mid-year examination, from which we of the first year law class have just received the resulting grades. Buckner, Nebraska '04, got the highest rank among the two hundred and fifty-two men who took the test.

"I write you this for the reason that it will probably be of interest to the readers of the 'Rag.'"

"The rest of us Nebraskans succeeded in landing in the best fourth of the class, but were not in the same class with Buck, apparently.

"Sincerely yours,
"EDWIN F. MYERS, '04."
