TRACK MEN MEET

Seventy Men Report at the Mass Meeting Yesterday.

Majority of Those Present Intended to Try Out.

About seventy men assembled in the Chapel yesterday morning to discuss track work. This is the greatest number ever together for this purpose and the enthusiasm shown is indicative of a good track team to represent Nebraska this year.

Dr. Clapp addressed the men for a short time, giving general directions to be followed if the men are to be successful in their work. He said, in part: "A man to be a successful track athlete must put much time and work in his training. Upon conscientious training depends the success of the candidate. The trainer or coach cannot develop a man and get the true worth out of him unless the man is willing to sacrifice enough to give hard and thorough work to the event."

Captain Hagensick spoke to the fellows and expressed a desire that every man report for work as soon as possible as it is time to begin hard work the first meet being only five weeks distant. Hauser, Weller, and Benedict all gave short talks about track work. Benedict said that the men should follow explicitly the directions of the coach. If all directions were followed and the men worked hard there is no reason why they should not develop a winning team.

Dr. Clapp discussed the schedule and the different meets to be held. A meet with Minnesota is probable and if arranged will be held in Minneapolis. A meet with Colorado is to be held in Lincoln the first of May. Besides these a meet with either Iowa Agricultural College at Ames or with University of South Dakota at Sioux City will be held. The Athletic Board is also considering the advisability of sending a relay team to the big meet to be held in Minneapolis this spring. A team will be sent if it is thought they are fast enough to make a creditable showing for Nebraska. This Relay Meet in Minneapolis will be held immediately after the Pennsylvania Relay Meet at Philadelphia, and it promises to be one of the most prominent athletic events held in the west this year.

In order that more systematic work may be accomplished and that each man may have individual attention the men registered in the events they intended to try for. In case any others wish to register for events they may do so by seeing the following men who have charge of the events:

Hurdles—Hauser.
Distances—Penrod.
High Jump—Meyer.
Sprints—Craig.
Broad Jump—Hagensick.
Weights—Weller.
Pole Vault—Benedict.

So far sixty-three men have registered for the different events and all others intending to do track work are urged to report to the above men immediately.

BAND INFORMAL

Saturday Evening, March 25

Dancing at 9:30 sharp.

...ART HALL...

To Debate Doane.

The debate between the "Students" Club of the University and the Alpha Omega Club of Doane College which has been "in the air" for some time, has at last become a reality, and arrangements were made at the Club last Saturday night for a meeting of the Logicians of the two organizations in the very near future.

The question submitted by the Congregationalists is a phase of the "Proportional Representation" question now up for inter-state work.

The "Students" will hold a preliminary April 7, open to all members of the Club. At this time the team will be chosen and further announcements made. All intending to enter preliminaries hand your name to Secretary W. I. King.

Engineering Notes.

Burt E. Forbes, '95, ex-assistant state engineer, now in the U. S. Reclamation Service, has just completed a division on the construction of the Truckee Canal in Nevada, and is visiting for a few days in Lincoln before taking up the work of his new assignment in the North Platte Valley.

Elver Shinbur, ex-'02, has been visiting the civil engineering department. He was engaged in work in Cuba from September, 1901, until the end of American occupation. Duties assigned him enabled him to see a greater part of the island and led him into some localities unexplored even by the natives. After leaving Cuba he was employed in railroad work in tropical Mexico. He is now assistant engineer in U. S. Reclamation Service, with pay and responsibility accorded to few of his age.

The class in E. E. II are engaged in designing a multi-polar dynamo of one hundred and fifty Kilowatt capacity. This machine will be similar to the one used by the Lincoln Traction Co., directly connected to their cross compound Corliss engine.

On account of the moving picture exhibit of the Westinghouse Co. last evening the regular meeting of the Engineering Society will not take place this evening. A special meeting will be called Thursday, March 26, for the election of business manager, editor-in-chief, and department editor, for next year's Engineering Annual, "The Nebraska Blue Print."

House Roll 169, the bill for the condemnation by the University Regents of land for an extension to the University campus, still has twenty bills ahead of it on the General Rile in the Senate. It will probably not come to a vote before tomorrow.

L. W. Pomerene, Plumber, 238 S. 11th street.

ARCHITECT NAMED.

John Latenser of Omaha Awarded Place as Temple Architect.

The Temple Fund committee has chosen John Latenser, of Omaha, as the architect for the University Temple. Mr. Latenser is one of the best architects in the west and makes a specialty of educational buildings. He is the architect who drew the plans for the Omaha High School building which is considered to be one of the finest buildings of its kind in the country. Several other examples of the excellence of his work might be mentioned, one of which is the beautiful M. E. church in Lincoln.

The contract for the erection of the building has not been let yet and it is not known when work on the structure will begin or when it will be completed.

Thomas R. Kimball, of Omaha, is the man who planned the Administration. He too has an enviable reputation as an expert in his line. Stephens Bros. of Lincoln, have the contract for the erection of the building. It is expected that work on it will begin in the very near future. The building will probably be completed early in the fall. Already the sod covering the location where the Administration building is to be erected is being removed preparatory to breaking ground.

Prof. Persinger at Convocation.

Prof. C. E. Persinger will give a stereopticon lecture at Convocation today on "Three Centuries of American Costumes." Between forty and fifty slides will be shown, illustrating the costumes of men and women from Puritan times to the latest Paris modes and showing the progressive development of styles of dress from the colonial period to the modern times.

Westover Re-elected.

The Athletic Board held a meeting in Dr. Clapp's office on last Monday evening for the purpose of electing assistant football coach and to transact some other business. John Westover was elected to succeed himself as Booth's assistant. Westover has been assistant coach ever since he quit playing on the 'Varsity. He has been a very good coach and as he was taught the game by Booth he thoroughly understands his methods and can be of great assistance to him.

The Board also awarded the basketball jerseys to the men. Dr. Clapp has not yet selected the men who will receive the "N" for their work in basketball but he will do so in the near future.

NEARLY COMPLETE

Football Schedule for 1905 Almost Rounded Out.

Michigan, Illinois and Minnesota Three of the Games Scheduled.

After overcoming almost unsurmountable obstacles in his efforts to prepare a schedule of football games for 1905 which would suit the students and players ex-Manager Davis has so far completed dates for the coming season that the schedule as it now stands is first ready for publication. The dates are:

September 23—Grand Island College at Lincoln.
September 30—Lincoln High School at Lincoln.
October 7—University of South Dakota at Lincoln.
October 14—Knox College at Lincoln.
October 21—University of Michigan at Ann Arbor.
October 28—Creighton College at Omaha.
November 4—Open.
November 11—Open.
November 18—University of Minnesota at Minneapolis.
November 25—Doane College at Lincoln.
November 30, Thanksgiving Day—University of Illinois at Lincoln.

Ever since Michigan attained pre-eminence among Big Nine Colleges and Nebraska proved herself to be in a class all by herself further west there has been a desire here that the Cornhuskers and Wolverines meet on the gridiron, and next year, thanks to Mr. Davis' efforts this wish is to be gratified and athletic relations on the football field will be opened up with Michigan University. The rest of the schedule including a continuance of football relations with two other conference teams, Illinois and Minnesota, as so far completed, is by far the best rounded schedule Nebraska has yet had, the harder contests alternating with the easier games, an arrangement so desirable and yet so difficult to secure, in a football schedule.

The game with Minnesota was arranged to be played in Minneapolis because of terms thus secured which are very favorable to Nebraska.

Correspondence is now being carried on to secure games for the 4th and 11th of November and it is thought the end of this week will see the schedule complete. The two games yet to be arranged for will probably be with schools with whom we have played heretofore.

Kansas' Schedule.

The Jawhawk schedule of football games for 1905 is as follows:
September 30—College of Emporia, on McCook field.
October 7—State Normal, Emporia.
October 14—St. Mary's College, McCook, or Michigan, Ann Arbor.
October 21—Washburn, Topeka.
October 28—Colorado, Denver.
November 4—Washington University at McCook.
November 11—Oklahoma, McCook.
November 18—Haskell, McCook.
November 25—K. S. A. C., McCook.
November 30—Missouri, Kansas City.
