## SOPHS vs. JUNIORS

CLASS CHAMPIONSHIP TO BE DECIDED THIS AFTERNOON.

Juniors and Sophomores to Contest for Interclass Honors—Both Teams Strong and Expect Victory.

Today at 2:30 p. m., on Nebraska field, the final game for the football championship of the University will be played when the Juniors and Sophomores battle for honors on the grid-iron. Each of the teams was able to make but a single touchdown on their opponents in the first games of the series, and the game this afternoon promises to be even more interesting.

In spite of the attempts of the supporters of either team to fix up their "dope cards," a line on the comparative strength of the two teams can hardly be drawn with any success. The Juniors have defeated the Seniors and the second high school eleven, while the Sophomores have defeated the Freshmen of the Academy and succeeded in holding the eleven from Lincoln high school to an even score in a game of one half. The Sophomore line-up, however, has been changed considerably since the game with Lincoln high school and after figuring and comparing for some time it comes down to the question of, "Where are we at?"

The teams are about evenly matched in weight. Both teams have been coached by men on this year's varsity and the plays used by the teams are very similar. The final result of the game probably depends on the individual playing and team work.

The line-up of the teams will be as follows:

Juniors.	Sophomores.
Cramer..... l. e.	Cook..... l. e.
Meier..... l. t.	Overman..... l. t.
Klesselbach..... l. g.	Crawford..... l. g.
Wilke..... c.	Perrin..... c.
B. Green..... r. g.	McLaughlin..... r. g.
Dort..... r. t.	Matters..... r. t.
Butler..... r. e.	Menefee..... r. e.
Standeven..... q.	Koehler..... q.
Howard..... r. h.	Wallace..... r. h.
Runner..... l. h.	Howard..... l. h.
Myers..... f. b.	Flanagan-Myers..... f. b.

### Girls' Mass Meeting.

At the mass meeting of the girls of the three upper classes Tuesday, a University Girls' Club was organized. Grace Trigg, the Senior president, presided. Miss Howell stated the purpose of the club to be, the aim to make college life more pleasant for the Freshman girls.

Mrs. Barkley said, in part, that it should mean a broader University life, much good in a way vxbgkqajfla. Small circles and cliques may do much in a way, yet they tend to selfishness. The purpose of this club should not be social—there is much real work to be done. It ought to make better women and raise the standard of social life. Miss Puffer spoke of the need of cordiality and said that although the people of the West were much more cordial than those of the East, yet even the Westerner has sometimes to think of cordiality, and especially the University girls. It is your business and ought to be a pleasure to make the new girls feel at home.

## FOOT-BALL

### SOPHOMORES—JUNIORS

#### INTERCLASS CHAMPIONSHIP

Today 1:00 p. m. Athletic Field. Admission 25c

### CROSS COUNTRY.

Men to Continue the Cross Country Running for Training.

The cross country men will continue to do training in cross country running in order that the distance men may be in training for the track in the spring. It is hoped that all men intending to do track work will report for this, and not put off training until the last thing. It is not necessary that you be speedy, for these runs are to be long, easy and slow. The distance will not be so long but what anyone can cover the course, and that at the pace set by the leaders. Cross country work is the best exercise men can get who are not able to do the regular gymnasium work.

It has been arranged to make two runs each week, if the weather permits. The first will be on Tuesday from four until five o'clock, and the other on Saturday at 3 p. m. These two dates are such that every man who wants to do cross country work may be able to get out at least once a week. If you just want the work for exercise, do not be afraid to come into the work, as it will develop you more than indoor work.

Professor Luckey is in receipt of a copy of the quinquennial report of the public schools of Bloomington, Illinois, which contains a number of photographic views showing what the different grades are doing in regard to manual training, agriculture and gardening especially. The schools of Bloomington have, since 1901, been in charge of Superintendent J. K. Stableton, formerly superintendent at Lexington, Neb.

Mr. Fred Abbott, editor of the Columbus Journal, was in Lincoln yesterday visiting with University professors. Mr. Abbott was formerly a student at Nebraska and is one of the recently elected regents of the University.

Don't forget your Senior pictures.

### READY FOR CHARTER DAY.

Dr. Ciapp Begins to Train the Men for This Big Athletic Event Indoors.

Work begins today on the big athletic event of mid-winter. The Charter day athletic program has become of more than ordinary importance to the University student. This year it promises to be of greater importance than ever before. Realizing this, Dr. Ciapp calls the men to a meeting at 4 o'clock this afternoon in the Armory. All who intend to try for any of the events in the program are urged to be in attendance this evening in order that training may commence immediately.

Another thing that makes this indoor training of greater importance this year than ever is the fact that a big athletic carnival is to be held in Kansas City in February. The Kansas City Athletic Club is arranging for a big indoor meet embracing all the indoor sports. She has four other representative teams to participate with her in this meet, Missouri Athletic Club of St. Louis, Missouri, Kansas and Nebraska Universities. This comprises what would be termed a Missouri Valley Indoor Meet. In all probability Nebraska will send a team, but this all depends on the kind of work the men do on Charter day.

The events for Charter day this year will be the same as last: 25-yard dash, running high jump, pole vault, shot put, rope climb, fence vault, and inter-fraternity relay race. This program occupies about three hours and one-half, making a very interesting entertainment.

C. G. Hodges of the Mechanical Engineering department, left for Topeka, Kansas, last Tuesday to look at a telescope there. Mr. Hodges is assisting Professor Swezey in the construction of a large telescope to be used at the observatory here.

C. W. Roberts, '06, was taken sick last week and is now at his home in Normal, Nebr. Mr. Roberts will probably not be able to return to school until the first of the year.

## BASKET-BALL

### NEBRASKA VS. WESLEYAN

Armory, Dec. 13, 8:15 p. m. Admission 25 cents

## PLAY WESLEYAN

FIRST BASKET-BALL GAME OF THE SEASON TONIGHT.

Wesleyan Comes With a Strong Team, and an Enthusiastic Crowd of Rooters.

Tonight the first game of basket-ball is to be played on the home floor. The game is with Wesleyan University, the team that defeated Nebraska on last Thursday night at University Place. The score, although close, was one point in favor of the Methodists. The game tonight promises to be just as close and exciting as the one held on Thursday night last. Both teams have practiced hard for the game, and are in the best of condition.

Wesleyan has the best team this year she has ever had, and plays the game with a vim from start to finish. Lowell, the "tall one" at the center position, is a strong player and knows the game in every detail. He is assisted by White at forward, and these two men are the chief basket tossers of the Wesleyan team. The team work manifested by these players in the first game was of a very high order for this early in the season. The varsity has been practicing every day since the last game, and show marked improvement. Hagensick is back at his old position at forward, and plays a better game than ever. The guard positions will be taken care of by Bell and Captain Hoar tonight, the center by Meyer, and Moser will play the other forward position. Kewitt will be on the side-lines ready to take Hagensick's place if his knee should go back on him.

The people will be given the opportunity to see the first and last game of basket-ball before vacation. It is a great incentive to the new players to have a large crowd of people for the first game of the season. It makes the men feel their work is appreciated. So come out, students, and give the team a good rousing start for the basket-ball season.

The new Physics building has been sufficiently completed to allow the classes in Physics to meet in the large lecture room on the second floor. The change from the poorly lighted rooms which have been used is most welcome and better results are expected in the new location.

The lecture room is lighted by nearly a dozen large windows. The seats are arranged in tiers, each tier a little higher than the one in front of it. The lecturer's desk is in the front and center of the room and the sloping floor brings the students much nearer the desk. This is the only lecture room of its kind in the University and it is to be hoped that in the near future every department will have the most suitable rooms possible.

The Engineering Magazine for December has a very interesting article upon "An Engineer's Life in the Field on the Isthmus." It will be especially interesting to any young engineer contemplating employment upon the canal.
