Engineering Notes.

A. J. Collett, '00, U. of N., announces the need of a mechanical engineering draftsman for the Union Pacific railroad.

The senior mechanical engineering class have been making some very interesting experiments with alcohol in the gasoline engine. Preparations are being completed for making a complete test, showing the value of alcohol as a motive power.

The Engineering Society met on last Wednesday evening in regular session. This meeting was purely a business meeting, yet the large number present signified the interest that is being taken in the society this year. About a dozen new members were voted in, and as many more announced for the next regular meeting. Mr. Friedman, chairman of the entertainment committee, announced that the first engineering smoker of the year would probably occur the Saturday evening following the Thanksgiving holidays. Watch for the final announcement.

The society has regular meetings the second and fourth Wednesdays of each month. Every engineering student should belong to and aid this organization which is in a position to bring them so much from the practical side of engineering.

Those wishing their names submitted may hand them to J. E. Hershey, G. L. Hedges and H. C. Currier. Membership and initiation dues may be given to A. Palen, Burr Bay and A. E. Hibner.

A letter from L. A. Sheiden, '05, who is employed in the turbine testing department of the General Electric company of Schenectady, N. Y., states that the work is very satisfactory and that he has gained some valuable experience along that line. R. E. White, '05, L. W. Turner, '05, C. C. McDowell, '05, G. F. Brown, '04, and R. A. Walton, '05, are also working for the same company, and the boys are rooming together.

The class in Mechanics of Materials, Applied Mechanics 15, have figured the stresses in the supports of the grandstand and report that it has a large factor of safety. No doubt this will ease the minds of many who have worried for their own safety since reading of the accidents to grandstands on other athletic fields.

A. E. Miller has just finished a design of a centrifugal grain separator with the direct connected gasoline engine attachment. The inventor has experimented with the device and has found it very satisfactory.

J. B. Davidson, '04, assistant professor in charge of the department of Agricultural Engineering at Ames, Ia., writes that he is well satisfied with his work and has plenty to do.

Professor Stout went to Omaha on business yesterday. J. A. Green was seen on the campus Wednesday.

A little trouble was experienced this week with the big engine in the Electrical Engineering laboratory on account of its bearings heating.

Senior E. E.'s are wrestling with alternating current problems at present.

Thanksgiving Rates.

Via the Missouri Pacific will be one and one-third fare to all points within 200 miles. Tickets on sale November 29 and 30, good to return until December 4. Trains leave Lincoln at 9:15 a. m. and 10:15 p. m. City Ticket Office, S. W. Cor. 12th and O Sts. Depot, 9th and S.

F. D. CORNELL, P. & T. A.

Eat at the Uni. Music Cafe.

Every Uni Student

WILL BE interested in the Rudge & Guenzel advertising that will appear in the Journal and Star on Sunday morning. Watch for it and whoop her up for the "Cornhuskers." Buy your ribbons, buy everything you need in the Dry Goods and Furniture lines from a firm that is loyal to Uni interests. No stores in the city carry any higher quality of merchandise than do Rudge & Guenzel Co., and you pay no more for "quality" merchandise here than anywhere else—price will be in your favor in most instances . . .

Show your colors strong at the Nebraska-Illini game. Remember, we will make your bows and streamers **Free of Charge** AT OUR RIBBON COUNTER Successors to Fitzgerald Dry Goods Co.

A new course in Military Science has just been arranged and approved by the Chancellor. The title of the course is "Army Papers" and is open only to those men who have completed their military requirements. For the four hours recitation required, two hours credit will be given. Captain Workizer has especially designed this course in order to get the clerical work out of the hands of those men who have not completed their drill requirements. This will also allow credit for the officers.

The Students' Debating Club is considering the probability of adjourning their meeting at an early hour tonight and attending the County Fair in a body. Inasmuch as the club is planning to give a co-ed program in the near future, this movement, if successful, ought to place them in the right light with the co-eds.

Sunday afternoon at the Oliver Theatre, Dr. Earl Douglass Holtz of Pittsburg will address the men's mass meeting on "Opportunity and possibility." Dr. Holtz is a brilliant speaker and will present a very interesting and helpful talk. Miss Maude Kendall will sing. Every young man should make it a point to be present.

Dr. Woodward, diseases of the eye, ear, nose and throat. Richards block.

The University Y. M. C. A. has just issued a small tract containing many interesting facts about the Association. Everybody be sure and get one.

TOMMY, THE CATERER.

"THE UNI'S INDISPENSIBLE." We certainly know how. Lady attendant if desired.
