and took especial interest in visiting the universities of Paris, Zurich, Heidelberg and Berlin. She emphasized the fact that we who are privileged to go to college, and have the world before us, should make the most of our opportunities and should realize the charge placed upon us. Men should stand for goodness and righteousness in politics, for never was there greater need than now for pure and upright men. Women need not all be teachers, for there are places in Young Women's Christian Associations and missionary societies for college graduates. The best success is not in acquiring money, but to live our best and make the world better for our living.
