

The Daily Nebraskan

Vol. VI. No. 48.

UNIVERSITY OF NEBRASKA, LINCOLN, WEDNESDAY, NOVEMBER 28, 1906.

Price 5 Cents.

A UNIQUE WORK

INSTIGATED AND PROMOTED BY
THE CARNEGIE INSTITUTION.

Aims and Methods of Organization
Outlined by Its Representative
in the Field of Economics.

The following interview concerning the aims and methods of the Carnegie Institution of Washington, D. C., was granted to The Daily Nebraskan by Dr. Alba M. Edwards, the traveling representative of the Institution in the departments of Economics and Sociology, who has been upon the campus for the past week looking over the possibilities at Nebraska for work in his line:

In 1902 Andrew Carnegie transferred to a board of trustees ten million dollars in five per cent United States Steel bonds for the purpose of founding the Carnegie Institution at Washington, D. C.

The Carnegie Institution is not a university. It has no faculty, no body of students, no college buildings, and it offers no courses of instruction. It should not be confused, as too often it is, with the Carnegie Institute, a technical institute at Pittsburgh.

The object of the Carnegie Institution is to encourage and promote investigation, research and discovery in science, literature and art; to expand known forces, and to discover and utilize unknown forces for the benefit of mankind. It aims to accomplish this object, not by supplanting, but by supplementing the functions and resources of existing institutions. It does not intend to do that which other institutions, or individuals, are doing or will undertake to do. It is a supplementary agency for the purpose of strengthening scientific institutions and scientific workers and aiding them to carry on investigations and to make discoveries which promise to be of importance to the world. It seeks to discover the exceptional man whenever and wherever he may be found, inside of college or outside of college, and to enable him to make the work for which he seems specially fitted his life work.

Hitherto, with few exceptions, research has been a matter of individual enterprise, each worker taking up the special problem which chanced or taste led him to and treating it in his own way. No investigator, working single-handed, can at present approach the largest problems in the broadest way, thoroly and systematically. Without organized effort some nooks and corners in the field of research never would be investigated; others would be investigated many times over. The Carnegie Institution is attempting to furnish this needed organization. It seeks to substitute organized for unorganized effort and to prevent needless duplication of work. The broad field of science is divided into its different departments, with a director in charge of each department. This director subdivides his field and places a capable man in charge of each division. These men, in turn, outline their work and secure interested and efficient men to do each part of it.

(Continued on page 4.)

Dedicated to Professor E. H. Barbour.
"An' the gobline 'll get YOU ef you don't—watch—out!"

A NEW TELESCOPE.

Astronomy to Have New Equipment—Necessitates New Observatory.

The University of Nebraska is to have a new telescope and a new observatory. Already a big lense, that was manufactured by Dr. Minnich, a Nebraska man, has arrived.

For some time the observatory and its facilities have been found very inadequate, and at last plans for a large new telescope have been called for. This instrument will be built in our own shops within the next two or three years.

Although no new building has been arranged for, it is plain that one will have to be built, since the old observatory could not accommodate the new telescope. It is still uncertain as to whether this observatory will be built on the campus or somewhere out in the country.

WILL GO TO CHICAGO.

Manager Eager to Attend Meeting of Western Football Managers.

Manager Eager will go to Chicago on Friday next to attend the meeting of the football managers of the large western colleges, which will be held there on that date. The schedule for next season will be discussed and outlined to some degree.

There will also be a meeting of the Intercollegiate Basketball Association with the basketball coaches and managers to talk over the proposed changes in the rules of the game.

TO ATTEND PHYSICAL SOCIETY.

Dr. Almy to Read Paper in Chicago Saturday.

Dr. G. E. Almy, of the Physics department, will read a paper before the meeting of the American Physical Society in Chicago Saturday. Bruce B. Hill, who took his Master's degree here in '98, will also read a paper before the same society. Mr. Hill is in charge of the Physics department of Kansas University.

"Aggies" Play Football.

The Seniors and the Freshmen of the School of Agriculture played a soul-inspiring game of football under the old rules at the University Farm on last Saturday afternoon. The final score was 16 to 0 in favor of the Seniors and indicates with comparative accuracy the relative merits of the teams. This is the first indication of football enthusiasm among the "Aggies" and it is hoped that hereafter teams may be produced every year.

AND STILL THEY COME.

Another Prehistoric Skull Added to Nebraska's Collection.

Mr. E. T. Hartley has contributed a moundbuilder's skull to the collection of miscellaneous old bones which are to be placed in our new museum. This skull has very striking peculiarities, the most notable of which are a flat place on the upper part of the occipital bone and two deep cracks, one near the ear, the other near the temple. These, to the unprejudiced observer, indicate that in the first place the rolling-pins of the prehistoric wives must have been rather heavy, and, secondly, that it was fortunate for said moundbuilder that his brains had not yet attained sufficient dimensions to fill the cranial cavity or he might have experienced an even more sudden demise than probably fell to his lot.

STILL AT IT.

Johnny Bender Keeping Up the Cornhusker Record.

Johnny Bender played in a football game Saturday at Pullman, Washington, where he is coaching this year, and surprised the westerners with his end runs. That the Nebraska style of football as played in the days of the golden past still lives is shown by the record of the Pullman team this season: Out of five games, among which were matches with the Universities of Montana, Idaho and Washington, Bender's eleven has won five victories and has yet to be scored on. In every instance the teams played with represented institutions much larger than the Pullman school.

SENIOR AND JUNIOR THEMES.

Department of Rhetoric Announces Dates When Papers Are Due.

Senior and Junior themes for 1906-1907 are due at U. 107 on the following dates:

Senior Theme..... January 21, 1907

First Junior Theme.. December 19, 1906

Second Junior Theme.. March 15, 1907

Subjects for these themes are to be submitted to the department of Rhetoric on or before the following dates:

Senior Theme..... January 7, 1907

First Junior Theme.. December 5, 1906

Second Junior Theme... March 1, 1907

Themes should contain at least 1,200 words; should be written on theme paper, and enclosed in covers properly endorsed. No late themes or themes the subjects of which are unapproved by the department, will be accepted.

'07 DEFEATS '08

SENIORS DOWN JUNIORS IN FAST GAME BY DECISIVE SCORE.

First Half Easily Seniors'—Juniors Take Brace in Second Half—Gate Receipts Comparatively Large.

The Seniors defeated the Juniors yesterday afternoon to the tune of 17 to 0 in a game that was both interesting and exciting. During the first half the Seniors had everything their own way and ploughed thru the Juniors' line easily, making their ten yards without much trouble. Two touchdowns were made, but Howard failed to kick goal the second time and the score stood 11 to 0 at the end of the half.

The second half was more interesting and the Seniors made the only score on an attempted forward pass, which landed squarely in the arms of Butler, the speedy Senior end, who raced forty-five yards to the Juniors' goal for a touchdown.

Three times was the Senior goal in danger and it looked as if the Juniors were going to score. The first time the Juniors signaled for a fair catch on the forty-yard line, and the Seniors were penalized fifteen yards for interfering. This brought the ball to the twenty-five-yard line with a free place kick for goal as the right of the Juniors, but in the trial the ball went wide to the left of the goal. The second time the Seniors were frightened was on the fifteen-yard line, when a blocked kick gave the ball to the Juniors. They failed to make good their advantage, however, and lost the ball on a fumble on the second play. Again the Juniors gained the ball on a fumbled punt near the Senior fifteen-yard line, and ploughed thru the line for five more, but the Seniors took a brace, held for downs and punted out of danger.

Near the end of the half the Juniors tried another forward pass, which gave the ball to the Seniors again, and the game ended with the ball near the center of the field. The line-up:

Seniors.

Left end	Butler
Left tackle	Penlon
Left guard	Frazier
Center	Kieselbach
Right guard	Jenkins
Right tackle	Meler
Right end	Standeven
Quarterback	Lott (Capt.)
Left half	Howard
Right half	Myers
Fullback	Campbell-Sunderlin

Juniors.

Left end	Mattison
Left tackle	McLaughlin
Left guard	Johnson
Center	Wellensick
Right guard	Webber, Carpenter
Right tackle	Miller
Right end	Turner
Quarterback	Mennefee (Capt.)
Left half	Rannie
Right half	Meyers
Fullback	Cramer

Umpire—Cotton.
Referee—Stuart.
Head Linesman—Schmidt.
Time of Halves—Twenty and fifteen minutes.

A fairly large crowd witnessed the game and the gate receipts amounted to nearly twenty-five dollars. This sum, added to that taken in at the Freshman-Sophomore game, insures excellent sweaters for the winning team in the final.
