UNIVERSITY OF NEBRASKA, LINCOLN, SATURDAY, JANUARY 12, 1907.

Price 5 Cents.

## A VERY MILD FORM

THE SMALLPOX IN ENGINEERING SCHOOL NOT SERIOUS.

Chancellor Andrews Advises Students to Watch for Symptoms of the Disease and to Get Vaccinated.

The smallpox scare which pervaded the Engineering school yesterday proved, upon investigation, to be of little consequence. Jesse Owens, the Junior E. E. student who was taken to the hospital early in the day, was found to be afflicted with but a mild form of the disease, and every means has been taken to prevent an epidemic. All those residing in the same house with the patient, as well as those in the class room when the disease was discovered have been vaccinated and their clothes disinfected.

Relative to the scare, Chancellor Andrews said: "The seizure of an Engineering student with smallpox is correct. The case, however, is a light one and should alarm nobody. However, all who have been in the slightest danger of contagion would do well to watch their physical condition and consult physicians at once if they feel ill. The symptoms of the disease are said to be the same as in early typhoid, back-ache and bone-ache."

It is quite possible that Mr. Owens will be released from quarantine before the end of the semester. Professor Morse was among those who were vaccinated.

## LARGE ATTENDANCE.

Third Band Informal Well Patronized—Unusually Pleasant Dance.

The third Band Informal of the year was held in Memorial Hall last night. There was the usual large attendance and everything from the condition of the floor to the nature of the music, contributed to an especially pleasant evening.

The Band Informals are proving unusually popular this year and demonstrate the favor with which University students look upon a well conducted, low priced dance. These functions have proved to be one of the surest means of cultivating genuine University spirit in the social life of our institution, and there is every hope that the intended series for this year may be carried out to the end.

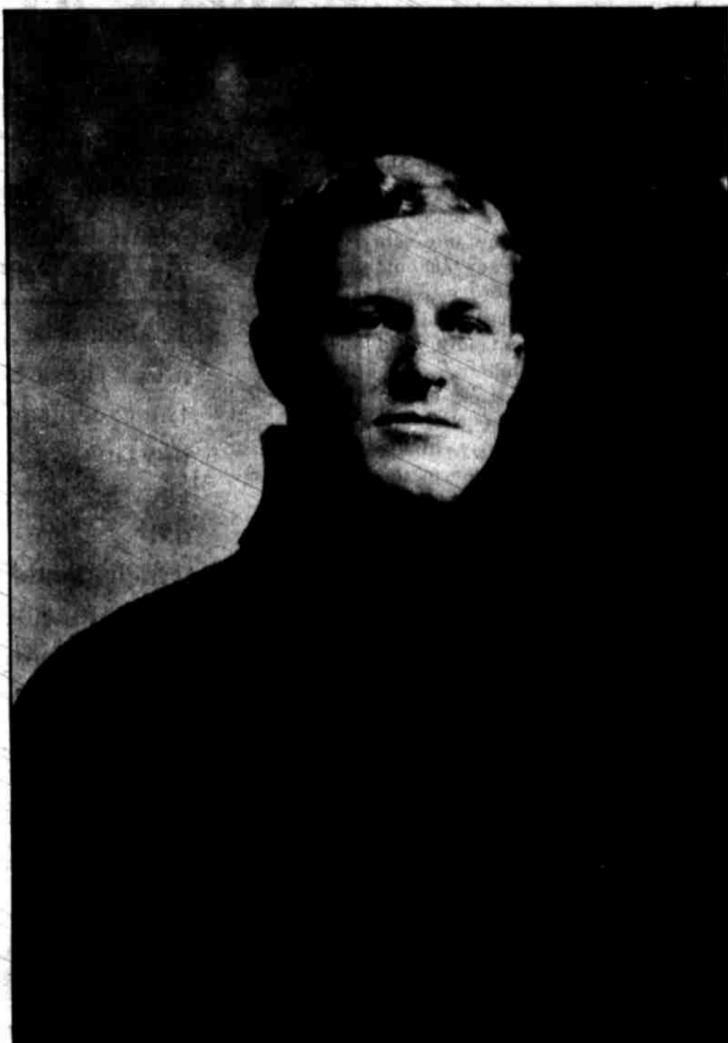

## MISS DAVIES GOES TO OMAHA.

Fellow in American History Succeeds Prof. Braceland in High School.

Miss Autumn Davies, fellow in American History, and at present engaged in the American History department, leaves within a few days to accept the position of American History instructor in the Omaha High School. This is one of the best high school history positions in this state, and as such will be occupied by one worthy of filling it. Miss Davies takes the position now held by Dr. Braceland.

## Dr. Clements Talks.

Dr. Clements lectured to the Methods of Teaching class Thursday on the subject, "Methods of Teaching Botany."

"KING" COLE.

## OUR NEW COACH.

"King" Cole, as he is known at Michigan and in Virginia, has been chosen by the Athletic Board to coach Nebraska next fall. Coach Cole is perhaps one of the best all around football men in the west, having won

an enviable record on the Michigan team, where he played for four years. That he can coach as well as play the game was demonstrated at the University of Virginia last season when he succeeded in turning out the fastest football team in the history of that institution.

## THREE FOOTBALL DATES.

Manager Eager Announces Contests for Season of 1907.

Manager Eager announces the following football games for next season:

Wisconsin, at Madison, Nov. 16.  
Minnesota, at Minneapolis, Oct. 19.  
The return game with Kansas, which Nebraska is under contract to play, will probably take place at Lawrence, November 2.

The schedule for 1907 will include one more "big" contest, to be played on home field Thanksgiving. Manager Eager is trying to secure the famous Carlisle Indian team for this date, but is not certain that the Redskins will come here.

## Kappa Sigma Initiates.

The following men were initiated into Kappa Sigma last night at the fraternity house: George Schramm, graduate student, Oklahoma; Guy Montgomery, '09, Albion; Max Gunderson, '10, Aurora; and J. E. Clark, '10, South Omaha.

Following the initiation an informal banquet was held at the chapter house.

Miss A. C. Soukup, Dressmaker. Special rates to students. 1136 O St. Auto 4603.

## A NEW FELLOWSHIP

ASSOCIATION OF COLLEGIATE ALUMNAE OFFERS AWARD.

No Examinations Required—Candidates Must be College Graduates—Year in Europe the Prize.

An excellent opportunity for a year's work in Europe is awaiting the woman among the graduates of the University of Nebraska who can satisfy the requirements proposed by the Association of Collegiate Alumnae for an annual fellowship of five hundred dollars, to be given for the pursuance of special training along literary and scientific lines.

The Daily Nebraskan is in receipt of the most recent announcement of the Alumnae Association in which details of the requirements are set forth, and for the benefit of any co-ed at Nebraska who may desire to follow out the chance presented, we print this bulletin practically in full.

"The Association of Collegiate Alumnae is desirous of encouraging the pursuit of advanced courses of study among women graduates of colleges. It therefore proposes to devote five hundred dollars every year toward paying the expenses of some young woman who wishes to carry on her studies in a foreign country.

"Applications for this fellowship will be received by any member of the committee having it in charge. The candidates must be graduates of colleges and applications for the year 1907-1908 must be handed in before February 1, 1907. The fellowship will be awarded only to candidates who give promise of distinction in the subjects to which they devote themselves.

"It will be the aim of the committee to appoint the candidate who is best fitted for the position thru original gifts, previous training, energy, power of endurance and health. To this end they will receive applications in writing from eligible candidates, who will present, as clearly as possible, their claims to the fellowship.

"A competitive examination will not be held, but the award of the fellowship will be based upon evidence of the candidate's ability, and of her prospect of success in her chosen line of study. Such evidence will naturally consist of (a) her college diploma (Diploma need not be sent. A certificate from the registrar of the college will suffice); (b) testimonials as to ability and character from her professors and other qualified judges; (c) satisfactory evidence of thoroughly good health; (d) a statement of the work in which she proposes to engage subsequently; (e) last, and of chief importance, examples of her scientific or literary work in the form of papers or articles, or accounts of scientific investigations which she has carried out.

"The fellowship will not usually be granted to those who are intending to take up the practice of any of the three learned professions, though such are not formally excluded from the competition; it will rather be awarded to those who are looking forward to
