

The Daily Nebraskan

Vol. VI. No. 98.

UNIVERSITY OF NEBRASKA, LINCOLN, TUESDAY, MARCH 5, 1907.

Price 5 Cents.

TEAM IS SELECTED

WISCONSIN DEBATERS FOR THE NEBRASKA CONTEST CHOSEN.

Three Strong Men Picked From Squad
—Two Juniors and One Sophomore
—Debate Will Be Held Apr. 5.

Eugene J. Marshall, 1909; Edgar E. Robinson, 1908; and Raymond B. Frost, 1908, will represent Wisconsin in the intercollegiate debate with Nebraska at Lincoln, April 5. These men have just been selected by the Badger debating committee, and are regarded as the strongest debaters in the Wisconsin school.

Two of the Badger debaters are members of the Junior class and one is a second year student. Eugene J. Marshall is a sophomore and a member of the Philomathian society. He won the Hamilton oratorical contest for Wisconsin last year and was on the victorious joint debating team this year.

Edgar E. Robinson is a Junior and a member of the Philomathia society. He will represent Wisconsin in the Hamilton contest this year.

Raymond B. Frost is a Junior and a member of the Athenae society. He participated in the freshman and semi-public debates and took second place in the last Steensland prize contest.

Wisconsin expects a hard debate with Nebraska this spring and the Badger debaters are making thorough preparation for the Cornhuskers. The following extract from the Wisconsin Cardinal voices the sentiment of the Badger school:

"It is rumored that Nebraska is to be feared this year and that she realizes she was not at her best in her last encounter with Wisconsin and is preparing to redeem her prestige.

On Bleaching Flour.

Dr. Alway, Chemist of the Nebraska Experiment Station, has issued a bulletin dealing with the subject of the bleaching of flour in relation to public health.

The bleaching of flour is very generally practised in Nebraska. Dr. Alway's conclusions may be summed up as follows:

1. Bleaching has apparently no effect on the bread-making qualities other than to produce a whiter loaf.

2. Bleaching leaves compounds of nitrous acid in the flour averaging about 4.5 parts of a nitrite to 1 million parts of flour.

3. This amount is partly eliminated in the process of bread making, leaving the quantity in bread so small as to be entirely negligible.

Any one desiring a copy may procure one by mailing a card to the Experiment Station asking for press bulletin No. 24.

Attention, Sophomores!

All Sophomores who wish to try out for a place on the class basket-ball team will meet in the Armory tomorrow at 4 p. m.

Important.

The Innocents will meet at the Phi Kappa Psi house tomorrow evening. Important matters will come before the meeting.

NINE P. M.

ARMORY. : : : 50 CENTS

TRACK MEN MEET.

Plans Made for Regular Work in Gymnasium and Outside.

Some twenty-five or thirty men met in the Armory last Saturday afternoon and were given a preliminary talk on training by Dr. Clapp. Two classes were formed, one of distance men to meet daily at 5 p. m. and work out of doors, and the other of men working on the sprints and field events. Those included in the distance work are men entering for all runs longer than the 220 yard dash. The others will meet in the Gymnasium Monday, Wednesday and Friday regularly at 4 p. m. and at 2:30 p. m. on Saturday, when Dr. Clapp will give them work of general nature and coach each on his particular event.

Every man with any ability or experience whatever is urged to get out for Nebraska is to have a very difficult schedule, and many new men are needed. As soon as the work is begun outside, all men taking up the work in earnest may be excused from drill, the attendance at camp will be compulsory.

NEBRASKA COAL.

Barbour Issues His Report Regarding Mine at Peru.

The report on the Honey Creek coal mine has just been issued by Professor Barbour. Prior to 1906, the report states, that no bed of coal exceeding eighteen inches in thickness had been found in Nebraska. On the eleventh of February, 1906, Stephen George exposed a bed of coal thirty-four inches thick on the farm of A. M. Borst, east of Peru. Now there is a good mine there, which employs eight men, has two tunnels, and has a daily output of from six to eight tons of average grade bituminous coal. Up to the present time the output has been about 400 tons, bringing \$1,400.00. A bounty amounting to \$5,000 has been offered by the State Legislature for the discovery of a thirty-six inch seam.

It is requested that men desiring their track and football sweaters secure them from Dr. Clapp at once.

TO GO TO ENGLAND.

Professor Wallace Will Make Further Literary Investigations.

Professor C. W. Wallace of the Department of English Literature, will leave for England immediately upon the close of the present semester to do further research work in the vicinity of the Shakespeare home during the summer. He will endeavor while there to finish his extensive history of "The Drama and Stage of Shakespeare's Time."

During the past two years, which he spent in England, Professor Wallace made many valuable discoveries and revelations touching the true history of some of Shakespeare's greatest plays, and it is these discoveries that he is working into a valuable book. He will return in time to take up his classes here at the opening of school in the fall.

FOOTBALL SCHEDULE.

Includes Games With Minnesota, Iowa and Wisconsin.

Manager Eager has announced the football schedule for 1907. All the dates are well filled except for Thanksgiving day. Colorado wants that game as do also Denver University and the Colorado School of Mines. However, if a game here will necessitate a return game in Colorado, the proposition will not be considered. The schedule stands as follows:

Oct. 5—South Dakota at Lincoln.
Oct. 12—Grinnell College at Lincoln.
Oct. 19—Minnesota University at Minneapolis.
Oct. 26—Iowa University at Lincoln.
Nov. 2—Ames Agricultural School at Lincoln.
Nov. 9—Kansas University at Lawrence.
Nov. 16—Wisconsin University at Madison.
Nov. 23—Doane College at Lincoln.
Nov. 28—Open.

Rhetoric 13.

The corrected briefs will be returned at 3 o'clock today at U. 309.

M. M. Fogg.

BIG Y. M. C. A. EVENT

EIGHTH ANNUAL BANQUET TO BE GIVEN NEXT FRIDAY NIGHT.

Long and Elaborate Program Arranged
—Professor Maxey Toast-master
—Governor Sheldon to Come.

Next Friday evening in the Lindell Hotel at 8:45 will be held the eighth annual banquet of the University Y. M. C. A. This has been a big event given regularly every year, until last spring, when owing to various hindrances, particularly the convention at Nashville, it fell thru. This year elaborate plans have been made for both program and menu, and all indications point to the event's being an unqualified success. All who attended the function two years ago are anticipating much enjoyment at its recurrence now planned.

The men will gather in the parlors at a few minutes before the set time and proceed to the dining room in a body, where an eight course banquet will be served. The management realize the strength of an appeal to a man's inside life, and this feature bids fair to stand as a mile stone in the college memories of every University man. That the affair will pass off successfully is still further assured by the fact that Professor Maxey with his usual play of genial, searching wit is to preside as toast-master. The first one to respond will be C. M. Mayne, general secretary of the city Y. M. C. A., whose subject is, "A New Standard." Anybody who has heard Mr. Mayne speak, when he got up really to say something, knows what is coming. His talk will be followed by a selection from a quartette composed of Messrs. Ireland, Higgins, Wildman, and Agee. Two other men will then respond toasts, T. A. Brown talking on "Cornhuskers," and Arthur Jorgensen on "A College Man's Ideals." The quartette will furnish more music, and the final response will be made by Hon. E. P. Brown who speaks on "The College Man in Public Life." Governor Sheldon has been interviewed and has promised to be present if circumstances permit.

In a school where there are so few opportunities for the student body to get together in a social way this event should be heralded as a rare occasion. It is not to be restricted to men in the association at all, but every man now in the University or any alumnus will be cordially welcomed. New men will be surprised at the spirit manifested. Tickets are now on sale and cost seventy-five cents.

May Music Festival.

The second annual May music festival will be held in Lincoln on May 22 and 23. As a year ago, the famous Theodore Thomas Orchestra has been secured for this, the greatest music festival held in Nebraska. Two short choral works will be given, viz., "Fair Ellen" by Max Bruch, and "Wedding Feast" by Coleridge Taylor. The festival chorus will commence work at once.

See our fine line of Nebraska pins at the Co-op.
