BIG TOURNAMENT

GIRLS WILL HOLD INTER-CLASS CONTEST TOMORROW.

Unique Procession and Fast Basket-Ball Games—2 and 3 O'clock Classes Dismissed for Girls.

The annual inter-class athletic tournament of the University girls will be held tomorrow afternoon at 2 o'clock. A unique parade and basket-ball games by teams representing the four classes will be the most important features of the big event.

The parade will start shortly after 2 o'clock and will be participated in by the four class teams and their mascots. This feature of the tournament has been one that has excited most interest and furnished considerable amusement for the spectators, and the one to-morrow promises to be better than any of those that have preceded it. Several freakish costumes have been "rigged up" and everybody is "waiting for the parade." Miss Towne says this part of the program will be "swell doings."

The basket-ball teams are very strong and those who have followed the practice of the fives claim that the games tomorrow will be the finest exhibition of basket-ball ever seen at this school. None of the teams that will participate in the contest Thursday have held the class championship before and, therefore, all will enter the fight tomorrow determined to win.

All girls are excused from the 2 and 3 o'clock classes Thursday.

The order of events is as follows:

- (1) Parade.
- (2) Junior-Senior game (first half.)
- (3) Freshman-Sophomore (first half.)
- (4) Junior-Senior, second half.
- (5) Freshman-Sophomore, second half.
- (6) Final game for championship.

The members of the different teams have been chosen, the following being the line-up:

Forwards—Seniors, Nellie Miller (Capt.); Juniors, Mattie Woodworth.

Forwards—Seniors, Edna King; Juniors, Mossie Kimmel.

Centers—Seniors, Helen Huse; Juniors, Nellie Stevenson.

Guards—Seniors, Florence Parmelee; Juniors, Miss Currie, Mary Brown.

Guards—Seniors, Margaret McCutcheon; Juniors, Cecelia Foster, Loraine Hempel.

Substitutes—Seniors, Wilma Wood, Beatrice Clark; Juniors, Amanda Anderson.

Forwards—Sophomores, Isabel Wolfe; Freshmen, Esthier Bailey.

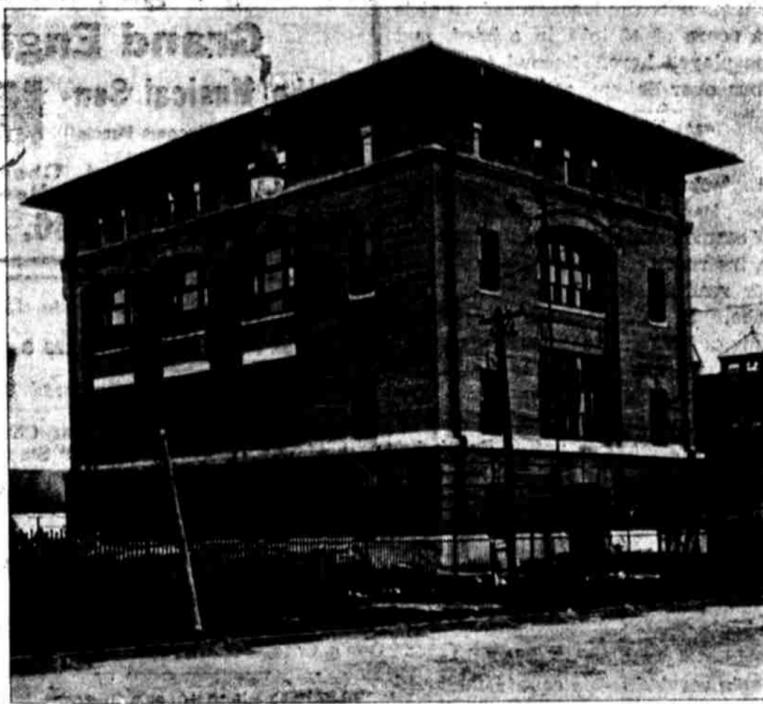

Forwards—Sophomores, Clara Hermanson; Freshmen, Grace Kimmel.

Centers—Sophomores, Bess McGuire; Freshmen, Marie Barr.

Guards—Sophomores, Anne Watt; Freshman, Myria Conner.

Guards—Sophomores, Eleanor Barbour; Freshmen, Kate Field.

Substitutes—Sophomores, Ada Haggard, Marian Hertin; Freshmen, Eunice Bauman, Ella Anderson.

THE UNIVERSITY MUSEUM.

THE NEW MUSEUM

A FIRE-PROOF BUILDING PRACTICALLY COMPLETED.

Planned According to Latest Rules—
Soapstone Tables in Laboratories
—Room For All Exhibits.

The new Museum will be completed within a few days, and the Department of Geology expects to be able to move into its new quarters by the 15th of March.

This building, which will cost about \$15,000, is constructed wholly of steel, cement and brick, which renders it perfectly rigid and fire-proof. There are no partitions of wood, and even the roof is of metal laid with cement and fire-brick. Besides being the first fire-proof, steel constructed edifice on the campus, this building is planned according to the very latest museum rules, having its windows of such size and so arranged as to furnish the largest possible amount of light and ventilation.

The four floors will be occupied by the exhibits of the University Museum and not a foot of space is to be lost in hallways. Students going to and from the laboratories will pass thru the museum rooms instead of having a special hall provided for this purpose.

At the east end of each floor is a spacious and moderately equipped laboratory, containing four bluish-gray soapstone tables. These novel tables are an entirely new departure from the conventional marble tables, and are the invention of Professor Barbour. The advantage of the soapstone over the ordinary laboratory table is that it is not affected by acids or alkalis. Gas, water and, if necessary, compressed air will be available to students at the tables without their rising from work,—pipes being brought in thru the table supports.

Another new feature in the plan of this building is the steam tunnel which is laid underground, just a few feet to the inside of the foundation. There is no basement room, but thru manholes in the floor, workmen may enter the tunnels to make repairs on the heat pipes.

All the brick used is of local manufacture so that similar material for repairs and future additions will be easily available; and it will be but a short time till the building is extended westward fifty or seventy-five feet. Provision has been made for this extension by leaving the west end of the building blind, with blind arches on each floor, these to be opened as passage-ways between the two apartments, when the addition is built.

When the museum exhibits shall have been moved into these new apartments they will be much less crowded than they have been in the old building, and will show up much better in the excellently lighted rooms. In addition to the material at present on exhibition, there will be some seventy-five tons of new material that has never found room in the old Museum. During the past several years many tons of exhibits have been

(Continued on page 3)

PRESS CLUB.

New Organization for Promotion of Journalism in University.

Last evening a meeting was held at which a new club for the encouragement and promotion of journalism in the University was organized. At this meeting a committee was appointed to formulate a constitution and then a spirited discussion was entered upon as to the place of the club in the University and the possibilities for various kinds of work open to it.

This sort of organization is not an innovation in college circles; clubs of a similar nature exist at Wisconsin, Michigan and a number of the larger institutions, so that Nebraska is simply falling into line with a progressive spirit in college journalism. The work of the Press Club though not as yet fully outlined, will include a serious criticism of journalistic methods in use here with a view to lifting them to higher efficiency, a series of set programs with contributions from members and addresses by practical newspaper men of experience, and the general encouragement of the study and practice of journalism as a profession among college men.

There are ten charter members whose names follow: T. A. Brown, H. W. Craig, C. E. Elliott, P. A. Ewing, J. C. Knode, A. E. Long, H. G. Myers, S. M. Rinaker, E. M. Sunderland, J. M. Swensen.

Fred Hunter, '05, has been appointed superintendent of schools at Ashland. He now holds the same position at Fairmont.

U. OF N. CHICAGO CLUB.

University Men in the Windy City Perfecting Organization.

The weekly luncheon "stunt" inaugurated by the University of Nebraska Chicago Club is succeeding most admirably as the following list of Nebraska men who attended the luncheon a week ago yesterday will testify: Bruce W. Benedict, E. L. Chambers, Dr. Geo. W. A. Luckey, Phillip J. McGuire, Frank J. Bruner, Everett M. Swain, James J. Sayer, V. C. Barber, Guy M. Peters, Frank Brick, Charles K. Payne, Miss Carter, E. B. Sherman, Supt. of Schools, Columbus, Neb., Gold Williams, C. H. True, David L. Killen, Deputy Supt. Bishop, Fred P. Dawson.

The lunch is held every Tuesday noon at one of the most select Chicago cafes, tables being reserved at that hour for old Nebraska men. It is urged that all Cornhuskers who happen to be in Chicago drop in upon the Nebraska bunch at their Tuesday luncheon and renew old acquaintances.

Non Com Poster.

The poster announcing the Non Com hop has appeared and is eliciting much favorable comment, attracting especial attention since the work of one not known in the field of poster-making in the University. The design has the chevrons of all the non-commissioned officers of the battalion as a border, and the lettering, while plain is most effective. Mr. Harrison declares it to be a very creditable piece of work. The artist is C. C. McWilliams.
