NOTED ENGINEER

PROFESSOR KENT OF SYRACUSE UNIVERSITY TO SPEAK.

Comes Under Auspices of Engineering Society—One of the Greatest Authorities in Country.

The Engineering Society of the University of Nebraska have made arrangements for two lectures by Dr. William Kent, Dean of the College of Applied Science and Professor of Mechanical Engineering at Syracuse University. Mr. Kent will arrive in Lincoln Friday morning, April 26, will give a talk on "Fuel Economy in Steam Boilers" at 11 a. m. on that date and "Education for Life and for Life Work" at 8 p. m. on the same date. Both lectures will be given in Memorial Hall at the University, and all engineering students as well as men in the city interested in the lecture are cordially invited to attend. His lecture on Friday morning will appeal not only to engineers, but also to railroad and factory men who are interested in steam boiler study. The lecture in the evening will be rather general in character and will appeal to every one interested in education.

The Engineering Society consider themselves very fortunate in securing the services of Professor Kent. He is one of the best known engineers in the country. He graduated from the Stevens Institute as a mechanical engineer in 1876; held positions in the stool and boiler business, as editor of the American Manufacturer, of Pittsburg, and as superintendent of a factory for making scales and balances. In 1890 he opened up an office as consulting engineer in New York City and remained there until 1903, when he was called to the chair of Mechanical Engineering at Syracuse. During his service as consulting engineer, he was associate editor of Engineering News, one of the largest engineering papers in the country, and devoted some of his time to the writing of text books. He has published two books, the "Mechanical Engineer's Pocket Book," and "Steam Boiler Economy," both of which are standard works with engineers. His "Pocket Book" is a compilation in brief and condensed form of all the engineering data which is ordinarily used by a mechanical engineer, and contains invaluable tables of standard sizes, prices, strengths, etc., of material used by engineers. On steam boilers, he is perhaps the leading authority in the United States. He has pursued considerable original work and investigation on the subject, and his book is one of the best on the subject which has yet been published.

The Engineering Society have gone to considerable expense to bring Professor Kent to the University and it is hoped a good attendance at the lectures will reward their efforts. They have had some invitations printed which will be sent to graduates and other engineering men in the near vicinity, and any member of the society having friends in the engineer-

Baseball ALUMNI vs. NEBRASKA TODAY

UNI. CAMPUS, 3:30

LADIES FREE

ALUMNI VS. 'VARSITY.

Very Good Game Promised With "Old-Timers" On Campus Today.

A team composed of former baseball "stars" will play the "regulars" this afternoon on the campus. This promises to be a close and exciting game, for the alumni team is made up of some of the best baseball men ever turned out from Nebraska.

"Bobby" Hyde, at catch, played two years, in 1905 as sub, and last year as regular catcher.

"Jimmie" Beltzer will pitch and is backed up by a fine reputation as one of the best pitchers ever on the team. He is a brother of "Buck" Beltzer, the regular short-stop. "Ike" Raymond will hold down the first sack. "Ike" played four years on the 'Varsity and was counted as a brilliant first baseman. "Dude" Hammel at second played two years on the 'Varsity during which time he put up a great game. "Silent" Morse, well known as an all-round athlete and especially as a pitcher and infielder, will play short-stop. "Gad" Gaddis also has played two years on the 'Varsity at the third sack. "Gad" was known as an "eater of hot ones," so he may be depended upon to do the stunt in today's game.

"Dog" Elliott will chase balls in the left garden. His work while on the 'Varsity was of the highest order, especially with the stick. "Stick" De Putron, who will play center-field, was one of the best and most popular fielders in 'Varsity baseball history. "Ollie" Mickle at right field played two years on the baseball team as well as on the football team. "Ollie" is especially strong at the bat.

The regulars will be weakest at first base, as neither Kearney nor Schmidt will be able to play.

Men's Meeting.

W. T. Davis, traveling secretary for the Student Volunteer movement, will address the men at the Y. M. meeting this evening. The meeting lasts but half an hour, from 7 to 7:30, and all men are urged to attend.

THE ART EXHIBIT.

Professor Dann Speaks at Convocation on Its Significance.

Professor W. F. Dann spoke at Convocation yesterday morning on "The Art Exhibit," which he said might be called an artists' exhibit. Thru the works of artists are recorded on the canvas what they saw, thought, or felt.

Professor Dann described the different classes of spectators who would go to the Art Exhibit, and divided them into four classes: (1) Indifferent spectators, who follow the others because they think it the proper thing to do. They are worth at least half a dollar. (2) Realistic critics, who judge every picture from its naturalness. This is a very common way of measuring a picture, but the chances are we know almost nothing about it as compared with the artist. (3) Symbolic or sentimental critics, who find a meaning in every picture, allowing their hearts to get away with their heads. (4) Technical critics, who criticize from the standpoint of craftsmanship, telling just how the brush was handled. Not one of these can be taken as the sole standard, for the really great picture is faithful in report, has a meaning or thought back of it, and is executed in an artistic way.

The Art Exhibit is a means of grace, not in the old theological sense, but in the sense of being a fairer and larger means of living. Esthetic pleasures differ from all others because disinterested, that is, not like the pleasures of eating and drinking, which are selfish. The appreciation of art is a matter of free will and no one can monopolize the pleasures derived from pictures or music.

Every one should attend the Art Exhibit and make a study of these fine paintings.

Republican Club.

There will be a Republican Club rally tonight at 7:30 in U. 207. John M. Stewart, nominee for city treasurer, will speak.

GOPHERS CONSENT

MINNESOTA WILL PLAY FOOTBALL WITH NEBRASKA.

Northern School Agrees to Terms of Cornhuskers—Will Play Under Non-Conference Rules.

Minnesota and Nebraska will meet on the gridiron next fall and will play under the Non-Conference rules—the rules which are not approved by the "Big Nine" Conference.

A statement to this effect was given out yesterday afternoon by Manager Eager upon the receipt of a letter from the Minnesota athletic authorities, stating that the Gophers would play the Cornhuskers next fall under the same rules that governed the Nebraska-Minnesota gridiron contest of last year. The proposition of Minnesota is satisfactory to the local authorities and concedes just the points that the Nebraska athletic board has been trying to get from the Gophers. The rules under which the two teams played last fall and which Minnesota is willing shall govern the next game permit the playing of graduate students and second semester freshmen.

The failure of Wisconsin and Iowa to agree to these two rules caused the Nebraska athletic board to cancel the Nebraska game with those institutions and to take on other schools. It was thought that Minnesota, being in the "Big Nine" as Wisconsin and Iowa are, might also refuse to play Nebraska without observance of the graduate and Freshman rules on the part of the Cornhuskers. The announcement from the Minnesota authorities, however, clears up all doubt about the Cornhusker-Gopher football game and leaves the athletic relations of Nebraska and Minnesota in good shape.

The action of Minnesota in regard to the Nebraska game brings up the question as to what step the "Big Nine" schools will take toward dropping Minnesota from their schedules. At a meeting of the representatives of the Conference, April 13, it was decided that the "Big Nine" schools should not schedule contests with any member of their Conference that did not obey the Conference rules. One of these rules forbids the "Big Nine" schools to play any team under non-Conference rules, and Minnesota in agreeing to play Nebraska without the Graduate and Freshman rules breaks the Conference law, for these two rules are rigidly enforced in the "Big Nine." What the Minnesota Athletic Board would do should the Conference attempt to make them cancel the game with Nebraska is a question that cannot be answered now. Some of the local students, however, in expressing their opinion on the matter yesterday, said they thought that Minnesota would withdraw from the "Big Nine."

The arrangement of the game with Minnesota completes the Nebraska football schedule for 1907. It is as follows:

Sept. 28—Peru at Lincoln.

Oct. 5—South Dakota at Lincoln.
