CORNHUSKER ELEVEN LEAVES FOR MINNESOTA.

Several Hundred Students Give Them Royal Send-off—What the Gophers Think of Tomorrow's Game.

THE MINNESOTA ELEVEN.

Player.	Position.	Weight	Lbs.	Year
Mowery, R. E.		170		2
Young, R. T.		180		1
Bondelin, R. G.		185		3
Kjelland, C.		160		3
Mahlstad, L. G.		210		1
Case, L. T.		200		3
Hubbard, L. E.		165		1
Schuknecht, R. H.		180		4
Dunn, F. B.		195		2
Rademacher, L. H.		160		1
Capron, Q. B.		185		2

Weight of Team... 1990
Average weight, 180 10-11 lbs.
Case, left tackle, and Schuknecht, right half, were on the All-Western eleven last year.
G. Capron, quarterback, is the Minnesota punter.
The captain of the Gophers is Schuknecht, right half.

OFFICIALS OF GAME.

Referee—Hoagland, Chicago.
Umpire—Hamill, Dunning, Ill.
Head Linesman—Allen, Chicago.
Field Judge—Hazelwood.

The University of Nebraska football team left for Minneapolis at 6:15 yesterday evening over the Burlington.

Several hundred students were at the depot to give the team a royal "send-off" and to show their confidence in the eleven by their presence.

The Cornhusker team arrived at Minneapolis at eight thirty this morning and are staying at the West hotel.

Just before leaving yesterday Coach Cole put his men thru a stiff signal practice on the gridiron. All the players did good work and appeared to be in good physical condition.

Word from the Gopher camp indicates that Minnesota expects a hard fight Saturday and that they hope to win the game by a small score. Their line-up against Nebraska will be stronger than when they played Ames, and they figure on making a touchdown, a thing they were not able to do against the Iowans.

The line-up of the Minnesota team with statistics for each man is as follows:

Right end—Mowery. He is a senior engineer and replaced Marshall in the Carlisle-Gopher game last year. Weight 170 pounds.

Right tackle—Young. He is a junior academic. The Nebraska game Saturday will be his first 'Varsity contest. Weight, 189 pounds.

Right guard—Bondelin. He is a senior dentist and played center two years ago. Weight, 185 pounds.

Center—Kjelland. Is a senior dentist and played in the Minnesota. (Continued on Page 3.)

From the greatest football player the world has ever known:—

After Minnesota's exhibition game against Ames it would not be surprising to see Nebraska carry off the laurels. Still Williams is capable of accomplishing great results in a week.—Walter H. Eckersall.

GETTING READY.

Gophers Are Pulling Players Thru Examinations.

Minnesota will put a much better team into the game tomorrow than she had against Ames last Saturday. Two men who were kept out of the Ames game on account of their studies have taken special "exams" and have pulled thru them with colors flying high. Here is what the Minnesota Daily says about these men:

Case and Young will play the tackles in the Nebraska game.

Just what this means to the team may hardly be appreciated by those who have not been watching its progress closely, but the aspect for next Saturday looks at least fifty per cent better with these two men as stumbling blocks for the Nebraska offense on Minnesota's line.

Case is not in tip top shape, but he has been doing considerable training during the last week and is carrying little superfluous flesh at present. George never could be lean, however, and he will have fully 200 pounds to hurl at the Nebraska interference Saturday.

Young divided honors with Kjelland on the line Saturday and is a good man on both offense and defense.

Case took his "con" exam yesterday morning and the result was announced half an hour later to the delight of all of those who had been watching the Gopher line.

The Y. W. C. A. announces that Mrs. Scoville, the wife of the evangelist, will lead the noon meeting today. Mrs. Scoville is an unusually attractive woman, with a winning personality and it will be a distinct privilege for the girls of the University to hear her. The meeting will be held at 11:50 in the Y. W. C. A. room.

Miss Ethel Holman, A. B. 1906, is the new principal of the Creighton High School for 1907.

BIG TIME.

Much Entertainment Planned for Y. M. C. A. Feed.

All sorts of entertainment has been planned for the Y. M. C. A. men's supper next Saturday night. It ought to be enough for any ordinary mortal to have once again a good old-fashioned, home-like meal, such as Dr. Paine alone knows how to dish up, and besides this there will be musical numbers, speeches, and all sorts of "stunts" to make the heart of the auditor beat fast at the same time his maxillaries are operating without interruption. Several University favorites will be present with their usual fund of eloquent humor and everyone attending is guaranteed an attack of genuine enthusiasm. Tickets, twenty cents. Go with the crowd and be happy for a couple of hours.

GIRL'S CLUB.

A Campaign for Members is Being Pushed By Many.

A lively campaign has been started on the campus which it is hoped will take a grasp on every girl in the University. The object of the campaign is to get every girl to pay twenty-five cents and become a member of the University Girl's Club, the fees to establish a permanent fund, one half of which will be used solely for the care of sick students, the other half to be discreetly drawn upon to assist worthy girls through school.

The need of such an organization has been felt in the past, but not until last year did it become active. Though an entirely new movement in this school it has proven a success in many other large universities.

It is hoped that every girl will feel that it is a common cause. Let each one join herself and then push for the cause.

The best coffee I ever drank—that served in The Boston Lunch. Try it.

ITS DEVELOPMENT

DR. SHAMBAUGH TELLS OF THE ADVANCE OF THE WEST.

Iowa Professor Touches Upon Some Interesting Points of the Early History of This Great Land.

At chapel yesterday morning, Dr. B. F. Shambaugh of Iowa University, and secretary of the Iowa State Historical Society, spoke on the subject of "The West." His address was full of interesting material for thought.

Dr. Shambaugh explained that he used the word "west" with a broader meaning than that usually assigned to it. He did not refer to the territory west of the "Father of Waters," and not even to the territory west of the Allegheny mountains, but included all America in his subject. He defined the west as the place where a man is, and the East as the place where a man came from. The West is the place where there is vitality, the place where men do things.

He spoke of Columbus as the first westerner and showed how the west has developed new ideas and a new philosophy. He spoke of the rapid advances made during revolutionary times; the growth and enunciation of the idea that all men are created equal, the idea of the written constitution and government from such a constitution.

Dr. Shambaugh then outlined rapidly the next step in the development of the West. He told how the pioneers, pushing forward with unheard of rapidly deposed the Indians and conquered for advancing civilization a tremendous area. He declared that the external features of this advance brought liberal ideas and democratic ideals. Men of grit, men of nerve, men of broad and liberal ideas and tolerant of other's opinions were the products of the West.

Conditions on the frontier were a great leveler; it was expected that every man would work whether he was rich or poor, and if he would not the west was no place for him. The frontier fostered a sympathetic attitude. It made men really democratic and fostered a threefold equality; equality before the law, equality in the law, and equality in the making of the law. True, the west did not first express these principles, but the vitalizing of these ideas came from the West.

The pioneers were forced to bravely fight the battles of a new country. They succeeded and had reason to feel proud of the great commonwealths they had formed. They came to feel that their lives were a part of the history of the community, and as a natural outcome local historical societies were formed. The real life of the American nation is not told by congressional records, for it is spread over forty-five states and is best expressed by the life of the different communities.

It is sometimes contended that the (Continued on page 4.)
