AN AMATEUR PLAY

"MILLER AND MUELLER" BY THE GERMAN CLUB FRIDAY.

Presentation at the Temple Well Pat-
ronized—Pronounced An Artistic
and Financial Success.

Coming close upon the Dramatic club's successful presentation of Bernard Shaw's "You Never Can Tell," the success of the German comedy, "Miller and Mueller," given by the German club at the Temple last Friday evening has given a great stimulus to dramatics in the University and shown the great opportunities to be afforded the university public by the new Temple theatre.

The comedy of "Miller and Mueller," is deliciously funny and novel and the interpretation given it by the members of the club was fully satisfying. The staging of the play was under the direction of Miss Heppner and was consistently German as was the music of the evening. That even those who do not understand German, had no difficulty in following the plot of the play thru its quite intricate course, is a testimony to the acting of the participants.

The efforts of all were well appreciated but perhaps Fritz K. Krueger, having the part most capable of amusing interpretation, received the most applause. His love-making was irresistible as a laugh producer. Miss Amanda Heppner played the part of Hannechen, the heroine's companion, very cleverly and has a good stage presence. F. H. Reinsch, as the typical German father, capitulated gracefully in the last act and pronounced his blessing freely upon the two young couples who furnished the "entanglements" of the plot. Miss Wilhelmine Herold, as Friederike the daughter, was a very natural, simple, German girl. Mr. Albert Aron as Emil Mueller, was very convincing, especially to those who know him, for his naturally quiet manner was entirely lost in the lively part which he played. Miss Elizabeth Wittman played the part of Frau Schraube the washerwoman in a charming manner. Her "coaching" of E. Miller, the bashful lover, was one of the best scenes in the play. Will Mattison and Theodore Krueger as the "Kellner" and the "Lohndiener," tho their parts were small, added materially to the general effect in producing a German atmosphere. Miss Heppner as Hannechen, was presented by her friends with a large bouquet of roses.

On the whole it is the common opinion of those who attend "Miller and Mueller" that it has set a high standard for university dramatics, and that this effort of the students of German in giving such a finished production is deserving of much commendation. The synopsis of the play is given below:

Act 1—Mr. Forstbach plans to marry his daughter, Friederike, to the son of an old friend. To prevent this, Hannechen writes to E. Mueller, Friederike's lover. The letter is by mistake

GIRLS' BASKET-BALL.

The Minnesota-Nebraska Game on the Twenty-first of March.

The girls' basket-ball game with Minnesota will take place on the evening of March 21, instead of on March 14, as announced last week. During the uncertainty about the coming of the Minnesota girls, the night of March 14 was engaged by Miss Howell for her recital before the faculty and the students. Since the evening of March 21 was still open, the latter date was promptly engaged by the basket-ball management for the game with Minnesota, the latter date suiting the visiting team as well as Nebraska. So far as known, no other events of importance are slated for the night selected.

Ten people will make the trip from Minnesota to Lincoln, the same number going from Lincoln to Minneapolis in April. The names of the players on both teams will be given out later.

MISS BETH WALLACE.

Physical Director in the Omaha High School.

Mr. and Mrs. George G. Wallace announce the engagement of their daughter, Mary Beth, to Mr. Mortimer Jay Brown. The wedding has been set for March 3rd. On March 10 they will sail from San Francisco for Tientsin, China, where Mr. Brown has, within the past three weeks been offered and has accepted an important position in the Chinese Imperial University. This has made necessary the setting forward of the wedding day.

Mr. Brown is a graduate of the Nebraska State University, 1905, specializing in chemistry. He immediately went to Cornell University, New York, to teach and continue research work in his chosen science, where he has been for two years and a half. He is well known in younger scientific circles.

The best oyster stew in the city is that served at The Boston Lunch. Try it.

BRYAN TO SPEAK.

Peace and Arbitration to be Discussed.

At the request of the Lake Mohawk Peace Conference each university in the country is requested to give an hour or more during each year to the discussion of the principles of peace and arbitration.

In accordance with this request the University of Nebraska has planned the following program for March 10, at 11 a. m.:

Chancellor E. B. Andrews will preside. Prof. Geo. E. Howard and Hon. W. J. Bryan will make the principal addresses. Prof. Edwin Maxey and J. S. Swensen will each speak for a few moments on special topics.

The full program will be announced in a day or two. All students to plan to be present.

WELL RECEIVED.

Dunbar Company Play to Crowded House.

Sunday afternoon at the Oliver Theatre, the Dunbar Sacred Concert and Bell Ringing Company played to one of the largest Sunday afternoon Men's meetings this season. The house was packed from top to bottom.

Those who attended were well rewarded for the time spent, not only by the class of music rendered, but also by the amount.

The most heartily received selection was perhaps Sousa's "Stars and Stripes Forever."

Next Sunday afternoon "Sunshine Wilkes," of national fame will lecture.

Last night the try-outs for the Y. M. C. A. minstrel to be given April 30, took place in the Temple Auditorium. The try-out will be continued Wednesday night. About thirty-five have signed up for the try-out and from these fifteen are to be chosen for the minstrel.

DAD ELLIOTT SOON

GREAT STUDENT LEADER WILL VISIT THE UNIVERSITY.

Was Noted Gridiron Hero During Undergraduate Days at Northwestern University.

The University Young Men's Christian Association has been able to secure the presence of A. J. Elliott for March 20th for a special address to University men. Mr. Elliott is familiarly known among the west as "Dad" Elliott, a name which has clung to him even since the days when he was accustomed to hit the enemies line on the gridiron at Northwestern. At the present time he is student secretary of the International committee of the Y. M. C. A. and has won wide reputation as a speaker to college men. It is the testimony of men who have heard him that no man ever spoke with greater zeal and earnestness than does "Dad" Elliott.

One of the things which has been an aid to him in securing a hearing from so many college men is the fact that during his undergraduate days he represented in a striking manner the highest type of all-round college men. He was a star football man and in 1901 was named the all-western end. He was twice captain of the track team and had the record of 10 1-5 in the 100 yard dash. He was prominent in fraternity life of his college, being a member of Delta Tau Delta and in his senior year was elected to the Durno society which correspond to our Society of Innocents.

After his graduation from college he was called to fill a large place in the Brooklyn Y. M. C. A. as director of Associations religious activities, and at the time he stepped in to his present position he was recognized as the strongest religious work director in the Young Men's Christian Association. During the past few months he has visited many of the colleges and universities of the west. He has had remarkable success especially in the state universities. It is especially urged that none of the classes or organizations of the University schedule affairs or functions for that night as all university men should make it a point to hear Elliot.

To Test Lighting Plant.

A week from today two of the Senior engineers will run a test on the lighting plant of the University. They will determine the engine and generator efficiency and the transmission losses and if possible determine the cost of the power. The engine will be indicated and wattmeters placed on all lines running out of the plant. The steam consumption will be obtained from a steam meter, and the cost of steam generation obtained from a boiler test to be run later. The test will begin at 7 a. m. and last until 10 p. m. so as to take in all the variations of the day.

M. V. Beghtol, Law, who was called home on account of his father's sickness, is back at work again.
