COLUMBIA UNIVERSITY TO FLY.
Aeronauts Adopt Class Yell and Get Ready to Fly.
 New York, Oct. 24.—
 Hey, diddle, diddle, ha, ha, ha; Columbia in Cloudland, rah, rah, rah! —Amended College Yell.
 Columbia university's class in aeronautics, the very latest addition to the large curriculum on Morningside Heights, proved that it is here to stay by adopting the aforesaid aerial chirp without a dissenting vote. Before the meeting broke up the class was letter perfect in the lofty lament and turned it loose with enthusiasm.
 "Bully!" said Professor William Hallock, who will have charge of the wing department, "Now that we've mastered our anthem, the rest is easy. All we have to do is to go ahead and fly."
 After a hearty breakfast of birdseed and stewed feathers the new class got down to business without delay. Grover Cleveland Loening was the first student of skyplotology to arrive. Paradoxical as it may seem, he has the head and foot of the class. No, he is not twins. The situation becomes clearer when it is explained that Loening is the only member of the class.
 "Loening is the only student taking the course at present," said one of the faculty. "Many of the other students have the matter under consideration. Loening is a thorough student. He got his A. B. last June. Now he's working for his B. D."
 "What is that?" asked the reporter. "Balloon driver," was the reply. "We have received many letters from the fathers of young men under our charge. They are urging their sons to learn to fly, because they figure out that if the boys stick to the skyline

they wont squander as much as if they remained on Broadway."
 "Do you expect any of the students to fly this year?"
 "Several have flown already," laughed the professor. "But, seriously, I don't expect any of the class to exceed the speed limit. Half a dozen years from now it will be different. All the students will fly to and from school. So sure is the faculty of this that a committee has been named to select a site for an aeroplane garage."
