SENIOR CLASS MEETS

NEW PLANS FOR IVY DAY PROGRAM DISCUSSED.

EVENING EXERCISES DISCUSSED

PIG TO BE ROASTED OVER FIRE AT BARBEQUE.

Chancellor to be Notified of Day When Senior Sneak Day, But the Date Will be Kept Secret From the Underclassmen.

The senior class met yesterday morning at 11:30 in Memorial hall. The meeting was called for the purpose of hearing the reports of the various committees, but especially to take up and consider plans for Ivy Day and Senior Day, and to work up enthusiasm for the senior barbeque to be held in Epworth Park Saturday morning.

James Coupe, the chairman of the Ivy Day committee, reported in a general way the plans for May 5. The morning program will be similar to that of last year. It will include the chorus, the class song, class poem, class oration, and the presentation of the commemoration gift. The usual May pole dance will also be included. In the afternoon the inter-class field meet will be held with medals to be awarded to the winners. Supper will be taken at the state farm with a band concert afterwards. The program for the evening will be more sedate and of a much stronger character than that of last year. Its principal feature will be a play to be put on by the Dramatic Club.

Senior Barbeque.

The matter of the senior barbeque was brought up and much enthusiasm manifested in short speeches made by various members of the class.

This breakfast, which is to be held at Epworth Park, Saturday morning, will, it is believed, prove one of the most enjoyable affairs to be given by the senior class. The class will leave for the park at 7 o'clock, catching the car at the corner of Tenth and O streets. One of the principal dishes at the breakfast will be pork roasted over hot coals in the open.

Another important matter which was discussed at the meeting was the plans for Senior Day. This is the day which is to take the place of the annual Sneak Day of the past. A new plan has been adopted by the class whereby the chancellor is to be notified of the date on which the class will sneak. This date, however, is to be kept secret from all of the underclassmen. Nothing further regarding the plans for this event were disclosed at the meeting.

Miss Helen Day, chairman of the pin committee, made a report in which it was stated that orders will still be taken for a few days. The final order for the pins is to go in the last of this week or the first of next. The cap and gown committee also reported that all seniors are to present themselves at the Uni. Book Store to Mr. Gilbert to have their measures taken for caps and gowns for commencement. J. L. Thomas, chairman of this committee pointed out that this should be attended to at once so as to give them time to fill the orders, also, that those ordering early were more likely to get a better quality of goods than in the later orders.

To Order Invitations.

The invitation committee, of which Yale Holland is chairman, reported that they are making a final canvass of the class for orders. The final order for these invitations will go in not later than the first of next week. Ross Bates, chairman of the commem-

oration committee was not present to make his report which was made by the president, E. W. Hills. They reported an assessment to be made for a commemoration gift, which is made annually by the senior class to the university. After other minor matters were briefly discussed, the meeting was adjourned.

CANFIELD MEMORIAL TODAY.

University to Honor Former Chancellor Recently Dead.

In Memorial hall at 11 o'clock this morning a special memorial service will be held in honor of ex-Chancellor Canfield who died recently in New York City, where for the past ten years he has been librarian of Columbia University library. Short addresses and special music will be offered in reverence for the departed educator.

The death of Dr. Canfield has attracted attention outside of New York and Nebraska. Wherever he had lived and in many other places honor has been done his name. In a recent issue of the Outlook there appears an editorial comment of considerable length concerning his life and work. The Outlook editor commends strongly his work at Columbia and speaks in high terms of the qualities of his character which made his work there so successful. He also praises his work in building up Ohio State university and reorganizing it on a firm basis. Dr. Canfield's four years at Nebraska are passed over lightly, but the period in Kansas prior to his coming to Lincoln are spoken of by the Outlook as years full of work and endeavor for the public good.

J. L. DER KINDEREN TO REMAIN.

Position of Secretary Tendered Him by Unanimous Vote.

J. L. Der Kinderen, present secretary of the Y. M. C. A., has accepted the position for another year. The position, with a raise of salary, was tendered him by a unanimous vote of the cabinet Wednesday evening. At the meeting the work of Mr. Der Kinderen, and what he has done in building up the work and placing it on a better footing than it has ever been on before, was brought out. Plans for the coming year were also discussed, it being intended, with the facilities now at their disposal, to extend the work far beyond what it has been in the past.

Last evening, at a meeting held in the city association's Red Room, the members of next year's Bible-study leaders' group met and discussed plans for the organization of the work during the coming year. Work is to be commenced immediately and an organization perfected which will enroll more university students than ever before in that phase of the work.

CEMENT FLOORS BEING LAID.

Work on Heating Plant Nearly Completed on First Floor.

With the covering of the roof and the advent of spring, work on the cement flooring of the engineering building is under way and will be pushed rapidly to completion. The flooring is already laid in the northwest wing and is being put down in the west wing of the first floor. On the second floor, the woodwork and wire netting is prepared for the reception of the cement, in the southeast corner and in the west wing. A cement floor has also been put in, flush with the grade, in the inclosed space between the two north wings of the building in the space leading up to the north entrance.

The red tiling will soon be on the roof and the gray stone slabs for the window sills in place. The heating plant is being installed and nearly all of the piping for the first floor is completed.

PLAY A BETTER GAME

THE CORNHUSKERS MAKE GOOD SHOWING AT ANTELOPE.

NEBRASKA 4, LINCOLN LEAGUE 8

Few Errors Allow Greens to Score in Sixth After Score Was Tied — Olmstead is on the Rubber for Collegians.

The Cornhuskers made the best showing of the spring practice season against the Lincoln Western Leaguers at Antelope park yesterday afternoon, getting out with an 8 to 4 score. Olmstead was in the box for the Nebraska team, and, although hit freely, kept the drives well scattered, with the right kind of support the score would have been closer.

The Lincoln professionals scored two in the first and two more in the third. The collegians put one runner across the pan in the first and rushed three other men across in the sixth tying up the score. The leaguers in their half of the sixth session came right back at the university men and scored four times. Three errors and a clean hit was responsible for the quartet of runs in this instance.

Score by Innings:

Nebraska, 1 0 0 0 2 0 0 —4.
Lincoln, 2 0 2 0 4 0 0 —8

Missouri Comes Next.

Next week the Cornhuskers will meet the University of Missouri nine in two games, on Monday and Tuesday at Antelope park. Missouri has a fast team but the Cornhuskers are figuring on taking both contests. On the recent trip the Nebraska men had two contests with the "show-me" bunch and took one of them, it being the game that counts in the Missouri Valley championship race. Ward will pitch one of the games next week.

Track Men Are Slow.

Dr. Clapp says that the candidates for the track team this spring are not very numerous, and he is looking for other men to get into training. In former years the squad has been very large. This season there are less than twenty men at work. The preliminaries come next Saturday and it is essential, if men wish to try to enter the meet on that day, that they get out during the next few days and work.

In the inter-fraternity league yesterday, Phi Gamma Delta defeated Beta Theta Pi in a five inning contest by a score of 5 to 4. Beta had a lead of two points until the first half of the last inning when the Phi Gammas, mostly because of errors, ran in four scores, this making their total six. In the last round of this inning the Betas made one run but could not even things up.

Inter-fraternity Standings.

	Won.	Lost.	Pct.
West Side—			
Alpha Theta Chi.....	3	0	1000
Phi Gamma Delta.....	1	0	1000
Beta Theta Pi.....	0	3	000
Delta Tau Delta.....	1	1	500
Delta Upsilon.....	0	1	000
East Side—			
Sigma Chi.....	2	1	750
Kappa Sigma.....	1	0	1000
Sigma Alpha Epsilon.....	1	1	500
Alpha Tau Omega.....	1	0	1000
Phi Kappa Psi.....	0	1	000
Phi Delta Theta.....	0	2	000

CONSIDER THE ATHLETIC FIELD.

Regents May not be Able to Purchase the Extra Lots.

The matter of securing lots in the second block north of the university campus for an athletic field was considered by the board of regents at its

meeting yesterday morning. Considerable doubt was expressed as to whether the funds in hand would permit the purchase of the additional ground outside of the one block originally considered. The members of the board in charge of the purchase arrangements were instructed to hasten the securing of options so that the board may know as soon as possible just what the one block is to cost. When that is known it may be found possible to buy further lots in the second block.

In case the additional lots are not purchased the plan of the proposed athletic field as shown in yesterday's Daily Nebraskan will be seriously mutilated. If only one block is provided, there will be no room for a track and the football field itself will be seriously cramped.

On recommendation of Dean Burnett and Principal Davison of the School of Agriculture the regents adopted the following rules with regard to fraternities and sororities in that department of the university:

"No student in the School of Agriculture shall be permitted to join any fraternity or sorority.

"No student belonging to any fraternity or sorority shall be admitted to the School of Agriculture.

"No student in the College of Agriculture shall be permitted to join a fraternity or sorority without first classifying as a regular student and having full credits for one semester's work in the college."

The first two rules are merely administrative measures to enforce the law passed by the last legislature forbidding fraternities and sororities in secondary schools. The School of Agriculture, offering a three-year course, is a secondary school and thus comes under the law which was primarily aimed at high school secret societies. The last of the series merely makes the regulations as to fraternity membership at the state farm conform to the rules now enforced by the Inter-fraternity Council of the general fraternities represented in the other colleges of the university.

Professor H. K. Wolfe of the department of educational psychology was appointed head of the department of philosophy to take the place made vacant by the resignation of Chancellor Andrews. Chancellor Andrews was formerly head of the philosophical departments as well as executive head of the university and the vacancy created by his resignation has never been filled.

Instructor Bensten of the department of geography was raised to the rank of adjunct professor.

The regents accepted a report by Professor Fossler as to the advisability of establishing a department of Swedish languages. The department will be established at the beginning of the next semester if the registration will warrant the expense.

A registration fee of \$2 annually was ordered assessed upon all who take advantage of the services of the University Teachers' Bureau in securing situations, this to cover the cost of maintenance.

The "Cornhusker" is to be sent to every high school in the state, according to a resolution adopted yesterday by the regents. This is done in the belief that the high school students would be given an opportunity to see what the university is, as it is shown in the annual publication.

The board will meet again at 9 a. m., this morning for a further consideration of financial and other matters.

Notice—All candidates for the freshman track team are requested to report for practice Saturday afternoon at 2:00 o'clock at the gymnasium. N. H. Neff, manager.

The best oyster stew in the city is that served at The Bosten Lunch. Try it.

WILL TAKE A TRIP

THIRTY GEOLOGY STUDENTS ON TWO DAYS' OUTING.

VISIT PLATTE AT SOUTH BEND

TO STUDY THE TOPOGRAPHY AND STRATA OR RIVER COUNTRY.

Young Geologists Will Camp Out in the Rough for Two Days to Get a Taste of What Real Geological Work is Like.

Headed by Professor Condra, thirty odd students in the department of geology left early this morning for South Bend where they will encamp today and tomorrow while doing practical geological work. The excursion is one of a series of yearly expeditions made by students of the department. The return will be made Saturday evening.

The geological excursion is taken in order that students of the subject may acquire a first hand knowledge of work in the field. Many of the men pursuing the work expect ultimately to enter government service and such an expedition as this one to the Platte valley gives them a taste of what the real thing is like.

Build Their Own Camp.

The party which left by the Burlington this morning took a complete camping equipment and a quantity of foodstuffs. The members of the party will unpack their furnishings on arrival at South Bend and build camp. Two large tents and other smaller ones will be set up. All the work of the camp, including the cooking, will be done by members of the party. When the time comes to break camp, the geology students will pack their own goods.

While in the field the party will be divided into two sections. One division, comprising the more advanced students, will make a careful examination of the country about South Bend. The topography of the region will be noted and the location of the different formations of rock and earth. Specimens will be collected for future laboratory use. A number of quarries will be inspected and a thorough investigation will be made of the water supply and wells of the country gone over.

Other General Work.

The less advanced students will do work of a more general nature along the river from Ashland to Louisville. They will be divided into squads and will then investigate the topography and general features of the country.

The study of the formations of the country near South Bend is a particularly interesting one, for this section of the state. Numerous different kinds of rock are found there and there is every facility for excellent work. The quarries along the line are always thrown open without question to the university parties, they having made themselves favorably known through past visits.

The trip will consume two entire days, the return not being made until late Saturday evening.

The field classes in geology 5 and 6 are spending two days studying the geology and resources of the Platte valley. About thirty-five members of the classes are taking the trip. These men are divided into several groups, each group being engaged in special studies of the topography, soils, and quarries. The party is under the leadership of Professor Condra and Instructor Bengston of the Department of Geography.
