Try Thornburg's Orchestra for your annual party. Second to none. Violin and wind instrument lessons given. Studio 416 So. 17th. Auto 5877.

**UNI CONSERVATORY IS NOW RECONSTRUCTED**

ADDITION BUILT ON THE OLD WOODEN STRUCTURE.

INTERIOR IS COMPLETELY REARRANGED

Better Facilities for Doing Work of the Astronomy Department Provided for Professor Sweezy's Classes.

During the past summer the old wooden observatory building used by the astronomy department was reconstructed outside and in and also considerably increased in size. Part of the new addition is used for an office by Professor Sweezy and the rest enlarges the study room to a length of twenty-eight feet. The outside of the new building is finished in white stucco, with a dark stucco base for contrast; inside the walls are light, with the wood trimmings separating sides and roof are painted brown, making a decidedly attractive color scheme. The metal roof and dome are painted white, as every observatory should be, to keep down the temperature in the instrument rooms. The stucco gives a decidedly more pleasing appearance than the brick veneer which was at first contemplated.

The inside has been refinished and refurbished. The floors throughout are covered with linoleum and the walls are decorated in a light brown. A transparency window provides room for the display of eighteen views and the department intends to fill it with transparencies of astronomical interest, such as views of planets, noted observatories, astronomical instruments, portraits of eminent astronomers, phenomena like eclipses, and other similar pictures that will make an instructive and pleasing display.

**New Office Room.**  
 The office room is planned like a modern kitchen, a workshop with everything within reach. There is no desk, that device of dark corners and disorder in most cases. Instead there is a little table which can be shifted to get the best light and can be kept entirely clear of office impedimenta by

**FARQUHAR**  
 Exclusive Men's Clothier

reason of the arrangement of the office. At the right and rear of the office and all within reach, are stacked filing cases, giving access to forty-five drawers and thirty pigeon-holes without moving out of the office chair. There is also a typewriter at the left, besides book sections and cupboard sections that can be reached by the additional effort of standing up.  
 The study room is not used for recitation purposes, except for two small classes; but it is used by about 120 students for consulting the department library, and for the study of the various celestial globes, armillary sphere and similar appliances of astronomy. The space under the telescope room furnishes an excellent dark room for astronomical photography, and for the making of the large and growing collection of lantern slides used in astronomy and meteorology.

**Future Needs.**  
 The university, while looking forward in the near future to a suitable observatory and better instruments for investigation and advanced work, built outside the city with its dust and smoke and jar of traffic, must always have a student observatory on the campus for easy access of the elementary students. Therefore the regents were willing to put this present building in its present attractive and convenient shape. The old building was very much out of date and no improvement was more needed on the university campus.

Jennie L. Fox, '99, is teaching in the high school at Montclair, N. J.

Charles W. Beal, '99, is dividing his time by performing duties as editor and attending to legal business.

Joseph A. Warren, '98, A. M. (Feb.) 1904, Ph. D. 1909, is in the U. S. department of agriculture, but still claims University Place as his home.

George Burgert, '98, for four years superintendent of schools at Kearney, has resigned his position to go into the banking business in the same city.

Harry D. Landis, '99, is one of the democratic nominees for the office of regent of the University of Nebraska. Mr. Landis is a successful lawyer at Seward.

George E. Condra, '97, spent another summer at Cornell in charge of the work in geography. Dr. Condra reports a large attendance and a very successful session.

Dr. George G. Hedgecock, '99, pathologist with the Library of Forestry, U. S. department of agriculture, Washington, D. C., is in Gage county, Neb., where he is conducting a preliminary survey of fungus diseases in trees. Just now he is examining trees for a fungus growth which has been destroying the heart of walnut trees in the south.
