Cash must accompany all orders for advertising, at the rate of ten cents for each fifteen words or fraction thereof the first insertion; three insertions twenty-five cents; five insertions forty cents.

THURSDAY, FEBRUARY 3, 1910.

THE COMING MEET.

A few men can always get together and make plans, but it takes many men to carry them out. No matter if the plans are as complete as brains and labor can make them, they will fall through if men are not ready to carry them out. The plans for the non-fraternity meet are complete down to the "dope" on the floor. It rests with the men to carry them out.

Real men are needed; men who are willing to tuck their trousers up an extra notch and don the gym shoes for the sake of glory. It is the spirit which has ruled the world for centuries. It is the spirit which moved

two tails, where the rest of the world saw but one.

GROUNDHOG DAY.

Early yesterday morning, while the freshman was snoring his last snore, the groundhog poked his inquisitive nose out of his hole somewhere way out on the prairie—and it was cloudy. The benches, long fallen into disuse, will once more be occupied. The birds will sing and the student will "sluff." It will be spring.

The story of the eleven-year-old prodigy of Harvard University, who lectures to gray-haired professors on "The Fourth Dimension" carries us back into the dreamland of our childhood, when Tom Thumb was the wonder and admiration of our heart.

If someone whom you have scarcely known or to whom you have not spoken for a month grips your hand warmly and with a bewitching smile says, "Hello, Bill!"—beware. He is a politician.

Apropos of the American gridiron casualties, the Yale Alumni Weekly remarks: "One has heard much talk recently of the iniquity of American football and of the corresponding gentleness of the English rugby. It is interesting, therefore, to read an account of the annual Oxford-Cambridge game, which was played a short time

tion with the Arnold company of Chicago. The election to fill the vacancy left by the resignation of Mr. Dye will be held next week.

PRES. HILL RECEIVES OFFER.

Former Nebraska Professor Receives Formal Offer of Presidency of Minnesota University.

President A. Ross Hill of the University of Missouri has been formally offered the presidency of the University of Minnesota at a salary of \$10,000 per year. President Hill was a former member of the University of Nebraska faculty. He was in the philosophy department. He was called to Missouri four or five years ago from this institution. Dr. Hill has not accepted the offer as yet.

Governor A. O. Eberhardt and four other members of the board of regents from Minnesota held an all day conference with Dr. Hill in Chicago a few days ago and made him the offer. The offer is causing Missourians considerable worry just now. Citizens mass meetings have been held urging the university to retain President Hill at any cost. Speakers declare he is worth more to Missouri than present salary. Student meetings have also been held to take measures to retain Dr. Hill. It is considered probable, however, that he will go to Minnesota.

the Greeks to contest beneath old Mount Olypus, in view of their gods. It is no different today, save in the trousers.

THE CROWD.

The crowded condition of the hallways in University hall between classes becomes at times annoying to a few of the students who happen to have some particular and immediate aim in life. Such was the case recently when a crowd attempted to go in one direction and an equal number attempted to go in the opposite direction. The inevitable happened. Nobody went anywhere—until someone discovered that by turning to the right he could pass someone else if they did the same.

COMETARY.

Nebraska is just recovering from an enthusiastic burst of astronomy which manifested itself in comet-gazing. Between "A 1910" in the evening and examinations in the morning it was a busy student body last week. But with the disappearance of the comet comes the news that an astronomer has discovered another one in South Africa. And from another source we are informed that Halley's comet is due sometime this spring. And last, but not least, an Arizona professor has discovered that "A 1910" had

ago in London. The list of casualties would be considered a fairly good one for a Princeton or Harvard game, but does not seem to have created the comment in England that the same number of accidents would have, if they had occurred here.

"One reads that Mr. Tair broke his collar bone, Mr. Turner had a bad concussion. Mr. Cunningham lost several of his teeth, and Mr. Gilroy was badly knocked about. In addition there were several minor mishaps. To the unprejudiced it would seem that the English game had 'nothing on us.'"—Cornell Daily Sun.

ENGINEERS TO THE ORPHEUM.

President Ira Dye Resigns—Will Accept Good Position.

The Engineering Society will go to the Orpheum theater in a body. This was the decision arrived at at a meeting held last night. The engineers decided that there were other things connected with a college course besides mathematics and gas pipe measurements. As a consequence a committee of the Engineering Society was appointed to see that the members got the required seats on the front row at the theatre.

Ira Dye, the president of the society, resigned his position at the meeting. He graduates at the mid-winter commencement and will accept a posi-
