## LACK OF TRACK MEN STARTS A CAMPAIGN

ONE HUNDRED MEN TO REGISTER  
FOR TRACK THIS WEEK.

### A GOOD CHANCE FOR NEW MEN

Every Man in the University Eligible  
for Cinder Path Work is Urged  
to Get Out for Work and  
Help the Team.

A campaign for more men. That is the word that the men of the university are passing around now. All of the men of the school who are interested in track work of any nature are being sought out in the dark recesses of the campus and are being brought into the field.

One hundred men is the minimum limit set for the men who are sought for to register for track work. These hundred men are to be found by the end of the week. Freshmen and sophomores and juniors and seniors are to be gathered in, and any man who has done track work of any kind is wanted. That a school of the size of Nebraska should have but sixty men out for track work is not to be considered by Coach Cherrington and Captain Burke, and they state that they will under present indications have a hundred men signed up for work on the cinder path by the end of the week.

#### Track Nearly Completed.

One thing which is working to aid the men working on the dashes is the fact that the new cinder track is nearly completed. The track, while it is new this year, will be in shape for the men of the squad to work on this spring, and the meet which is to be held in June with the University of Minnesota will be held on the new track. Every night for the past week the men of the squad have been working on the path, and at the present time the hundred-yard "straight away" is so nearly completed to allow the men training for the century dash to commence real earnest work next week.

The team this year is held back by the lack of experienced men in a large number of the track events. The men who are trying out have one of the best opportunities to make the team that has ever been offered university athletes. In the hurdles MacDonald is out of the race and this leaves the high and low stick events open and with only a few men training for them. In the broad jump Perry has been declared ineligible as he has participated in university athletics for three years. In the weight there are also vacancies, as Collins will not participate in track work this year so that he can play football next year. His absence leaves a hole in these events, but men are working daily to get themselves into shape so that they will be able to make a showing for the Scarlet and Cream in the heavy weight events.

With all these vacancies in the squad, the chance for new men to make the team this year is the best it ever was. The men of the freshman class are requested to get out and have the benefit of work under a coach and thus fit themselves for the team and the cinder path work next year.

#### Men Working Hard.

The men of the squad have been working hard so far this spring. In the weight events Gibson, Fleming, Temple, Shonka, Wolcott, Elliott and some of the other big men of the school have been working and practicing and have been obtaining good results in the work that they have had so far this year. In the hurdles, Flack is the only man out who has done work in this line, and he has been working faithfully. Coach Cherrington has been working with Fleming, and he has shown that he has some good qualities which can be developed.

In the broad jump Munson and Davis have been working faithfully, and these men have been able to put in some good work with so short a season of training. With daily work they will be able to win points for the Cornhuskers in these events. In the hundred-yard dash, Campbell is out on account of rheumatism, and Reed is the only man of experience who has run this race. Davis and Powers have been working on this event, and they have shown up well. In the other runs at least one and in some cases two veterans have reported for practice, and these men have been working other men who have done some long and short-distance running and in these events the university squad has shown up to a better advantage.

## WOOD WINS CHAMPIONSHIP

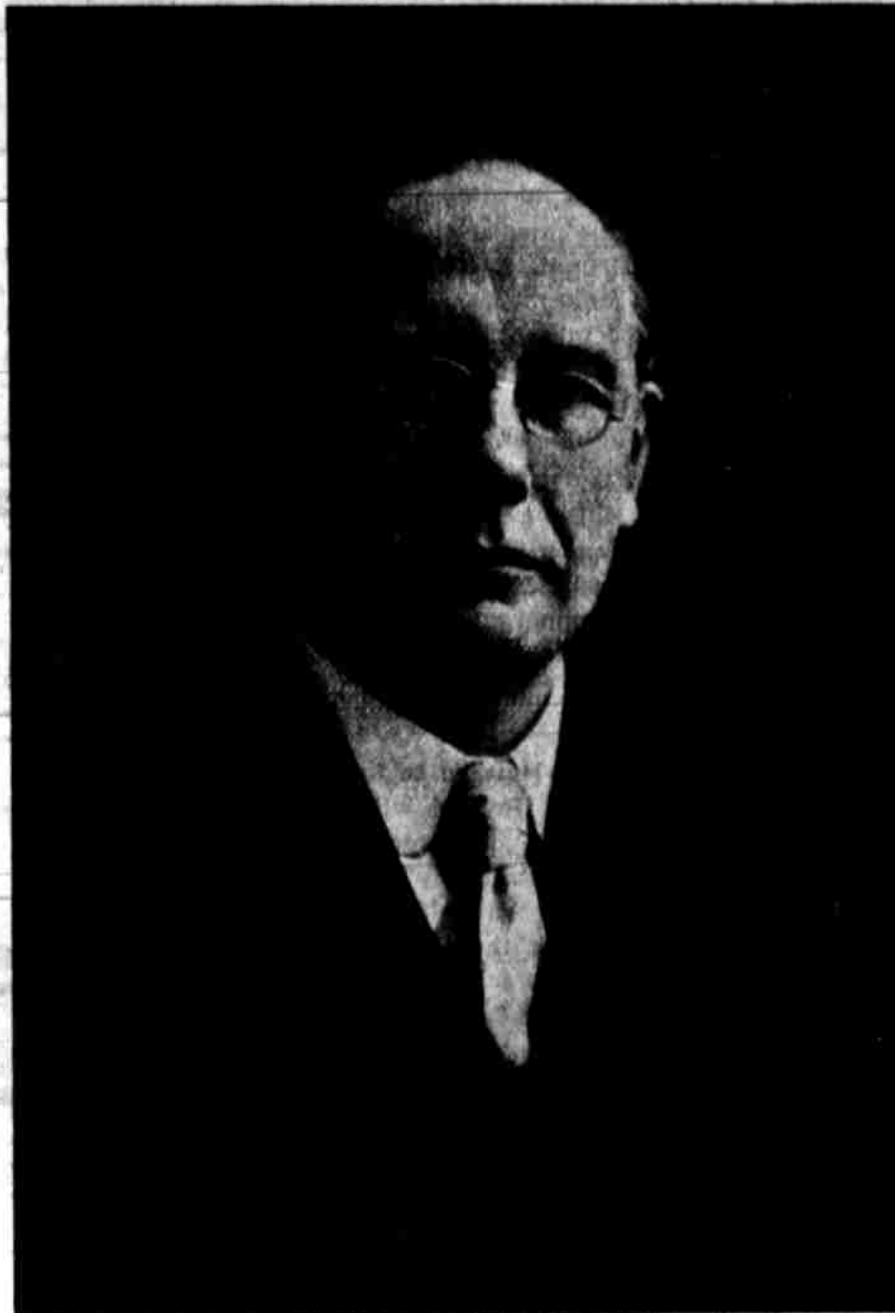

Fencer is Ineligible to Take Part in  
Intercollegiate Contest.

W. F. Wood Monday night won the university fencing championship and was awarded the shield donated by Dr. Clapp. Wood did excellent work and his victory was merited. His footwork was fast and his fencing form fine.

In the preliminaries Plasters won from Kissinger; Wood won from Bennett; Squires won from Lynde. Morgan drew a blank. In the semi-finals Morgan won from Plasters and Wood won from Squires. In the finals Wood defeated Morgan in a fast bout.

Wood has been prominent in athletics before, playing on the basketball team for several seasons. He is, however, a graduate student and for this reason cannot participate in the western intercollegiate meet to be held at Minnesota in the near future. Morgan will probably be Nebraska's representative there.

C. O. Morman, '04, has been elected superintendent of the Neligh schools.

Who Will Speak at the Banquet Tonight

## PROFESSIONAL BALL SAYS JAYHAWKERS

CAN'T FILL DATES FOR APRIL 15  
AND 16 IS RESULT.

### LOST TO LEAGUERS TO YESTERDAY

Team Slumps to Shut-Out at Hands  
of Lincoln—Good, Bad and In-  
different Ball Put Up  
by Varsity.

Nebraska will not meet Kansas on the Lawrence diamond April 15 and 16. Word was received from Lawrence yesterday stating that they would not play Nebraska. This will not affect the games with Manhattan today and tomorrow, however. The team leaves this morning for Manhattan.

The reasons given by Kansas for cancelling the dates was that she would not play against a team which allowed professionals to play. Nebraska, knowing that several of the men have played summer baseball, will not certify to an all non-professional team. Kansas, on the other hand, certifies to all of her team. As it is practically certain that some of the members of the Kansas team have played summer ball, the statement as to Kansas having an all non-professional team is considered in baseball circles to have little weight.

#### Play at Antelope.

The university baseball team journeyed out to Antelope park yesterday afternoon and played a game of ball with the Lincoln Western League team. The varsity seemed to have a case of stage fright and allowed the leaguers to get away with a 13 to 0 score.

Carr, a freshman, pitched the first three innings for the varsity. He refused to allow the professionals to score during the first two innings, but loosened up in the third and with

rather weak support let in six runs.  
Good Form.

Klepser, also a freshman, and Olmstead, one of the régulars, each pitched three of the remaining six innings. Both showed good form, and with good support would have held the Antelopes to a much lower score. Klepser made a sensational stop of a fast ball and succeeded in throwing the man out at first.

Ole Metcalfe played his usual star game and handled everything that came his way. He has been improving in his hitting lately and yesterday made one of the few hits that were made off the league pitchers.

Captain Greenslit played a steady game behind the bat and did some exceptionally good throwing. Radcliffe played in center field. The outfield positions were well taken care of.

The batteries were: Carr, Klapsner, Olmstead and Greenslit; Hartman, Harrington and Clark.

## FOOTBALL RALLY TOMORROW

Men to Meet in Armory to Discuss  
Plans for Practice.

A big football rally will be held tomorrow morning in the armory at 11 o'clock. All men interested in football are urged to be out. Speeches will be made on the new rules and the men will discuss the new rules.

At the present time about a dozen men have reported for spring practice. Assistant Coach Ewing wants to get enough men out so that two teams may be formed, and the men can practice offensive and defensive work.

All men who were members of the freshman team last fall are especially urged to be present at this rally as they are all eligible for the team next year. The new rules will be discussed by men of the school who have studied them, and formations based on these rules will also be considered.

Your car fare would pay for a nice lunch at the Boston Lunch. Why go home?

## PROMOTIONS MADE AT MEETING OF REGENTS

NEW DEPARTMENT CREATED IN  
AGRICULTURAL ENGINEERING.

### EXTENSION OF CAMPUS DISCUSSED

Budget for 1910 Approved—Report on  
Department of Nebraska History  
Received—Proposal on Medical  
Inspection Discussed.

The board of regents met yesterday in regular session and transacted a great deal of miscellaneous business. The board met at 10:30 and was in session until 4 o'clock, with the exception of the noon hour. After adjournment various matters were considered by the committees they had been referred to.

Some changes in the faculty were made as follows:

The following new appointments to positions on the faculty were made: Professor Herbert T. Brownell, to be professor of the theory and practice of teaching, the physical sciences, and superintendent of the training school.

Dr. John Clyde Moore, Jr., as clinical assistant in medicine at Omaha.

The resignation of Robert C. Ashby, adjunct professor of animal husbandry, was received and accepted. The board directed the secretary to express to Professor Ashby the regret the board feels in his resignation.

#### Promotions Made.

A number of promotions were made as follows:

C. W. M. Poynter, from assistant professor of anatomy, to professor of anatomy in charge; Geo. H. Walker, from assistant in anatomy to adjunct professor of anatomy; L. B. Pillsbury, from instructor in bacteriology and pathology, to adjunct professor of bacteriology and pathology; L. W. Chase, from professor of farm mechanics to professor of agricultural engineering and added to the station staff. Flora Bullock, from instructor in English, school of agriculture, to adjunct professor of English, school of agriculture; C. K. Shedd, from instructor in farm mechanics, to adjunct professor of agricultural engineering; M. H. Swenk, from adjunct professor of entomology, to assistant professor of entomology; A. D. Schrag, from adjunct professor of Germanic languages, to assistant professor of Germanic languages; Ellis Rall, from adjunct professor of animal husbandry, to assistant professor of animal husbandry; Sarka Hrbkova, instructor in Slavonic languages, to adjunct professor of Slavonic languages; Harriet Folger, associate professor of home economics; G. A. Stephens, from instructor in political economy to adjunct professor of political economy; L. E. Aylsworth, assistant professor of political science and sociology, to associate professor of political science and sociology; Alice B. Ensign, from acting adviser to women, to adviser to women; H. H. Everett, medical college, Lincoln, from instructor in surgical pathology, to instructor in clinical pathology and diagnosis; J. Stanley Welch, Lincoln, from instructor in surgical pathology, to instructor in clinical pathology and diagnosis, medical college, Omaha; Alfred Jefferson, from clinical assistant in gynecology, to instructor in therapeutics and gynecology; Wm. P. Wherry, from clinical assistant, to instructor in laryngology and rhinology; Chas. C. Morrison, from clinical assistant, to instructor in surgery; Chas. A. Hull, from clinical assistant, to instructor in surgery; James M. Patton, from clinical assistant, to instructor in ophthalmology and otology.

#### New Department.

A new department was created, in agricultural engineering, and a course
