MANHATTAN AGGIES WIN ANOTHER GAME

OWEN FRANK PLAYS GOOD GAME AT SHORT STOP.

FRESHMEN WILL PLAY DOANE TODAY

Freshman Team Presents an Array of Baseball Material that Should Make Up Championship Varsity for Next Three Years.

The Cornhusker baseball team was defeated in the second game with the Kansas Aggies by the score of 11 to 3. The Aggies batted like fends, but Thursday seemed to be the Cornhuskers' Jonah day, and they were unable to hit safely. The Nebraska boys fielded well and had they been able to hit the score would have been different.

Owen Frank held down the short stop position in Thursday's game and played a remarkably good game. He accepted seven chances out of eight. His throwing was a feature of the game. Captain Greenslit and Radcliffe alternated behind the bat, while Storms and Olmstead did the twirling. Just one year ago yesterday the Cornhuskers played these same victorious Jayhawkers. The result of that game was a different tale. The Kansas were smothered by a score of 14 to 3. It is thought that by the time they play their return game here later in the spring the local team will be in condition to turn the tables and get away with the long end of the score. The final result of the season cannot be judged by the result of the two games played in Kansas.

Freshmen to Play Doane.

The freshmen left this morning for Crete, where they will play Doane this afternoon. This game will probably be a fast one, at least Doane will have to play some very fast ball if any showing is made against the freshmen, as the organization composed of first year men is a whirlwind.

Two important games have already been played by the freshmen this year. They defeated the Aggies last Saturday by the score of 15 to 1. The Aggies were outclassed in every department of the game, especially in the batting. The freshmen batted the ball all over the diamond.

Wednesday the first year aggregation journeyed to University Place and played Wesleyan. The game was a tie at the end of the ninth inning, and the Methodists won in the tenth on account of an error. The batting of the university boys was the feature of the game.

The men who went to Crete today are: Hunt, catcher; Carr and Klepser, pitchers; Warner, first base; McKibbin, second base; Howard, short stop; Jamison, third base; Oliver, McKinney, Maury and Frank, outfielders.

Hunt is a catcher who should win his letter on the varsity next year. He caught for the Bles military academy team for three years and is well versed in all departments of the game. Carr is a Lincoln high school man. He has played in the city league for two or three years and was the mainstay of the high school team. His pitching this spring has been of A1 quality.

Classy Ball.

Klepser comes from Weeping Water. While in the high school there he was the terror of all the high school teams in southeastern Nebraska. He has lived up to his reputation this spring and has pitched some of the classiest ball seen on the diamond this spring. Both he and Carr are varsity material of the first class. Warner hails from Beaver City. He plays a heady game all the time and is a good batter. Jerry is expected to make two letters next year, one as an end on the football team and the other

for filling Jasper Clark's shoes as first baseman on the baseball team.

McKibbin comes from Lexington, where he played on the Lexington high school team. Mac is one of the best second basemen who has ever played on a university team. Howard is a Fremont high school man and played on the baseball team there. He has been putting up a fine article of ball this spring.

In contributing Jamison, Wahoo has added another university baseball star to its list. It is safe to say that there will be a fight for the first base position on the varsity next year. The four candidates for the outfield are all capable men. Oliver claims Randolph as his home, McKinney comes from Omaha, Maury is a Superior man, and Frank's home is in Grand Island. Frank has done some remarkable hitting this spring. In nine times at bat he has made seven hits, one of them being a home run.

ANTI-SPHINX ORGANIZATION.

Rumors of New Political Society Circulated Yesterday.

Rumors were circulated about the campus yesterday that a new organization was being formed for the purpose of opposing the Iron Sphinx. Who the persons at the back of the movement were is not as yet definitely known, although several prominent sophomores were mentioned in this connection.

The plan of the organization, as nearly as could be ascertained yesterday, is to form a band of thirty men and add to the number as the old men drop out. The object of the band will be to oppose Iron Sphinx in political affairs.

CHEMICAL CLUB INITIATES.

Five New Members In—Guests of Mr. Elley.

On Thursday evening the Chemical Club held an initiation in the chemical lecture room, the following men being taken in: Abbott, Barber, Sina-mark, Bishop and Templin.

The initiation was an exceedingly solemn affair and was greatly appreciated by the new men as well as the old.

After this part of the program, the men repaired to the chemical laboratory, where they were the guests of the club's secretary, Mr. H. W. Elley, who had prepared a most appetizing "feed." When the men had heartily cheered Mr. Elley, the meeting adjourned, everyone declaring the evening to have been most enjoyable.

SIGMA ALPHAS WIN ANOTHER.

Take the Big End of the Score in a Game with Betas.

Sigma Alpha Epsilon easily won from Beta Theta Pi Thursday by the score of 14 to 5. This was the first game of the year for the Betas.

Batteries—Seidel and May; Wilson, Bell and Buleigh.

Standing of the teams:

	W.	L.	Pct.
North Side—			
Sigma Chi	3	0	1.000
Phi Delta Theta	1	0	1.000
Alpha Theta Chi	2	1	.667
Delta Upsilon	0	1	.000
Phi Gamma Delta	0	2	.000
Phi Kappa Psi	0	2	.000
South Side—			
Alpha Tau Omega	1	0	1.000
Sigma Alpha Epsilon	2	0	1.000
Sigma Nu	1	1	.500
Kappa Sigma	1	1	.500
Delta Tau Delta	0	2	.000
Beta Theta Pi	0	1	.000
Phi Kappa Psi and Delta Upsilon did not play today owing to bad weather.			

Your car fare would pay for a nice lunch at the Boston Lunch. Why go home?

CHANCELLOR GIVES STATEMENT YESTERDAY

DEFINES HIS ATTITUDE ON FOOTBALL CONFERENCE.

NO SURGEON ON THE GROUNDS

Rugby Might Be Quite Dangerous—American Game Should Be Preserved if it can Be Made Reasonably Safe.

Inasmuch as there has appeared in the public press an account of reputed private conversation of the chancellor in regard to the attitude of the Nebraska delegates towards the Kansas City football conference, Mr. Avery has given to the Nebraskan the following as an authorized statement concerning his attitude in regard to the matter:

"Some time since I wrote to Chancellor Strong asking him if he regarded the Kansas City conference as necessary inasmuch as it seemed from the press reports that the national football conference committee was trying to make a revision in good faith looking towards the elimination of the principal elements of danger. His reply indicated that he thought that the conference would still be a very important one, and that he hoped as many of the Nebraska regents would attend as possible.

Should Be Revised.

"I have taken all along the ground that the rules of the game should be so revised that injuries to the players are not to be anticipated. It should not be considered necessary to have a surgeon on the grounds. The game should be no more dangerous, and the accidents to the players should not be greater in proportion to those taking part than in baseball and other virile sports. I am, however, inclined to believe that the national conference committee should be accepted as working in good faith, and that the new rules should be given a fair trial.

Might Be Dangerous.

"I am informed by experts that considering the vigorous way in which sports are conducted in America, the Rugby game might be quite as dangerous as the game is likely to be under the new rules. Further, I believe that the American game should be preserved if it can be made reasonably safe.

"While holding the above opinions, I shall endeavor to be open-minded at the Kansas City meeting. I would particularly disclaim the thought of presuming to state in advance how our regents will vote on any question that may arise. I may add, however, that if any decisive vote is taken the Nebraska delegates may be expected to show that unanimity of action and excellent team work which the members of the present board of regents always show in deciding matters of interest to the university."

ADDITION TO FACULTY.

Professor Brownell Well Known to Students of State.

The University of Nebraska appears to be very fortunate in being able to secure Professor Brownell of Peru as a member of its faculty in the teachers' college. His work is the theory and practice of teaching the physical sciences and he is also made supervisor of the training school, where his duties will be to assist in the supervision of the practice work in the teachers' college high school.

Prof. Herbert Brownell received his academic work at Colgate, his normal work at the Oswego (N. Y.) state normal, from which he graduated and later took post graduate work. He holds his degree of B. Sc. from Hamil-

ton college (N. Y.). Aside from this more formal training; he came to Nebraska in 1893 to take his present position as head of the department of physical sciences, with ten years of public school experience back of him. Along with the building of his department up to a position such that it commands not only the respect but the admiration of his contemporaries; he has given to the high school and grades manuals in physics, chemistry, nature study and astronomy which are being adopted not only in Nebraska, but in neighboring states. While Professor Brownell is known to all normal students as one of the best instructors in the state normal school (many have said in the state), he is remembered by them as more than an instructor, but rather as a teacher in all the breadth of meaning in that word.

GRADED ON MONEY SPENT.

University of Missouri Puts on Another New Stunt.

How would you like to be graded on the way you spend your money? That is what is happening to the students who take the first course in home economics. At the end of every month each girl in the class hands in an account of her expenditures for that month.

One of the requirements for the next account is that everything must be listed under either necessary or unnecessary expenditures. Last month the girls were not so restricted, and some of the lists were headed: Chafing-dish expense, board, pleasure, church and Y. W. C. A., and irregular eating.

One girl's pleasure column included nickleodeon expenses, what she spent for basketball tickets, for music and for having a guest at dinner. She had another column headed "irregular eating." The students are allowed to have what they call a D. T. W. section in their account. "D. T. W." stands for "don't tell what," and this section contains the amount spent, but does not tell for what it was spent. Some of the girls who do not begin to make their accounts until the day before they must be handed in find this section convenient. Other students do not use it at all. One girl, whose expenditures ranged from the price of a cake of soap to her dues for a dance, had every expense dated and accounted for.

When the different accounts are handed in the motives for the expenditures are discussed in class. Almost an hour was spent one day in discussing motives for buying things to eat.

ENTHUSIASTIC AFFAIR.

Speakers at Football Dinner Monday Night.

The football dinner to be held next Monday evening is to be an enthusiastic affair. The dinner is to be held in the Temple banquet room at 6 p. m. The plates will cost but 15 or 20 cents. Mrs. Condra is in charge of the menu, which means that a first-class dinner will be forthcoming. Mrs. Condra has very kindly acted in this capacity before for several football events and has achieved considerable reputation on account of her dinners.

Chancellor Avery, Dr. Condra and ex-Captain Jim Harvey will make short talks and others may be called on. There will be several alumni enthusiasts present.

On account of limited room, only football men can be accommodated. This means that every one who has interest enough in the team to get out next year and practice ought to be present. Plates can be ordered from Coach Ewing, Manager Eager or Captain Temple up to 10 a. m. Monday.

HAD NO RELATION WITH NATIONAL COUNCIL

CHAPTER OF T. N. E. AT NEBRASKA LOCAL ORGANIZATION.

CHANCELLOR RECEIVES LETTER

Officers of Fraternity Council Answer His Inquiry and Claims No Communication Had With Nebraska Chapter.

At an early date in the spring the two members of the Theta Nu Epsilon fraternity held an audience with Chancellor Avery and declared to him that as they were unable to make the names of the members of the fraternity public without the members who belonged to other fraternities opposed to Theta Nu Epsilon being in danger of expulsion, the fraternity of Theta Nu Epsilon had disbanded.

For several years Theta Nu Epsilon has been a fraternity in this university which has met with unfavorable comment in many instances, and on account of this a conference of several of the alumni members of the organization was held with the chancellor last year and he was told that the fraternity as it existed locally at Nebraska had no connection with the national council. In the reform movement the organization was compelled to either make public its membership or disband. As the members felt that it was impossible to do the former the latter plan was followed.

Question Arises.

The action of the former local chapter was taken in good faith by all concerned, until under date of March 1st the official publication of the national publication appeared and the chapter of Theta Nu Epsilon at Nebraska was listed in this publication as one of the chapters of the organization. This matter was called to the attention of the chancellor and he communicated with James W. E. Moss, president, and J. E. Hasbruck, historian of T. N. E. In reply to the chancellor's letter these men informed Chancellor Avery that at the present time the fraternity of Theta Nu Epsilon as a national fraternity had been in existence for but two years, and during that time they had attempted to get into communication with the chapter at Nebraska, but this was an impossibility, as the members of the chapter in this university has never answered their communication.

The letters from these officials of the national council of T. N. E. also stated that the national fraternity had been reorganized upon a new basis and that the fraternity was attempting to reform and live down the disrepute into which it has grown. These men wished that the chancellor or some member of the faculty accept an honorary membership in the fraternity of T. N. E. in order that the fraternity be given a proper position in the University of Nebraska and so that it could be re-established upon a basis having the sanction of all the members of the faculty and of the student body. The letters in all received from these men did uphold the action of the members of the local chapter in which they stated that they were local and were not connected with the national council, but did not re-echo the fact the local chapter had disbanded.

Dean Fordyce to Speak.

Dean Charles Fordyce of the teachers' college will deliver an address Saturday morning, April 16, before the Southwestern Iowa Teachers' association, which meets at Council Bluffs next week. Dr. Fordyce's subject will be the "Irrepressible Boy."
