

The Daily Nebraskan

Vol. X. No. 11

UNIVERSITY OF NEBRASKA, LINCOLN, SATURDAY, OCTOBER 8, 1910.

Price 5 Cents.

COYOTES ARE HERE TODAY

NEBRASKA VS. SOUTH DAKOTA
AT 3:30 P. M.

EVERY MAN IS IN GOOD CONDITION

THE DAKOTANS' STRENGTH ESTIMATED FROM GOPHER GAME.

Rooters Are Asked to Occupy the Rooters' Section and Make Up for Last Week.

Nebraska	Position	So. Dakota
Chauner	L. T.	C. Coffee
Shonka	L. T.	Barrett
Elliott	L. G.	Lyons
Collins	C.	Potts
Hornberger	R. G.	Downing
Temple	R. T.	Brown
Lofgren	R. E.	Saunders
Warner	Q. B.	P. Coffee
E. Frank	L. H.	Thackaberry
O. Frank	R. H.	Shuks
Rathbone	F. B.	Smith

Today at 3:30 the Cornhuskers will meet the Coyotes on Nebraska field for the second football game of the season.

Every man who will go into the game today is in the best of condition. So far none of the regulars have been injured in the slightest, although some of the scrimmage work this week has been hot and heavy.

Coach Cole put his squad through an easy afternoon yesterday, satisfied with the result of his work since last week.

While nothing is known of South Dakota's strength this year, the rooters are basing their estimate on the result of the Minnesota game, South Dakota 0, Minnesota 17, and are expecting the Dakotans to put up a real football game.

Both in signal practice and scrimmage the Nebraskans look fine. The new rules are becoming more and more familiar as time goes on and the new formations go through with a precision that is beautiful to see.

Today's game will see the first trial of a new scheme of identification. Each player has a large white number on his back which can be seen from one end of the field to the other.

Following are the players by number: 1, Chauner; 2, Shonka; 3, Elliott; 4, Collins; 5, Hornberger; 6, Temple; 7, Lofgren; 8, Warner; 9, O. Frank; 10, Rathbone; 11, E. Frank; 12, Minor; 13, Sturmer. These are all the numbers that have been given out.

The list of 'varsity candidates who have been given the signals to date, aside from the names already given, is as follows: Bucl, guard; Freitag, guard and center; Stelk, guard; Anderson, end; Balderson, end; Gutberlet, guard and tackle; Russell, end; Seldell, full; Sturmer, tackle; Hassall, quarter; Gibson, full; Harmon, guard; Minor, end and quarter; Elwell, half; Ray, guard.

Cole is pleased at the showing made by Seldell, who has not been in the game before this year. He plays a good game at full and may be given a chance today to show what he can do.

The cheer leaders want to see every student of the University who likes good rooting perched up on a bench in the rooters' section to make up for the rooting that was not done last Saturday. The rooting last week was not all it might have been and a better showing is desired for today.

University girls are invited to make use of the girls' rest room in Memorial hall during the afternoon before the game. It will be open until a few minutes before the game starts so that any girl deciding to go at the last minute will find a lady member

of the faculty at the rest room to act as chaperone.

The letter received from South Dakota gave very meager information, telling absolutely nothing of the team excepting the names of the players. It gave no weights and no names aside from the eleven men who were expected to start the game.

TRYOUTS TODAY.

Debaters to Discuss the Question of Closed Shop.

Twenty-six contestants for places on the debate squad are already entered for the preliminaries to be held today. Four additional men have entered since the last list was published

THE FRESHMEN BREAK LOOSE

THREE CANDIDATES START THE PRESIDENTIAL RACE.

PURDY, EPPERSON AND GILMORE

TWO ENGINEERING STUDENTS OPPOSE AN ACADEMIC.

Interest in the Sophomore Class Centers in Olympics—No Candidates Oppose Sears.

"Charles Epperson, a young man from Clay Center, is out for the presidency of the 'freshies.' Active part

is the promising man, who may be seen any evening giving the regulars a big scare out on the field. His friends claim that he will make a good race.

Nebraska City Man Announced.

William P. Gilmore of Nebraska City, is the other man who came down in the storm of presidential aspirants yesterday. Gilmore is an ex-Peru man and a graduate of Nebraska City high school. He was prominent as a debater and athlete at Nebraska City. Last season Gilmore was chosen half-back on the all-Nebraska football team, which the Nebraskan reporter has been informed was carefully picked, B. M. Cherrington being one of the committee. Gilmore is an engineering student. He entered the university at the opening of this semester. He has a goodly following.

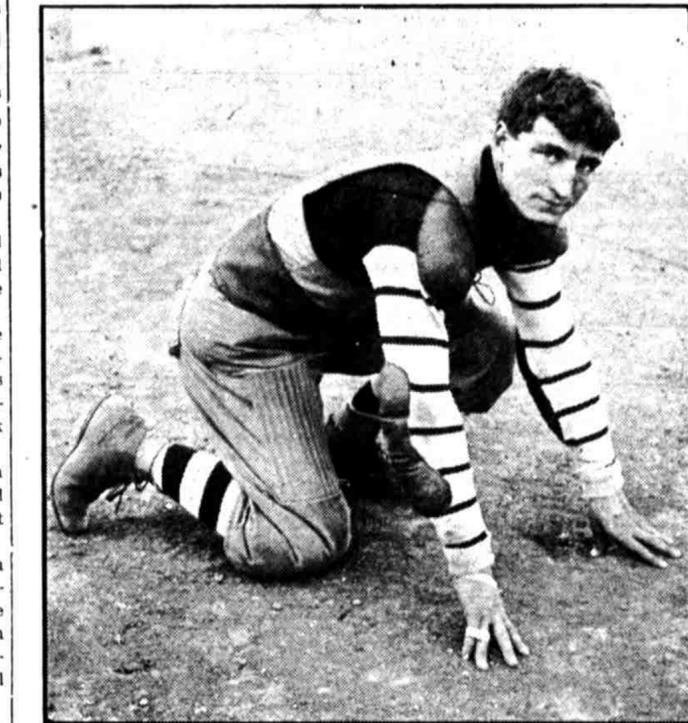

No Opposition.

Sears still has his own way in the sophomore class, but every day new rumors break forth regarding some new possibility. Several men are known to be considering entering the race, but it is generally believed that Sears will have the whole-hearted support of the classmen.

Class harmony will be preserved at all odds, because of the nearness of the Olympics, the annual class scrap with the freshmen. The class of 1913 were defeated last year and are determined to work together this year with a hard fight in sight. No definite plans, however, can be laid until after the election, when a committee will be appointed to engineer the campaign. Politics in the sophomore class are almost at a standstill. Sears, however, will undoubtedly be the choice of the class, unless some exceptionally promising black charger should come in at a handicap on the home stretch.

POLITICAL NOTICE.

The University Republican club will meet Tuesday night at 8 o'clock at the Republican County Central Committee room in the Lindell hotel on M street. Election of officers, and speeches by candidates. All Republicans come out.

W. F. CHAUNER
The Scrappy Little End Who Knows How to Receive Passes

W. A. Vasey, Law, '11, Beatrice, E. P. Snyder, '13, Council Bluffs; J. W. Jones, Jr., Law, 12, McCook; I. J. Andrews, Law, '12, Lincoln. The question is, "Resolved, That the movement of organized labor for the closed shop deserves the support of public opinion."

Eleven men will argue for the closed shop and fifteen will speak against it. The debates will be held today in Memorial hall, from 9:15 to 11:30 in the morning and from 1 to 2 this afternoon, and are open to the public. The speeches will be limited to seven minutes each. The judges will be members of the faculty.

CHANGE IN MEETINGS.

Student's Debating Club to Assemble on Wednesday.

A business meeting of the students debating club was held last Wednesday evening to formulate plans for the coming year. The meeting was called to order by President Andrews. A committee was appointed last year to recommend certain changes in the constitution. As chairman of this committee, H. E. Dixon made his report. It was decided to hold meetings hereafter on Wednesday evening at eight o'clock. The next meeting will be held in U 106 on October 12. All interested in promoting the debating work are urged to come.

The students of Clark College will form a good government club, named after the late President Carroll D. Wright. The club is to discuss questions of government, working largely through committees, which will make elaborate reports.

in high school last year, has good knowledge of law, bright fellow, good moral character."

The above brief was handed to a Nebraskan reporter yesterday by an enterprising young freshman, who summoned up courage enough to bring the slip of paper down to the editorial rooms. He left orders for the Nebraskan man to "write this out as you see it," and went on his way rejoicing. Epperson is a six year law student, who is at this time registered in the science and arts college. He was prominent in his high school at Clay Center.

The Candidates Out.

Two engineering students are now in the race for the first year honors. Three candidates came out, all in one day, after an extended political drouth. Leonard Purdy of Beatrice, and William Gilmore of Nebraska City are the two engineering men who jumped into the fire yesterday. The engineering students will be split up for the first time. Which man will receive the endorsement of the first year shop men? This seems to be the vital question of the hour. Both men are said to be popular with the classmen from their towns, but neither candidate has boasted of what he expects to do when the counting day dawns.

Purdy Some Athlete.

Leonard Purdy of Beatrice, Neb., was the first man of the three to have his name circulated about the campus. He is a graduate of Beatrice high school where he played football for the full number of years allotted to a high school player. He is a strong man in athletics, being the star of the freshman team and the hope of the first year men in their fight for the class championship this year. Purdy

GAS MAY BE PRODUCED

TESTS BEING MADE ON SHALE DEPOSITS NEAR FAIRBURY.

OFFICIAL REPORT IS BEING MADE

THE GEOLOGICAL DEPARTMENT WORKING ON THE PROBLEM.

May Mean a Big "Boom" for State of Nebraska—Exact Data Is Not Available.

The University of Nebraska geological department is at present performing some very valuable tests upon shale deposits discovered near Fairbury, Nebraska. A detailed summary of this investigation will shortly be subject to publication, but until such a report receives a warrantable scientific verification, no official remarks will be made.

During the latter part of last August, bituminous shales from Graneos formation, near Fairbury, were reported to Nebraska University authorities to be gas producing. Accordingly, Prof. N. A. Bengston, under the direction of Professor Condra of the geological department, visited the scene of probable action for the exclusive purpose of studying the deposits and collecting a representative number of samples.

A Critical Test.

Since that date, these samples have been undergoing a critical test. The first supposition that the shales were gas producing was easily verified. The second characteristic that the gas contained illuminating qualities was likewise duly proved. Farther than this, however, the authorities will only conjecture. Upon the one all-important fact that the shales may be capable of producing a sufficient quantity of gas to guarantee it good commercial possibilities, the scientists in charge of the investigation refuse to commit themselves.

The department justifies their non-committal attitude by the following issued statement:

"Some of the shale samples in question yielded fairly good results, but no exact data is available because of the insufficient number of tests performed up to this time. If possible, an officially verified report will be given to the press in a few days."

Located Near Fairbury.

The deposits under discussion are located about six miles north of Fairbury. It may be assured that intense interest and excitement is prevalent among Fairbury citizens pending the scientific analysis which is being applied to their shale samples. The publication of exact data that these deposits do contain commercial quantities will evidently be a "boom" to their city. The stock in the gas-to-be in the shale territory is very fluctuating, though, for various "scientific" reports have been issued; one to the effect that experiments showed a result of 10,500 cubic feet of gas to the ton of shale. If such a condition really existed, the possessor of the deposits could easily claim a fortune.

NOTICE.

* All University students are re-
* quired to correct their ad-
* dresses at the Registrar's office
* at once. This is important, and
* all the men and women of the
* University are expected to do
* this. The University directory
* is made up from the addresses
* in the office, and the Y. M. C. A.
* desires that the directory be cor-
* rect.
