"KING" COLE WINS THE VALLEY CHAMPIONSHIP FOR NEBRASKA

AMES IS PUT DOWN AND OUT— SCORE 24 TO 0

Iowans Put Up a Hard Fight, but Fall Before the Cornhusker "Steam Roller."—Temple Stars on Seventy-Four Yard Run

Nebraska won from Ames Saturday by a score of 24 to 0, the victory giving the Cornhuskers an undisputed claim to the Missouri Valley conference championship for 1910. The Nebraskans played with the same puzzling brilliancy and invincible strength which they used in wresting a victory from the Jayhawkers the week before. Ames never had a chance, and the Cornhuskers proved beyond all doubt that they are entitled to first place among the Valley elevens.

"King" Cole has made good, in spite of knockers. Predictions were numerous at the beginning of the season that there was nothing in it for the Cornhuskers but a list of defeats. To hear some people talk, Nebraska was scheduled for a season of utter gloom and more utter despair. But it all failed to leave any impression on "King" Cole. He went to work determined to give Nebraska one of the best pieces of football machinery he had ever seen. He succeeded. The Cornhuskers have gone over the Missouri Valley teams as effectively as a steam roller over so many peanuts.

After one more game, to be played here with the Haskell Indians on Thanksgiving day, the Cornhuskers will be banqueted in royal style and will retire from their activities in athletics. "King" Cole can go to his western orchards and pile up his fortune without leaving any disappointments behind him. The only thing left is the hope that the "King's" all-year successor will do as good work with the 1911 squad.

Ames Was Outplayed.

Ames was outplayed at every turn. The Nebraska goal line was never in danger, Ames getting the oval on Nebraska territory only a few times during the game. Nebraska's line plunges were non-stoppable, the Ames line breaking nearly every time the Cornhuskers put a play through. Rathbone went through center time after time, once tearing through for a gain of thirty yards.

The star play of the game was made by Captain Temple. With Nebraska's ball on their own thirty-five yard line, Temple got away on a fake end run and was pulled down on Ames' one-yard line. Rathbone went over the line for a touchdown on a line plunge.

Nebraska's backs played a brilliant game, hitting the line, pulling off forward passes, running the ends and putting up a splendid interference. Owen Frank was at his best and many times tore through the Ames tacklers for big gains without interference.

A Few Figures.

Here are a few of the figures of the game:

Nebraska gained a total of 517 yards on plays from the snapback in eighty-two downs, while Ames made 105 yards in twenty-nine downs. Nebraska made twenty-four first downs, while Ames made only four. Nebraska made nine successful forward passes for a gain of 137 yards, and Ames made four and gained forty-two yards. Nebraska lost twenty yards on penalties and Ames lost ten. Nebraska gained 420 yards on kicks and Ames

gained 680. Nebraska returned punts and kicks for eighty-three yards and Ames for twenty yards.

Ames played a stiff game and during the first quarter held the Cornhuskers without a score. Several times the ball was dangerously near the Ames goal line, but the Aggies put up a stubborn defense. During the last three quarters when the Nebraskans had commenced to score, it was not be-

A Large Crowd Soon Gathered to Watch the First Large University Fire.

cause Ames played a weaker game than in the first quarter, but because the Cornhuskers played so much faster.

Nebraska had the forward pass down to a science, playing it better than in any game this season. Out of twelve attempts only three were failures, the other nine going through without a bobble. Ames made four successful forward passes and four failures.

Game in Detail.

Nebraska won the toss and defended the east goal. Smith kicking to Nebraska's five-yard line. O. Frank returned twenty yards. The Nebraskans started with a rush, and on a series of end runs and forward passes, which were put through with such speed that Ames was bewildered, carried the ball past the center of the field and into Ames territory, where it remained the rest of the quarter. Nebraska went to Ames' ten-yard line and lost on a fumble which an Ames man fell on behind the line for a touchback.

In the second quarter Temple started things with his seventy-four yard run. Nebraska sent a fake formation around right end, Center Collins holding the ball. Temple followed past the center for the ball and went through what remained of the Ames line, with a clear field before him. Hurst ran him down and pulled him to

FIRE FIEND PARTIALLY EATS UP MECHANIC ARTS BUILDING

FOURTH STORY AND ROOF OF THE HALL CONSUMED

Loss Estimated at Upwards of \$12,000—Students Save Large Amount of Property—Defective Wiring the Cause

The fire loss of Saturday, when the Mechanics Arts building was badly damaged, has made no small amount of trouble for the university authorities. The first three floors will be cleared and ready for classes by Wednesday, but the laboratories of the medical school on the upper floors are out of service for a month or more. Anatomy laboratory work will prob-

ably be resumed until next semester. The fire loss of Saturday, when the Mechanics Arts building was badly damaged, has made no small amount of trouble for the university authorities. The first three floors will be cleared and ready for classes by Wednesday, but the laboratories of the medical school on the upper floors are out of service for a month or more. Anatomy laboratory work will prob-

which parallels the stairway from the top of the building to the basement. Strenuous work by students, armed with a few chemical fire extinguishers, failed to check the flames when first discovered. As soon as students collected they began a systematic attempt to save all that could be moved from the burning building. The student volunteers removed libraries, chairs, desks, and other furnishings in great quantities. These were stored in vacant rooms in nearby buildings. The amount saved in this manner from water damage totaled hundreds of dollars.

Water Damage Great.

Loss by professors was largely through the burning and water damage of books and library effects. The libraries on the two lower floors, including the valuable mechanical arts and Bohemian collections, were removed before the water did great damage. Those on the third floor did not fare so well. On the fourth floor was located the freshman drawing room. Here were some three hundred sets of drawing instruments, valued at approximately \$18 each. The loss on these may not be total, but in any case it will be a heavy one. The anatomy laboratories, which are also on the fourth floor, were completely wrecked.

Before the fire had been entirely extinguished arrangements were being made for reconstruction and for carrying on class work during the rebuilding period. A meeting of instructors in the building was called immediately by Chancellor Avery. It was then decided to use rooms in the Temple and in the new engineering building to house such classes as could here be accommodated. Shifting of some classes to other hours and the use of some additional rooms off the campus will provide for others.

The university carries no insurance, since the premiums would amount to many times the fire loss and the property of the individuals was largely non-insurable. The building was erected in 1898-99 at a cost of \$30,000. Superintendent Chowins and Dean Richards of the engineering college estimate that at least \$10,000 will be required to restore it to its condition before the fire. This will include an almost entirely new roof, a refitting of the fourth floor, and the installation of new equipment to take the place of some that was damaged by water. The walls are all firm.

As a result of the fire the registrar and his assistants have been confronted with the difficult task of providing recitation and laboratory rooms for the classes which previously met in the Mechanics Art hall. For the present the classes have been assigned to rooms in many of the other buildings. According to an announcement all classes which formerly met in that building on the first, second or third floors will reconvene there after Tuesday evening.

The Schedule.

The schedule for all classes Tues- Continued on Page 4
