GRADUATION THURSDAY

Nine Students of College of Medicine Are Candidates For M. D. Degree.

CRANE SPEAKER OF EVENING

The Commencement exercises of the University of Nebraska College of Medicine will be held Thursday evening, May 22, 1913, in the First Methodist Church, in Omaha. Dr. Frank Crane will deliver the address.

Candidates for the degree of Doctor of Medicine are:

- Milton E. Arnholt, A. B., B. Sc.
- Elliott C. Cobb, A. B.
- Frances Edith Haines, A. B., A. M.
- Waiter Frank Hammitt.
- Andrew Harvey, B. Sc.
- Joseph W. Laughlin, B. Sc.
- Ward H. Powell, B. Sc.
- Olga F. Stastny.
- Alfred E. Westervelt, A. B.

ZOOLOGISTS ON FIELD TRIP

Students of Department Invited To Chase Paramacia in Region of Ashland, May 31.

The Zoology club, the Journal club of the Zoology department, comprised of the members of the Faculty, and the graduate students of the department will spend the day, May 21, on an all-day field trip to Ashland.

This will be the last meeting of the Seminar for the Semester. During the year numerous reviews of recent experimental work of prominent Zoologists have been given by Miss Edna C. Mantor, H. V. M. Hall, and C. W. Mitchell. In addition the members of the faculty, Dr. R. H. Wolcott, Dr. F. D. Barker, and Dr. J. H. Powers, have given detailed reports of their original investigations. The purpose of these papers has been to stimulate interest in experimental research.

All of the meetings have been open to the public but the Ashland trip will be open only to those registered in the department, especially those taking Zoology 2, 2-A and 31, who may be interested. All who intend to go on this trip will kindly notify Miss Mantor, N-208 by Monday, May 26.

KOMENSKY MEETS.

At the Komenisky meeting last Saturday the following officers were elected for next semester: President, Albert Smrha; vice-president, Vlasta Sterba; secretary, Louise Dusatko; treasurer, Clara Janouch; sergeant-at-arms, R. A. Kavana.

Cornhusker Nine Will Clash with Several Major Iowa Colleges

Leaving last night, the Cornhusker baseball squad started on its second and last baseball trip of the year to play the leading colleges in the neighboring state of Iowa. The game with the South Dakota team last Saturday has been the only practice the team has had for several days on account of the inclement weather and wet grounds.

The first game played on the trip will be with the Highland Park aggregation which they meet this afternoon. On Wednesday the Simpson College team will be dealt with and Thursday Iowa State University will be the opponents. The next two days the athletes will linger around Ames in the hope of securing two victories from the Iowa State College team.

The Cornhuskers have fared extra well this season, suffering only one defeat and that at the hands of the Kansas Aggie team which also dropped a game to us. In meeting Iowa the Huskers are going up against the team which handed an unmerciful trimming to the Gophers last week. The Ames aggregation also is a good bunch. They broke even with the Missouri Tigers in the four games played this year.

If the pitching staff of the Cornhuskers is able to endure the week's strain in good condition, the Nebraska fans can expect a clean sweep of all games played the rest of the season.

The following will make the trip: Captain Towle, Beckoff, E. Frank, Flory, Haskell, Harte, Jamison, Smrha, Rodman, Underwood and May.

Miss Jessie Field, Y. M. C. A. secretary of rural bettermen works will speak at Tuesday evening vespers at 5 o'clock in the Y. W. C. A. rooms. Every girl is requested to be present.

ACADEMY OF SCIENCE

(Continued from Page 1)
 terest and other relating to distinctively Nebraska topics. The session closed with a feeling throughout the membership that as a means of bringing Nebraska's scientific people into touch with each other and each other's work, the Academy of Science is decidedly worth while, and that a growth in both usefulness and membership may be confidently expected.

Anticipations in Physiology

While those who form the teaching staff of the physiological department may, at this time, be in a mental state of conflict with reference to the desirability of removal of the medical school to Omaha, this uncertainty does not rest upon any doubt as to future material prospects of the department but rests, rather upon the rupturing of friendly ties and associations with the University proper. Materially considered the removal to Omaha is a step in advance. In a new building with greater floor space, with private rooms for advanced work, with a heating system capable of being shut off when necessary, with a promotion from basement rooms on a level with the dust of the street to the more cleanly level of the second story, with a laboratory equipment approximately equal to the present one, with presumably no lessening in the number of assistants and with an enthusiastic student body, the department may well look optimistically towards the future.

Although there will be no remarkable change in the manner of presentation of the subject, physiology, it remaining as heretofore, a laboratory and quiz course with occasional lectures and demonstrations, it may be anticipated that the work will acquire a greater and greater clinical flavor, and, that a greater demand will be made upon students in prerequisite or preliminary training. Such a demand will follow directly from the adoption of the concentration system in the curriculum, for under this arrangement students will have finished the major part of those studies dealing with structure before taking up studies like physiology, dealing with function.

NEW MEDICAL FACULTY.

Dr. Bridges will be the new dean while Dr. Wolcott remains at Lincoln as junior dean. Dr. Poynter, Dr. Willard, and Dr. Guenther will still preside over their regular departments. Dr. Cutter, in addition to taking charge of the chemistry department, will be secretary of the faculty. There will be changes in the pathology, bacteriology, and pharmacology departments at Omaha owing to the necessity of retaining the heads of these departments in their present positions.

In the clinical faculty, now at Omaha, there have so far been no changes.
