Dr. Clapp has kindly consented to help the military department by giving the cadets a course in calisthenics. About one-third the drill hours of the first-year men are now being devoted to these instructions. The second-year men will take up the work later.

BENGSTON'S BOOK A STANDARD

Laboratory Manual on Physical Geography Adopted by Many Schools.
Recent reports from the Chicago publishers indicate that Professor Bengston's Laboratory Manual on Physical Geography is coming to be the standard treatise for high schools the country over. It is being adopted by many high schools, especially in the east. New Haven, Connecticut, recently ordered over 300 copies and the sale for this year will run over 10,000 copies.
Before this manual was published it was tried out in the high schools of Nebraska by University graduates to insure its being a practical work. Its very wide adoption and use testify to its careful and accurate preparation.

K. U. MEN EVADE RULE.

To avoid the temptation of breaking training, the squad of varsity football men are not maintaining a "training table," but are boarding together at their own expense in order to obtain wholesome, muscle-making food at 1324 Vermont.
The menu consists of food which will keep the men in shape and no cake, pie, and other pastry are set before Mosse's warriors. The customary training regulations are being kept by the Jayhawker squad. Tobacco in any form is prohibited and the gridiron men are supposed to keep early hours.
DAILY KANSAN

Art Exhibit Soon.

There will be an exhibit of mural wall paintings, as photographs and original studies, in the University Art Gallery beginning with the end of this week. These paintings have been secured from the American Federation of Fine Arts at Washington, D. C. The exhibit will be here for two or three weeks, during which time the gallery will be open every week day and Sunday afternoon, free to all.

On the evening of September 24th, Doctor Condra addressed the National Farmers Congress at Plano, Illinois. Delegates were present from every state except two. Doctor Condra spoke on Nebraska's Development using views to illustrate his lecture. At the close of his lecture he showed the views of the Better Babies Contest held at the Nebraska State Fair. These views attracted the most interest of any single feature of the Congress and brought forth universal favorable comment.
