STUDENT COUNCIL

Tonight the Innocents, the Black Masque and the Girls' Club meet in joint session to determine the method of procedure in presenting the student council question to the students. Just what this method will be is a matter of some anxious conjecture by many on the campus. It has been rumored that perhaps they will decide not to submit it to the students in any form. But this is, we understand, not at all probable. We trust that these bodies will, in the near future, prepare the way for a constitutional convention of the elected representatives of the classes which will submit a definite plan to be voted upon.

The Forum

STUDENT COUNCIL.

At the last joint meeting of the three bodies that have been considering the student council its committee was instructed to secure more information and data and to give to each person at the meeting a copy of its report. This has been done and tonight these bodies meet again. What will be the result?

Many of those who will attend the meeting know little or nothing about the question. Others, especially those who have investigated and studied the question, are heartily in favor of such a council. A few others have determined that unless shown that there is a need and a demand for such a body by the students as a whole that they will oppose any attempt to establish it.

No one questions the sincerity and good faith of this last group. They feel that the established institutions should not in effect be overthrown or displaced by an organization of unknown or questionable merit. Attention, however, should be called to one phase of this question: the advisability or right of the three bodies which compose this meeting to determine whether or not there shall be a council.

In the first place, it should be remembered that the movement was not started in this joint body, but by one of them and a few members of the other two—incidentally the two which will be the most affected, were invited to assist in getting the movement under way. It has been argued that these three organizations are the three most representative bodies in school and would therefore be the bodies most competent to decide the question. In this respect it should be remembered that it is not impossible

that, dealing as they are with a proposition that threatens their power if not their existence, they may be somewhat biased, in spite of their desire to do that which is for the best interests of Nebraska.

It is not possible to prove that there is a need or show that there is a demand. In the first place, the upper classmen, because of the personal nature of the question, hesitate to express themselves. As far as proving a need, it can only be pointed out that there are now certain things that need to be regulated and bettered, but which cannot be handled by the existing bodies. Also it is a fact that other schools, through a student council, have obtained better results than have been obtained here. It has worked successfully at Colorado, Michigan, Kansas, Wisconsin, Leland Stanford, California, and a score of others of similar nature. Why not at Nebraska?

If the meeting tonight expresses itself opposed to a student council it will not kill the movement. It will come up again as it has in the past. It should now be put up to the students and be decided once for all. This is one of the most important periods in the existence of the University, especially from the student's point of view. Within the next few years the future of the institution will be molded and the students should be prepared to take advantage of it. There are many things desired by the students. They have not been obtained in the past and they will not be in the future unless the students themselves work for them. Either the existing bodies should be broadened and empowered by the students to represent them or a larger, broader, more democratic and more representative body, such as a council, should be organized. TODAY IN NEBRASKA'S HISTORY

March 12, 1902.

Rev. Dr. George of the Chicago Divinity School addressed the students at convocation yesterday. Dr. George lauded the ministry as a profession. He said it now requires men of the broadest culture. Good character and a thorough education are prime requisites, but in order to get the proper kind of men into the ministry the right sort of students must be influenced to attend the theological schools.

March 12, 1904.

A surging mass of juniors and seniors, engaged in a hand-to-hand combat, enlivened matters on the campus yesterday morning. It proved conclusively that some vestige of class spirit and rivalry still exist in this institution.
