**BIG EVENTS CENTERING
 ON ENGINEERS' WEEK**

Nebraska Academy of Sciences to
 Hold Meeting Day Before
 Banquet.

It seems especially fitting that the Nebraska Academy of Sciences should hold its annual meeting during Engineers' Week. Friday and Saturday, May 8th and 9th, those interested in the advancement of the sciences in this state will meet in the Mechanical Engineering building to discuss papers and transact routine business. The Academy is composed of sections as follows: Biology and Medicine, Ethnology and Folk Lore, Earth Sciences, Physical and Exact Sciences, and Engineering. The engineering students are naturally more interested in the engineering section than in any of the other sections, but they give the glad hand to all regardless of section. Speaking particularly of the subjects to be presented in the engineering section, we can assure you that all will be live topics and will appeal to the young engineer as well as to those of wider experience. At the general session in the morning, Mr. Hurd, of the firm of Hurd, Gerber & Wettling of this city, and recently chief engineer of the Nebraska State Railway Commission, will give one of the principal papers. In this he will deal with the possibilities in municipal control in the smaller cities of the state. This is one of the most engrossing economic problems in Nebraska at this time. The question, "How large should a municipality be before it can safely extend to its citizens power, light, heat and other public utilities and be sure of a safe return for running expenses?" is being asked by many people over the state. This opens up a large field for discussion and gives a glimpse of the problems to come up for settlement. In the afternoon session several papers of especial interest will be presented and every one is sure to be well discussed. Students are invited to attend the meetings. Friday and Saturday will be days of mutual interest. We will have a chance to become acquainted with the engineers and scientists of the state and these men in turn will have an opportunity to see what is being done for the state in the training of men for service by the Engineering College.

Invitations are being sent by the engineering section of the academy to all those interested in the science of engineering throughout the state and the student committee on Engineers' Week is making a similar canvass of the engineering alumni. The old grade who are out in active service designing and installing bridges, waterways, irrigation, power and lighting plants and other lines too numerous to mention, are requested to come back and spend a few days on the one week set apart in the year to the cause of engineering.

Along with the interesting features of the academy meeting of Friday will be placed "Engineers' Night." At this time all the laboratories will be operating and we will entertain our friends from 7:30 to 10:00 p. m. The banquet on Saturday night will close the week with a rousing good time. Remember that big men who are doing things will be here. Mr. Bion J. Arnold will be toastmaster at the banquet and expects to be here for the Friday meeting of the academy to take part in the discussion of the engineering papers. Names of other Nebraska sons of fame from a distance will be on the toast list. All engineers, young and old, are invited to be present upon every occasion when possible.

Botanical Seminar.

The following program will be given at the Sem. Bot. this evening at 7:30 o'clock:
 General Manuals.....Jeanette Nelson
 Local Manuals.....Margaret Hannah
 Books on Trees.....Lucile Hager

**LIFE INSURANCE WORK
 AS A REAL PROFESSION**

W. Winton of New Jersey Addressed
 Large Number of Political
 Students.

William Winton, superintendent of agents of the Mutual Benefit Life Insurance Company of Newark, New Jersey, spoke before the class in Insurance in University Hall yesterday morning on "Life Insurance as a Profession." The class in Money and Banking was given the privilege of listening to the talk and together the two classes filled a large room. From the interest shown there can be no doubt but what the scheme of having prominent business men talk before the classes in the Commerce department is a good one.

The speaker graduated from the University of Michigan ten years ago and has been interested in the insurance work ever since. He emphasized the fact that insurance is being explained and taught in the various schools throughout the country and that he would have given much to have had an opportunity to have received the training such as it is possible for the students of the Nebraska University to get along this line.

The insurance field is an endless chain of experience; it is a direct challenge to the mental capacity of every man at the work, and offers an opportunity to put in any amount of study, of not alone books, but of human nature.

Too many young men go into a thing thinking only of the money it will be possible for them to make. Mr. Winton said, "It is not a question of what my business is going to make for me, but of what it will make of me that interests me."

A first-class life insurance man should have some knowledge of law, medicine, finance and salesmanship as well as of the insurance business. The essential thing is that a man know his fellow man. He must be able to meet his every argument with a forceful answer and one that will convince. Many people have an impression that the main feature of the insurance business is the making of big interest on money loaned. Mr. Winton said that although this was important, the important thing is security. The funds of the company are placed where they are absolutely safe at the highest rate of interest under such circumstances.

According to the remarks of this man, who has made a study of this profession as well as practicing it, there is no field which offers more along an upright and moral line than does the life insurance business.

**FORMER FOREST CLUB
 PRESIDENT IN LINCOLN**

Makes Statement That About One-
 Seventh of Men in Forestry
 Are Nebraska Grads.

C. G. Bates, '06, now of Denver, chief of investigative work in District No. 2 of the Forest Service, is visiting here this week. The Forestry department was fortunate in securing Mr. Bates for three lectures on "Progress of Investigative Work in Forestry." Mr. Bates was one of the first presidents of the Forest Club and is now president of the Nebraska Forest Alumni Association. He is very much interested in the welfare of the Forestry school. In his lecture Mr. Bates informed the students that fifteen per cent of the men in the Forest Service are graduates of Nebraska, and out of this fifteen per cent there are more men in the investigative work than from any other school in the country. This is due to the fact that the foresters get the best botanical knowledge that can be gotten anywhere. Men who take part in investigative work for the government must be especially qualified.

EVERY man
 who takes any
 pride at all in ap-
 pearances should now be
 wearing a new spring hat.

By selecting yours from
 our complete and attrac-
 tive assortment you will
 be sure of thoro satisfac-
 tion.

Stetsons—both derbies and soft—ultra smart ones, or others correctly conservative; a judicious selection from which our expert hat man can easily please you—\$3.50, \$4 or \$5.

Imported hats from the foremost European makers, \$3 and up. Fay-Gorman derbies at \$3. And a feature line of \$2 hats that are without question the best possible at the price.

Co-eds Debate.

The first girls' intercollegiate debate ever staged at Kansas State University will be held on Friday, with Fairmount College. The Kansas co-eds have the affirmative side of the question while Fairmount has the negative. The question will be, "Resolved, That through appropriate legislation a minimum wage scale should be put into operation in the United States." Both teams are very enthusiastic and a warm contest is expected.

California.

Twenty-six Glee Club men were selected to make the European tour during the summer vacation. The club will leave Berkeley May 12, and on their way to New York will stop at some of the most important colleges and cities, giving a concert at each of these places. From New York they leave for London, thence to Berlin, Munich, Venice, Rome, Vienna, Switzerland, down the Rhine, Heidelberg, and then to Paris. The club will arrive back in Berkeley about August 1.

"RAH FOR THE BRADLEY!"

—the college man's sweater. Thick heavy and warm—smart, snug fitting and well tailored—will outlast the college course.

The Bradley Shaker is illustrated—a fine all-around, dependable sweater that will stand all you can give it, and more. The Bradley Navajo Shaker has a Navajo border deftly knitted in collar and around bottom in your college colors.
 If your dealer doesn't sell Bradley Sweaters, write us for the names of dealers who do. Make a stand for a "Bradley"—it will pay you.
