THE FOREST CLUB (Continued from page 3)

entirely by the club. Its objects are to place all deserving men of the forestry college in some position during the summer where they can learn practical forestry and supplement the theoretical training of the regular forestry course. Practically all the students in past years have been placed in the Forest Service, or some private work involving principles of forestry, for summer work, with the result that Nebraska has the reputation of sending out graduate foresters who are capable of doing practical as well as theoretical forestry from the start.

A national reputation has been made for the school and the club by the publication of the Forest Club Annual, which was the first publication of its kind in America, and received much favorable comment over the whole country as the best publication of its kind. It is very deeply regretted that conditions made it impossible to publish the book this year. Five numbers have appeared in the past six years and it is hoped that the publication of the Annual will be continued

Many special stunts have been staged by the club, including two or three dances each year. Two or three smokers and the annual pow-wow which is held each fall in some nearby grove. There is also the regular meeting every two weeks in which a lecture is given on some phase of forestry. These meetings are well at tended by an earnest group of students with note-book and pencil, who are trying to get the most out of their course.

TRACK TEAM TRYOUTS.

Fairness in Members of Team.

Coach Reed may not have a winning track team, but he has done one thing that is better. He has instilled an element of fairness into his squad that would be hard to beat. The spirit behighest.
