**NEBRASKA PROFESSOR TO GO TO PRINCETON UNI**

Professor Whitford of Geology Department Has Done Much Collection Throughout State.

Mr. A. C. Whitford, a fellow in the department of Geology, will leave Thursday evening to take up his duties with Princeton University. Mr. Whitford was to have collected for the University of Nebraska, as he did last year so successfully in Brown county, but the resources of Princeton are such that the University of Nebraska cannot meet it. During the field season of 1913 Mr. Whitford completed the geological survey of half of Brown county, collected several hundred samples of alkali waters, and found and brought in a great collection of the fossil animals of that region. This collection includes six or eight entirely new forms of animals and some thirty other better known fossil animals. He will be sent first to the Snake Creek beds in southeastern Sioux county, where he will collect and ship the material to enrich the cabinets of Princeton. His time will be spent in Nebraska until October or later.

**Les Miserables at the Magnet.**

A novelty is announced for a week's engagement at the Magnet theatre, beginning next Monday, May 4, in the shape of the famous French photo drama, which has been made from Victor Hugo's masterpiece, "Les Misérables."

The claim is made that this is the most fascinating motion picture ever taken. The claim is not hard to believe in spite of the wonderful contributions recently made to the motion picture world. Even a half hearted interpretation of "Les Misérables" could not be without tremendous appeal, and the film to be presented at the Magnet theatre is known to have been produced under the most advantageous and sympathetic conditions.

The interpreters were recruited from the leading theatres of Paris, and it took many months of rehearsal and preparation before the camera's assistance was enlisted. The actual cost of the production of the film is said to have been \$100,000.

The famous French actor, Henri Krauss, from the Theatre Sarah Bernhardt, Paris, was secured to play Jean Valjean, and he is said to have given a truly masterful interpretation of this most wonderful of fiction's characters.

The picture is in nine reels and constitutes an evening's entertainment.

**Senior Announcements.**

For several years it has been the practice at the University to quote prices to officers of graduating classes on commencement announcements, and they have added a profit to the announcements for the benefit of the class, which they represent.

Hereafter this will not be done, at least by George Bros. They have declared a policy of selling direct to the student body and giving them the benefit individually of the very latest product at the very lowest price. This policy will be maintained in the future regardless of whether they sell 100 or 10,000 announcements. This will mean a saving to every student. George Bros. have an interesting ad in another portion of the paper.

**Kansas.**

Several important changes have been made in the rules governing the major system at Kansas University. Forty hours may now be taken in a minor group instead of thirty. A maximum of twenty-five hours will be allowed in a single department. Juniors and seniors will be allowed to carry twelve hours a semester in a single group. Before only ten hours could be carried. The work of the junior and senior years must include a minimum of forty hours, chosen from the courses not open to either freshmen or sophomores. By this ar-

angement the graduate cannot get his degree on freshmen and sophomore courses.

**Kansas.**

"Student government is on trial for its life," said Chancellor Frank Strong of Kansas University. This statement was made with regard to the trouble that arose with the students a short time ago. The governing body should punish all lawlessness. They shrink when called upon to handle an unpleasant proposition. Dr. Strong says that the student council has been a failure and unless it makes immediate amends it will have to go.
