VOL. XIII. NO. 150

UNIVERSITY OF NEBRASKA, LINCOLN, WEDNESDAY, MAY 20, 1914.

PRICE 5 CENTS

## GIRLS' TRACK MEET

WILL BE HELD IN GYMNASIUM IN CASE OF RAIN.

## CO-EDS WILL RACE TODAY

Miss Gittings Expects Her Athletes to Break Records of Vassar and Berkeley—Classes Excused This Afternoon.

The girls' field meet will be held on the athletic field today, provided that it does not rain, and in that case the Gym will be the scene of the co-ed races. This is the last of the Gymnasium work for the year. About one hundred and twenty girls will take part in this meet.

Over fifty girls have registered for the 50 and 25 yard dashes. Competition is very keen. A few have signed up for the 8-pound shot put, and a number for the running high jump, low hurdles, the basketball and baseball throws.

The baseball game between the sophomores and the freshmen will be the feature of the afternoon's meet. The teams are very closely matched, one side possessing a catcher of renown and the other a pitcher who can throw fancy "coives."

The shortstops on both sides are particularly speedy, and the first baseman of the sophomores is a rival of some of the league players. The freshmen have a phenomenal batter, who has a record of dozens of "over the fence" balls.

It will be pleasing to the men to learn that they may attend this meet, and so will have no excuse for using the windows of the Engineering building.

Moving pictures of the meet, which will be shown all over the United States in the college's films, will be made.

## OFFICERS ELECTED FOR A. S. A. E. RECENTLY

Weeks Chosen President—Professor Chase Talks on Thesis Work for Engineers.

At a recent meeting of the A. S. A. E., officers for the ensuing year were elected as follows: D. P. Weeks, president; L. Rhodes, vice-president; J. P. Fairbank, secretary; J. G. Thompson, treasurer; W. C. Coupland, sergeant-at-arms.

Prof. L. W. Chase, professor in charge of the Agricultural Engineering department, furnished the entertainment of the evening by giving a talk on thesis work for engineering students. He said, in part, that nothing else for which one may register requires more work for so little University credit, yet it is a piece of work which throws the student upon his own resources, shows his initiative and capacity for doing things. The speaker urged that considerable thought and planning, if the student intends working out one, should be given to the thesis even in the sophomore year, an illustrated the importance of details in system, printing and binding, by comparing a number of theses written by students who were in his department.

## CORNHUSKER SOON

WINNERS OF THE PRIZE BOOKS ANNOUNCED YESTERDAY

## WEEK FROM THURS. - WATCH

Books All Printed and Now Being Bound—As Good or Better Than Other College Annuals—Many Surprises for Students.

Manager Swift of the 1914 Cornhusker stated today, while speaking to one of the "Rag" reporters, that the Cornhuskers would be distributed to the students in the Armory not later than a week from Thursday. The books are now off the presses and the binding, which will take from seven to ten days, has been started. The reason for the book not appearing as first announced is that the copy went to the printer much later than was at first estimated.

Swift leaves for Omaha today to look after the finishing of the job and to arrange for the earliest possible shipment of the books. His plans are to get a number of the books in through a rush order, so that he may be able to exhibit them in several of the business places of this city.

The make-up of the books is the best ever and no expense has been spared in making this year's Cornhusker equal or superior to those of other schools, as Minnesota, Michigan, Kansas and Wisconsin. The color work is magnificent, to use the expression of those in charge of getting out the publication. The bindings, which are of red morocco, and also of black cowhide, are far superior to any other binding ever used on the Nebraska annual. The paper is the finest possible to obtain for the color plates and cuts which will be used. "Every professor and student

## TICKETS FOR SOPHOMORE HOP NEARLY ALL SOLD

Few Left for Those Who Come Early—First Car Leaves at Eight—Where Are the Signs?

"Only a few more tickets for the hop left," is the way Chairman Frost of the Sophomore Hop expressed himself yesterday. About eighty of the tickets have been disposed of and all but a few of the remainder of the hundred and eleven have been spoken for. That almost means "You'll have to hurry." Great preparations are being completed for the event, which will without fail commence at eight-thirty. The first car will leave Tenth and O streets at 8:00 p. m. The last car will leave the Beach about 11:45 p. m.

The question in the minds of the committee in charge is, Where, oh where, have the four signs which were put on the campus announcing this event gone? Several days ago these perfectly good signs were placed where no loyal sophomore could fail to see and be inspired by them, but today—where are they?

## ALPHA KAPPA PSI A NEW HONORARY FRATERNITY

Object to Promote Scientific Research in Fields of Commerce and Finance.

Last Sunday a new fraternity entered the ranks of professional fraternities. Alpha Kappa Psi, a commercial fraternity, was installed, and which will draw all of its members from the School of Commerce. Its object is to foster scientific research in the fields of Commerce, accounts and finance and to promote and advance in American institutions courses leading to degrees in commercial sciences. It is restricted entirely to seniors and juniors in the Commercial department. A scholarship standard, further, is necessary, for each member must have at least an average of 80 per cent in all his school work.

Alpha Kappa Psi is a comparatively new fraternity, being founded in 1905 at the University of New York. At present it has six chapters, the new chapter here, Zeta, being the sixth. The other chapters are located at New York, Northwestern, Illinois, Denver, and Pittsburgh. With the rapid advance and growth in the department of Commerce in this University within the last year, the fraternity has seen fit to place a chapter here.

The installation took place at the Lincoln Hotel Sunday afternoon, when A. W. T. Oglivie, president of the fraternity and chief accountant of the Philborn Company of Chicago, formally installed the chapter. There are eight charter members, namely, Otis Taylor, John P. Robertson, Joseph A. Fillipe, Howard Harvey, Gilbert Loomis, Phil Southwick, Oliver Hathway and Ferris Laune. Besides the above named, Professors LeRossignol, Virtue, Stephens and Martin were taken in as honorary members.

## NEBRASKA RACKET CHAMPS OFF FOR THE VALLEY MEET

Guy Williams Unable to Go—Missouri Valley Tennis Tournament at St. Louis.

The tennis team, composed of Earl Meyer and Selvers Sussman, leave for St. Louis tonight to take part in the Missouri Valley tournament next Friday and Saturday. Most of the Conference schools will be represented and some stiff competition should take place. Nebraska suffered a severe blow in the loss of Guy Williams, the University champion. Last week he fell from a ladder and wrenched his playing arm so severely that he is unable to use it at all. His loss will be severely felt and will decrease the chances of the team materially. The two men going, however, are in pretty good trim and should, if all goes well, hold their own.

## MEDIC CONVOCATION YESTERDAY MORNING

Dr. William Milroy Spoke on the Profession of Medicine of Today—Great Strides.

Dr. William Milroy of Omaha gave the annual medical address at convocation yesterday morning. He spoke of the influence of the physician in the community and value of medical work in social reform.

The great strides that have been made in medicine in recent years is due largely to the scientific doctor. The old-time doctor experimented on patients; the doctor of today confines his experiments to the laboratory.

The medical profession never decreases in importance and there is always a demand for the efficient physician. The disagreeable features that are often met with serve to strengthen the character for crucial situations.

## OMAHA MEDICS SEND LETTER OF WELCOME

Invite Their Lincoln Brethren to Visit Them—Special Program Prepared.

The College of Medicine wishes to call your attention to the fact that they are expecting a great delegation of the boys from the campus who are interested in a medical course to visit them on May 22-23.

We hope to give everyone royal entertainment and a chance to see what we have in the way of a medical school here in Nebraska. Prominent medical men from all over the United States have visited us this year and without an exception these have pronounced the new University of Nebraska College of Medicine laboratory building as the best they have ever seen. It means to them that Nebraska intends to maintain a top place in medical education.

Remember, we are all of one body, and have common interests. We are one part of our great University and we do not intend to be a small part, either.

If you are interested in a medical course, we are here to welcome you Friday morning in Omaha.

Inspection of the new building and grounds, demonstrations in the laboratories, tennis and other athletics, picnic dinner, general reception by the faculty Friday evening, hospital inspection trips and special clinics are a few of the features planned for those two days. (Signed)

The Student Publicity Committee. College of Medicine.
