PRICE 5 CENTS.

REGISTRAR SPEAKS

GREER'S EFFICIENT FORCE IN TRIM—HANDLES THINGS WELL

SIMPLIFIED BY CARD SYSTEM

Be Prompt at the Appointed Hour and Facilitate Matters Materially in the Request of Those Who Bear the Burdens.

The instructions for registration this year are that: 1. All new students will FIRST consult the Registrar in Memorial Hall, west entrance. None of the following instructions apply to NEW STUDENTS.

2. All, except new students, first secure assignment and registration ticket—Memorial Hall 102—for an hour in which to have class assignments made and to register. Tickets are not sent by mail. Allow sufficient time to see your adviser and dean and to prepare your application before your hour of registration.

3. All, except new students, will proceed as follows to register after securing the assignment and registration ticket above:

1. Adviser in department office or in the Armory.
2. (If undergraduate woman), Dean of Women in Armory.
3. Dean of your college in Armory or (if in the College of Arts and Sciences) the Registration Board.
4. Stenographers in Memorial Hall to have application made out.
5. Assignment Committee in Memorial Hall.
6. Registrar's office.

Note: Your adviser will supply you with a slip which he will fill in and approve as your subjects for registration. This must be approved by the dean of your college. (Undergraduate women will secure the approval of the Dean of Women before going to the dean of the college). After approval by the dean of your college, go to the stenographers in Memorial Hall, who will copy the approved list of your subjects on the application blanks, the latter being given to you to take to the Assignment Committee and thereafter to the Registrar's office.

4. Be present at the Assignment Committee in Memorial Hall and the Registrar's office, Administration Hall 102, promptly at the quarter hours named on the Assignment and Registration ticket.

In the College of Arts and Sciences students are permitted to choose their elective studies without reference to majors and minors, but each student before graduation must complete at least two years' work in some one department (minimum 16 hours). Students who wish to specialize after one year of residence may select any department, with any professor in the department as adviser and may take therein a major or not less than 24 hours or more than 32 hours; such students shall retain the right to choose any elective subject aside from the major. (Students in the Teachers College shall meet the major and minor requirements for the University Teachers certificate.) At the end of the second year, any student who is not taking a major may select as his adviser any professor in the College of Arts and Sciences. Any student may change his adviser upon

consultation with the dean of the college.

All second year students in the College of Arts and Sciences will be assigned to advisers at the time of securing the Assignment and Registration tickets in Memorial Hall 102.

If a student does not secure a registration ticket by 6 p. m., Friday, September 11, or fails to present himself in readiness at the hour assigned on his ticket he may be compelled to register the week following the regular registration days, thereby incurring the penalty of paying the late registration fee of \$3.00.

Graduate students and city teachers may register during the week following the regular registration days.

Registration in the four-year course of the College of Medicine in Omaha holds there September 18-19.

To avoid confusion and delay have applications prepared and approved and everything in readiness in advance of your hour of registration. We count on your aid.

M. E. BECOMES AN M. M.

Member of Nebraskan Editorial Staff Has Married—Kept Secret Since April Eleventh.

Cloyd L. Stewart was married April 11, to Miss Edna Charlotte Kinnison, at St. Joe, Missouri, the ceremony taking place in the Episcopal Cathedral of that city. Mrs. Stewart's home is in Ligonier, Indiana, and for the past few years she has been with the Redpath Lyceum Bureau. The young couple had been acquainted for more than a year and their meeting came through their work on the Lyceum circuit.

Mr. Stewart is a popular member of the senior class and during his college career has been prominent in dramatics and newspaper work. He was president of the Junior class the first semester, and was made a member of the Innocents at the end of his Junior year. His home is in Laramie, Wyoming.

Mr. and Mrs. Stewart will reside in this city while Mr. Stewart completes his law course. They are residing at present at 426 South 12th.

APPENDICITIS CAUSES DEATH OF NEBR. MAN

Stebbins Was a Prominent Senior and One of the Energetic Students on the Campus.

Guy L. Stebbins of Gothenburg, Nebraska, and a senior in the University taking arts and sciences, died at 3 o'clock yesterday after a hurried operation for acute appendicitis. He completed his sophomore year at Wesleyan University where he was a member of the society of Everets. He entered the University of Nebraska last year and took up work mainly in the political science department preparatory to taking a four-year course in the Harvard University. Although Guy was in the University a comparatively short time he has left an indelible impression in the hearts and lives of us all. Shortly after coming into the University he was pledged and initiated into Delta Upsilon where he immediately became a moving factor in the activities of that house. His friends on the campus extend their deepest sympathy to his bereaved parents.

DR. CONDRA WORKS HARD ON MOVIES

Splendid Pictures of Aeroplanes in Flight Part of the University Extension Work.

Dr. Condra, head of the Geographical department of the University has been busy the past few days clipping and arranging moving picture films taken of the State Fair in action. Among them there is the first perfect film made of an aeroplane flight, a very difficult feat because of the clouds and the difficulty of keeping the camera properly focused. The Doctor's efforts have been directed along the line of soil conservation and it is to these ends that he is now devoting his time to the moving picture part of the University extension work. Since beginning his moving picture plan Professor Condra has reached over one hundred and twenty thousand people who would otherwise perhaps never have known anything of Nebraska University's really practical and beneficial mission among them.

PROMINENT PAPER REFERS TO UNIVERSITY

State Fair Exhibit Played up by the Omaha World-Herald—School People Active.

In exhibiting some of its work at the state fair this year and in illustrating there the field it is designed to cover, the state university has taken another step toward closer contact with the people of Nebraska. It has opened up an entirely new channel for publicity of the big school. It has also indicated that in the future it will endeavor not only to cater to its students but to actually reach out and grasp ordinary taxpayers and compel them to listen to information about the higher educational side of the gigantic corporation in which they are stockholders.

The interest taken in the exhibit shows that there was an immediate and manifest response on the part of those whom it was intended to reach. Many people learned more than they ever knew before about the university. They so expressed themselves fully and frankly. They appeared to be delighted with the opportunity of obtaining this information. Many who viewed the exhibit in fact became interested enough to visit the university itself later on. Scores of men and women denoted astonishment at the variety and thoroughness of the courses offered and at the multiplicity of activities present in such an institution. Many of these men and women were parents of boys and girls who are students now at the university or who have graduated. And the greater share of them admitted that their previous knowledge of the school and its life had been very limited. They promised to keep in closer touch with it in the future. Their interest was obviously stimulated or entirely recreated by the exhibit.

This year's exhibit was in the nature of an experiment. If the heads of the school are wise, if they have listened to the comment and commendation of those who saw it, they will continue it year by year in enlarged form. There is much to gain from

such an exhibit—both on the part of the university and the students to come. The more the people know about the school the more intelligently will its needs be met and the more readily will the taxpayers be responsive to changes which will better enable it to carry out its mission in state life.

The university is of increasing importance to the people of this state. The sooner all the taxpayers become acquainted with its possibilities and the principles under which it must be conducted the sooner will it be removed from the field of uncertainty. The school has a secure place in Nebraska hearts. Its future means much to those who have passed out of its halls as well as to those who are destined yet to enter them. When Nebraskans know their institution they will do nothing to endanger its prospects. Its life will then be of more serious concern to them than that of any other governmental institution.—Omaha World-Herald.

HAND BOOK OUT FOR BENEFIT OF STUDENTS

Students Flock to the Office in Order to Get One of the Booklets—Ready Demand.

The "N" book is out. A copy can be secured free at the Y. M. C. A. headquarters in the Temple. Hundreds are already gone.

The editorial staff was: Glenn S. Everts, editor; Hugh M. McVicker, associate editor; Gertrude Scribner, associate editor; Paul L. Martin, business manager.

This handbook is valuable to all students and especially the freshmen. In it is found a list of all student publications, student organizations, fraternities and sororities; also athletic records and a football schedule for this fall.

Don't make fun of Andrew Carnegie. If Europe had followed his plan of disarming and settling squabbles at the Hague, there would have been no war.

AWGWAN TO BE READY FOR STUDENTS SOON

Helmet and Quill Society Composed of Thirteen Members Will Put Out Publication.

The first number of Awgwan, the University funny book, will be off the presses soon. Awgwan is published every two weeks by the local wits and artists and the management promises a number of new features for this year's paper. The cover will be run in three colors and the book will be well filled with jokes, essays, illustrations and campus poetry.

Awgwan is published under the auspices of the Helmet and Quill Society, an organization of thirteen men interested in the welfare of the paper. New members are taken into this society at the end of each year from among the most active contributors.

Awgwan was started two years ago in response to the need for a paper such as most of the big eastern universities possess in the form of Cornell "Widow," Harvard "Lampoon," and it has rapidly taken its place among the foremost university funny books of the country.

FOOTBALL PRACTICE

MANY OF THE OLD MEN BACK AND READY FOR FALL PRACTICE.

COACH STIEHM SAYS LITTLE

Regular Work Begins Next Monday But Several of the Men Are Already Seen at Their Daily Exercises.

As is usually the case at this time of the year Coach Stiehm finds a real joy awaiting him. The thunderbolt that he carefully forged last fall and polished up last spring has developed several flaws during the summer. It will do to hurl against Washburn and Morningside perhaps, but it will take a team of real championship calibre to out-score such opponents as the Jayhawks, Hawkeyes, or the Michigan Aggies.

A first class center must be developed. Roy Cameron, the handsome smashing tackle of last year's eleven seems a likely candidate for that position. Also two ends must be found. The man who tackles any task without a goal in view is handicapped. Stiehm finds himself doubly handicapped, for neither Beck nor Mastin, stars of the outside positions last year, will be back. The rest of the line looks strong with Captain Halligan, Cameron, Abbott, and Ballis, all veterans on the job, and Corey, Caley, Fouts, Norris, Richards, and some others to pick from.

In the back field will be Dick Rutherford of the Titian locks and the loud war cry, and Howard with his masterful toe. Around these two Stiehm expects to build a record scoring machine. For the other two back field positions he will have Porter, Wilson, Hawkins, and several others to choose from. There is a rumor that Herb Potter, who won an "N" in nineteen-twelve will register this week. He should make a strong candidate for that position, if he decides to try for it.

Guy Chamberlain, the big ex-Wesleyan athlete who was the sensation of last year's Freshman team, is uncertain as to whether he will return to school. In a letter to Coach Stiehm he explained that he was thinking seriously of staying out of school this year. He may yet decide to come. If he should fail to appear it will be a hard blow to Nebraska's prospects for a championship team.

What the Coach Said.

In regard to Nebraska's prospects for a championship team, Coach E. O. Stiehm is inclined to be non-committal to say the least. "It won't do," said he, "for us to be too enthusiastic over our prospects. Prospects at this time don't justify it."

Freshmen! Freshmen!!

There is a position in the business department of the Daily Nebraskan open to an energetic freshman who has either had experience in the newspaper business or is interested in that class of work. This position will give the right kind of a man a training that will permit him to apply for a higher position during the next school year. Write either to the business department of the Daily Nebraskan or see personally Frank Perkins or Russell F. Clark.
