Boston and Heaven
"I understand," said a visitor from Philadelphia to a friend in Boston, "that you have so high an opinion of your city that you think heaven must be like Boston?" "Well," was the reply, with a shrug of the shoulders, "I believe I did say so some time ago, but you know Boston has improved a great deal in the last few years."—Birmingham Age-Herald.

Ayrshire Makes Big Record
Lady Lincoln, one of the comparatively few Ayrshire cows in Nebraska, and owned by the State University dairy department, produced in one year 14,778 pounds of milk and 511.57 pounds of butter fat, according to a test recently completed. This is said to be probably the largest record of any Ayrshire cow in Nebraska. Lady Lincoln was seven years and seven months of age when she finished her record and has completed five yearly milking periods which average 11,798 pounds of milk and 397 pounds of butter fat.

Although there are only a few Ayrshire cattle in Nebraska, dairymen say that they are giving excellent satisfaction where tried and are gaining in popularity. The Ayrshire cow is noted for her hardiness and her ability as a rustler. It is characteristic of her to give a rather large amount of milk of average richness. The breed has not made such phenomenal records as the other leading dairy breeds, but as a rule the cows are persistent and economical producers of both milk and butter fat.
