## WILL COLLECT UNI. TRADITIONS

PROFS. CALDWELL AND SHELDON  
OFFER NEW COURSE

Student Work to Be Accepted as  
Undergraduate Theme or  
Graduate Thesis

In order to collect in permanent form a record of the traditions of Nebraska university, Profs. A. E. Sheldon and H. W. Caldwell will offer a special course in Nebraska traditions and accept either as an undergraduate theme or a graduate thesis, a history of the traditions of the Cornhusker school. In addition to the acceptance of the work for full university credits, Professor Sheldon has announced that there will be at least \$25 and possibly more available for the student who writes the traditions, as well as other money for his expenses in collecting material.

The idea of collecting a book of Nebraska traditions originated with the Innocents. The proposition was broached to Chancellor Avery, who announced his full sympathy and co-operation, and suggested that university professors might be found who would take charge of the work. Professors Caldwell and Sheldon are enthusiastic over the plan and want to co-operate in every way possible to get the traditions collected.

The collection, when completed, will probably be published as a tradition book for the university, and may be made a syllabus as a part of the history of the state by Professor Sheldon, who is director of the legislative reference bureau. The honorarium of \$25 and the acceptance of the work as a thesis or theme, is made to insure the work being done in a scholarly manner.

Any student who is interested may secure more information by talking to either of the professors who have the matter in charge. It has been suggested that the work could be done as a graduation requirement of someone who will complete his education in the summer session, or by someone who will graduate during the school year 1916-17.
