

**DOCTOR MAXEY
TURNS BENEDICT**

Nebraska Law Professor Leaves for Colorado with Bride

Dr. Edwin Maxey, of the university law faculty, and Miss Helen Snyder, of this city, are to be married at the home of the bride, 1555 South Twentieth street, at 4 o'clock this afternoon. The couple leaves tonight for Boulder, Colo., where Dr. Maxey will

DR. EDWIN MAXEY

teach at the summer session of the University of Colorado.

Miss Snyder is an alumna of the university, class of '09. She is also a graduate of the Conservatory of Music and has been a teacher in the Lincoln high school during the past year.

Dr. Maxey is well known as a teacher of law and a writer on legal and political topics. He has held the chair of International Law and Diplomacy at the University of Nebraska since 1906. He took his undergraduate work at Bucknell, and his doctor's degree at the University of Chicago. Among his writings are a text book on International Law, "Some Questions of Larger Politics," and "Triumphs of American Diplomacy." In the May issue of the Illinois Law Review, Dr. Maxey has an article reviewing Borchard's "Diplomatic Protection of Citizens Abroad." He is also author of articles in the current issues of the American Law Review and the Yale Law Review.

Students of Dr. Maxey are celebrating the great event, but bachelor friends are looking askance at the desertion. It had been hoped from his faithful service in the ranks that he would remain loyal, but his attitude at present, as seen in the picture,

seems to be "Good-bye Boys' I'm Through."

CONVOCAATION

The first convocation of the session was held on Monday. Professor Reed announced a tentative program for the daily programs and introduced Chancellor Avery, who welcomed the students of the summer session to the university. The chancellor commended the studious attitude of those in attendance at summer sessions and spoke of the rank of Nebraska university as an educational institution. We rank twelfth in total attendance and twentieth in total expenditures among the universities of the country.

Dr. Riley, one of the leaders of the School of Superintendence, was introduced to the audience.

On Tuesday, Dr. Monroe, of Kansas, another of the educational leaders at the School of Superintendence, spoke on "Problems of Education." Dr. Monroe emphasized the importance of vocational guidance as one of the functions of our educational institutions.

"Environment no longer teaches the child his vocation. This is the problem of education.

"In every profession we are demanding a higher degree of preparation."

The speaker commended the growth of manual training, domestic science, nature study and agriculture in our public schools.
