

Summer School Nebraskan

VOL. I.

UNIVERSITY OF NEBRASKA, FRIDAY, JUNE 9, 1916.

NO. 3.

SUPERINTENDENCE SCHOOL ATTENDANCE INCREASING

INTEREST AND ENTHUSIASM ARE
ALSO GROWING

Dr. A. E. Winship, National Figure
in Educational World,
Comes Today

The School of Superintendence is showing a steady increase in attendance from day to day. School men are still coming in from all parts of the state. The excellent addresses by experts in their respective lines are being listened to with more than ordinary interest by superintendents and principals from all sections of Nebraska. Words of appreciation for those instrumental in providing this special school are frequently heard.

One feature of the meeting that has developed into one of the most interesting phases of the program is the round table. Lively discussions are being conducted at this hour daily.

Dr. Monroe, of Emporia, Kan., an expert in educational measurements, concluded his series of lectures yesterday. He will be followed by Dr. A. E. Winship, editor of the New England Journal of Education, published at Boston. Dr. Winship is a man of prominence in the educational world. He is no stranger to Nebraska, as he has lectured and done institute work in many counties of the state. He is a pleasing speaker and knows how to hold his audience. He always has something to say that is worth while.

Talks by Superintendent Riley, of Springfield, Mass., on the junior high school are particularly timely and pertinent for Nebraska educators, many of whom are attempting the junior high school scheme of organization.

State Superintendent Thomas spoke at the Thursday afternoon meeting on "Some Evidences of Teaching Efficiency."

The following is a list of some of the school men of the state who are attending the School of Superintendence:

W. J. Jennings, Deshler.
M. E. Piper, Holbrook.
W. G. Brooks, Plattsmouth.
E. K. Frey, Syracuse.
Wm. Schacterle, Culbertson.
L. E. Chadderdon, Oxford.
J. T. Anderson, Ashland.
R. M. Campbell, Columbus.
E. M. Collett, Sioux County.
W. H. Coleman, Crawford.
J. F. Demel, Homer.
L. F. Dickerson, Lawrence.
J. F. Duncan, Osceola.
C. Ray Gates, Blair.
W. B. Ireland, Fullerton.
Conrad Jacobson, Bancroft.
C. S. Jones, Ord.
W. A. Julian, Wood River.
J. J. Klima, Shelby.
Earl Lantz, Ravenna.
E. D. Lundak, Pierce.
R. R. Miller, Mead.

(Continued on page 3)

WHO'S WHO IN THE SUMMER SCHOOL

Charles Fordyce, Ph. D., Dean of the
Teachers' College
One of the foremost educators of

Nebraska is Charles Fordyce, Ph. D. He is dean of the Teachers' college and professor of Educational Theory and Practice, and is also head of the Department of Educational Theory and Practice. Dean Fordyce is very active along educational lines, being a director of the Nebraska Bureau of Educational Research and Measurements, and also a director of the National Association of Educational Research.

During the summer session, he is giving some valuable courses that will prove of benefit to the teachers of Nebraska. One of these courses is upon the technique of conducting educational measurements in Nebraska. During the past week, Mr. Fordyce has been in charge of the School of Superintendence. He is desirous of helping the teachers in summer school in any way possible. His office is in Administration hall 105, office hours from 11 to 12 o'clock daily.

DR. F. M. FLING LEAVES FOR TENNESSEE

Dr. F. M. Fling, head of the Department of European History at the university, will teach at the Peabody Teachers' college at Nashville, Tenn., during the summer. Peabody college has the largest summer school for teachers in the west, exclusive of Chicago.

Dr. Fling leaves Lincoln next Tuesday. He will offer two courses at Peabody during the summer, one on history teachers' methods and one on modern European history, treating the causes of the present war.

Dr. Fling recently returned from Washington, where he was the delegate from this state to a convention of the League to Enforce Peace. About 800 delegates were in attendance at this convention, which created such great comment because of the public interest in plans for preventing future wars.

SUPT. RILEY SPEAKS AT CONVOCATION

Prominent Eastern Educator Discusses Methods

Superintendent Riley, of Springfield, Mass., spoke at convocation, Thursday morning. He said all the people of the world can be divided into two classes, the leaders and the followers. Of these two, teachers should be of the first class, and the keynote of teaching is leading. Because of these two classes of people, there are two classes of teaching: the one dogmatic and the other scientific. The dogmatic method is employed when the teacher, mother, father or clergyman assumes to state the authority, leaving the pupil nothing to do but to accept it. The result is a blindfold, he asserted. This is kind of teaching a monarch might well wish his subjects to have, but we do not need such teaching for our citizens.

NEW CHEMISTRY HALL CORNER STONE LAID

Building to be Completed in September—One of Largest in West

The corner stone for the new Chemistry building was laid, yesterday afternoon. The ceremony was attended by the chemistry and pharmacy faculties. In the stone was placed a box containing pictures of the chancellor, Professor Nicholson, the first chemistry professor of the university, and of the honorary chemistry fraternity and sorority. As an added symbol, the graduate students in chemistry deposited samples of the substances with which they are experimenting. A program of the dedication exercises for the present Chemistry building was also enclosed.

The contract for the new building calls for its completion by September 1 of this year, but strikes and shortage of building material have caused some delays. The cost of construction, exclusive of equipment, is estimated at \$170,000. It will be one of the finest chemistry buildings in the west, exceeded in size by the plants at only three other schools in this section, Minnesota, Illinois and Ames. In size, it is to be 94x175 feet. It will have four floors for laboratory purposes, three small lecture rooms and one large lecture hall, in the shape of an amphitheatre, a large library, and a museum of chemical compounds.

Chemistry hall and the Bessey building will be the first of the group of splendid buildings which will cover the enlarged campus.

TENNIS TOURNAMENT PLANNED

Enthusiasts of the game of thirty love will be glad to hear that a tennis tournament is being planned for the summer. Last year's summer school tennis club is to be continued this year, and the tournament will be organized if enough interest is shown. Membership may be obtained by paying a fee of 50 cents at the students activities office.
